BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-19-000

MARYLAND

Retail, wholesale, and service establishments located in Maryland showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the State during 1948 aggregated \$1,912,200,000, an increase of 209 percent over the \$619,300,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the State showed a 196 percent rise over the same period, reaching a total of \$2,039,400,000 in 1948 as compared with \$689,000,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$121,200,000 in 1948 compared with \$37,800,000 in 1939. Hotel receipts moved from \$8,200,000 in 1939 to \$19,300,000 in 1948. Amusement businesses in the State recorded receipts of \$40,000,000 in 1948 compared with \$16,000,000 in 1939.

Employment in the State also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 109,170 paid employees for the workweek ended nearest November 15, 1948. Of these, 90,714 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 75,468 and 61,227. Wholesale trade establishments reported a total of 33,400 full- and part-week employees for the week of November 15, 1948, compared with 25,315 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 20,509; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 14,178.

These preliminary figures have been compiled from similar releases being made available for each county in Maryland. Final figures, superseding the preliminary data for Maryland, will be included in a State Bulletin to be issued in several months. Similar data will be made available in preliminary and final form for each of the States.

A single copy of the preliminary release for the State of Maryland as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 10, 1950

Release Series BC-1P-19-001

ALLEGANY COUNTY, MD.

Retail, wholesale, and service establishments located in Allegany County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$73.3 million, an increase of 161 percent over the \$28.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$38.5 million in 1948 as compared with \$15.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.2 million in 1948 compared with \$1.1 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 5,552 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 4,396 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Allegany County, Maryland, which also includes data for the cities of Cumberland, Frostburg, and Westernport. Final figures, superseding the preliminary data for Allegany County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Allegany County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release March 30, 1950

Release Series BC-1P-19-002

ANNE ARUNDEL COUNTY, MD.

Retail, wholesale, and service establishments located in Anne Arundel County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$56.3 million, an increase of 273 percent over the \$15.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$31.3 million in 1948 as compared with \$16.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.2 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 4,163 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,406 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Anne Arundel County, Maryland, which also includes data for the city of Annapolis. Final figures, superseding the preliminary data for Anne Arundel County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Anne Arundel County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

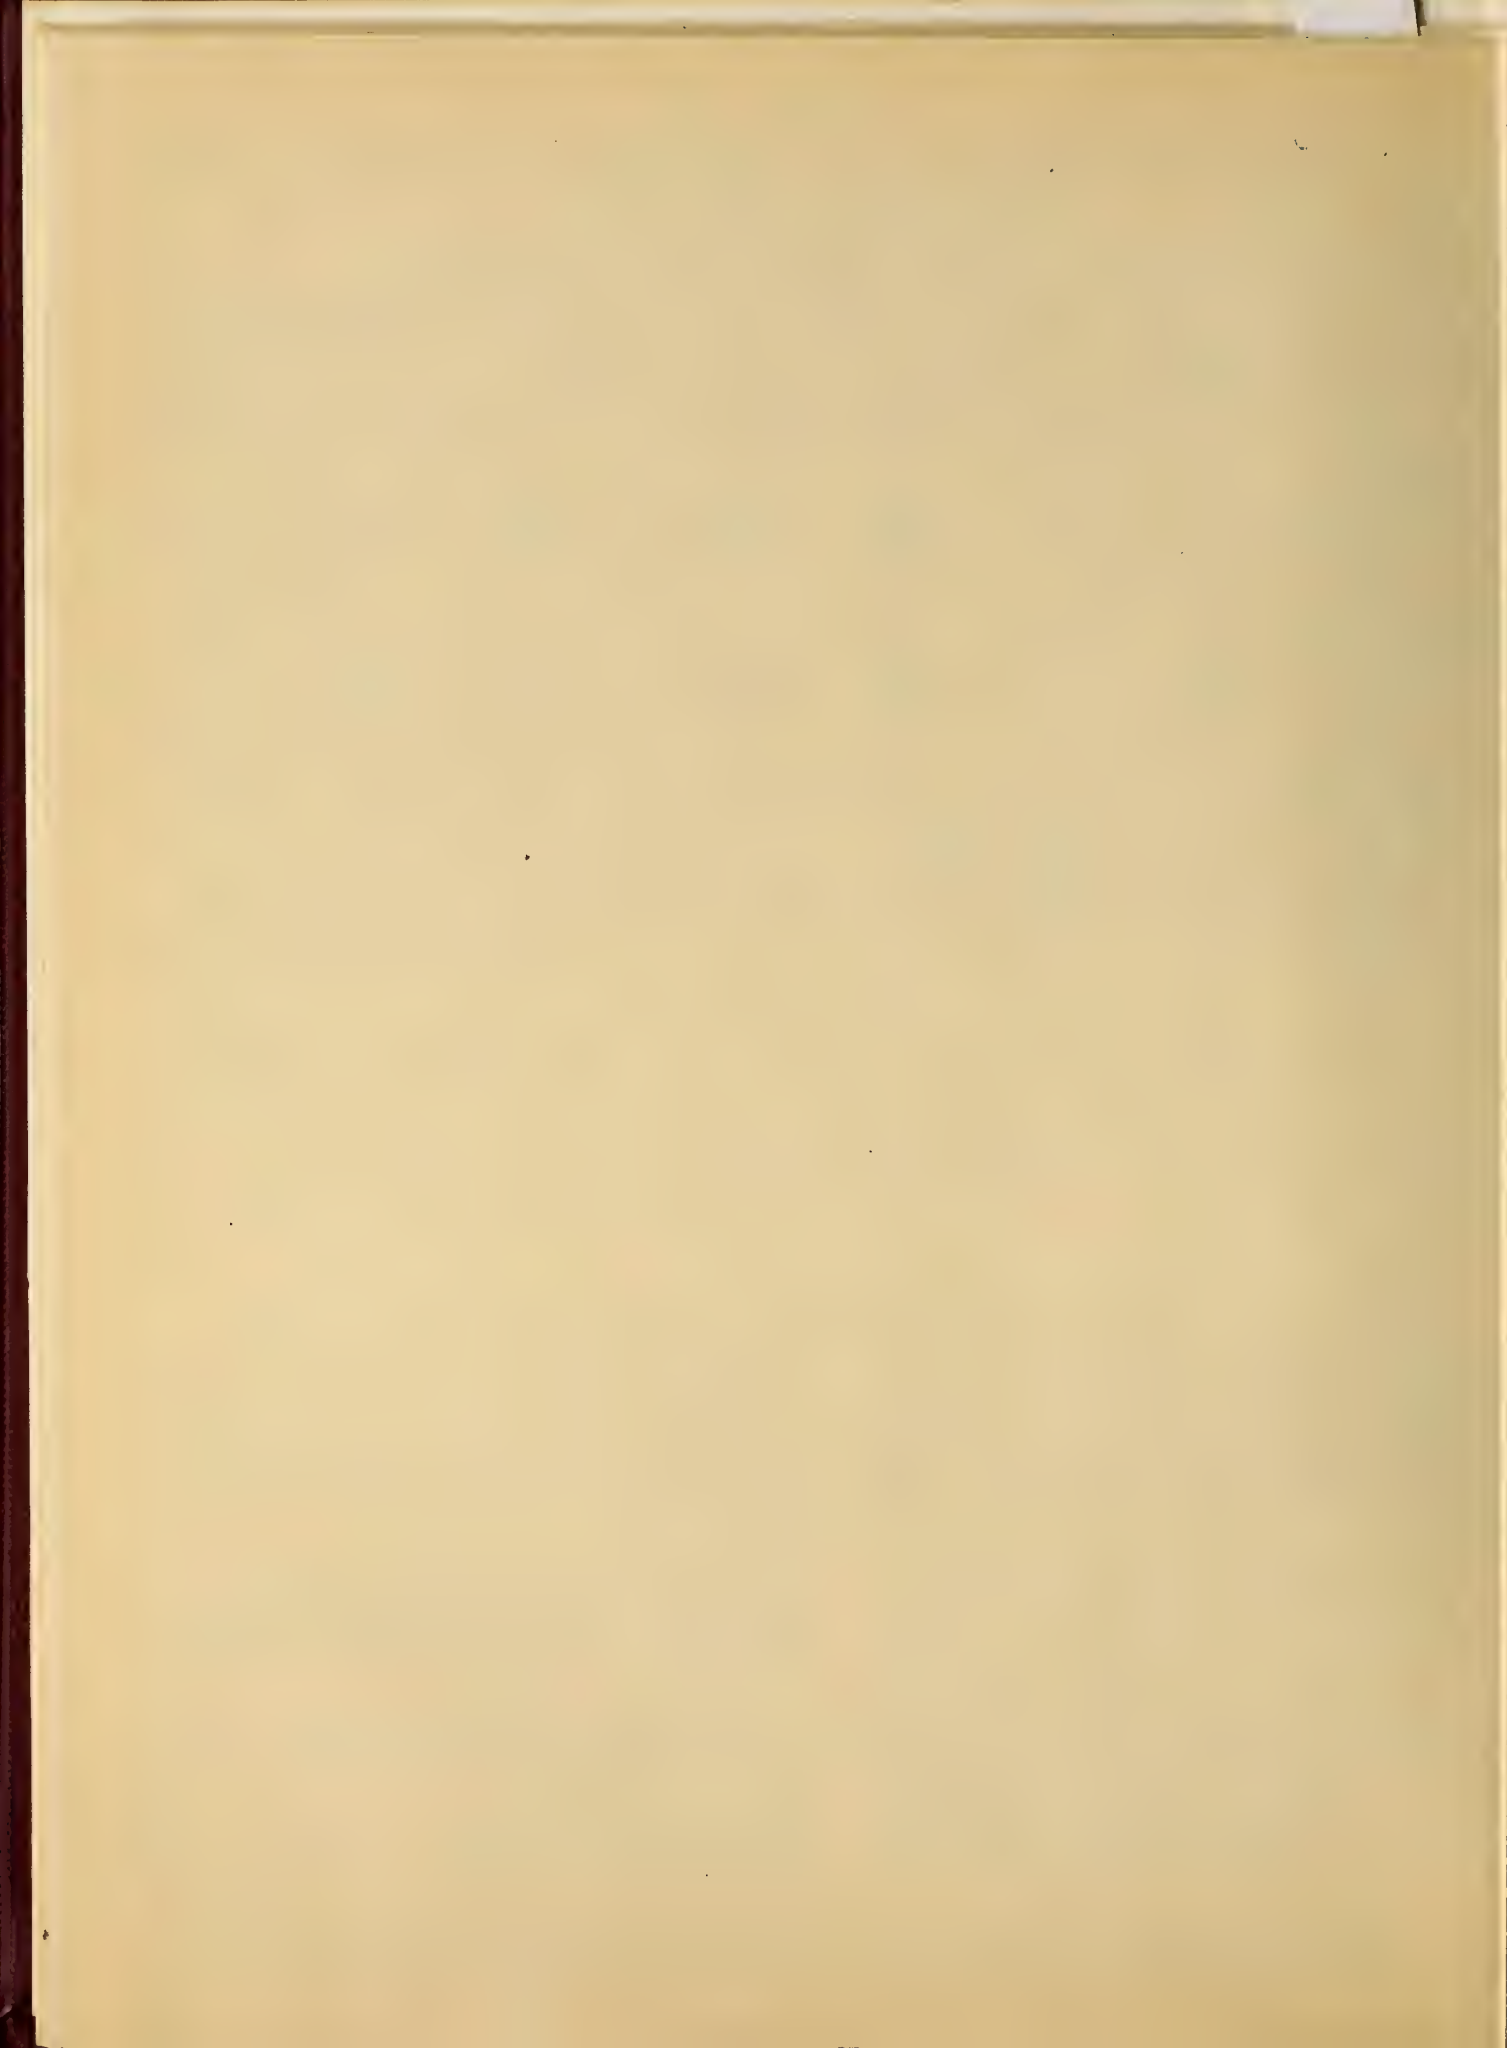

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 10, 1950

Release Series BC-1P-19-003

BALTIMORE COUNTY, MD.

Retail, wholesale, and service establishments located in Baltimore County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$117.9 million, an increase of 332 percent over the \$27.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$23.7 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.3 million in 1948 compared with \$1.2 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 7,328 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 3,156 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Baltimore County, Maryland, which also includes data for District 12 and District 13. Final figures, superseding the preliminary data for Baltimore County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Baltimore County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

For Release April 17, 1950

Release Series BC-1P-19-005

CALVERT COUNTY, MD.

Retail, wholesale, and service establishments located in Calvert County, Maryland showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.7 million, an increase of 253 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$909,000 in 1948 as compared with \$576,000 in 1939. The service trades included in the Census of Business recorded receipts totaling \$135,000 in 1948 compared with \$50,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 475 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 367 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Calvert County, Maryland. Final figures, superseding the preliminary data for Calvert County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Calvert County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CAROLINE COUNTY, MD.

Retail and service establishments located in Caroline County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.9 million, an increase of 359 percent over the \$3.9 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$532,000 in 1948 compared with \$173,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 770 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 441 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Caroline County, Maryland. Final figures, superseding the preliminary data for Caroline County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Caroline County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1943, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 6, 1950

Release Series BC-1p-19-007

CARROLL COUNTY, MD.

Retail, wholesale, and service establishments located in Carroll County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$33.0 million, an increase of 275 percent over the \$8.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.3 million in 1948 as compared with \$1.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.4 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,748 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,080 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Carroll County, Maryland, which also includes data for the city of Westminster. Final figures, superseding the preliminary data for Carroll County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Carroll County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 17 1950

Release Series BC-1P-19-008

CECIL COUNTY, MD.

Retail, wholesale, and service establishments located in Cecil County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.5 million, an increase of 247 percent over the \$5.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.1 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$701,000 in 1948 compared with \$289,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,106 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 645 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cecil County, Maryland, which also includes data for the city of Elkton. Final figures, superseding the preliminary data for Cecil County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cecil County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-19-009

CHARLES COUNTY, MD.

Retail, wholesale, and service establishments located in Charles County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.2 million, an increase of 326 percent over the \$3.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$16.0 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$423,000 in 1948 compared with \$43,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 659 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 310 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Charles County, Maryland. Final figures, superseding the preliminary data for Charles County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Charles County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 6, 1950

Release Series BC-1P- 19-010

DORCHESTER COUNTY, MD.

Retail, wholesale, and service establishments located in Dorchester County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$19.6 million, an increase of 202 percent over the \$6.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.9 million in 1948 as compared with \$4.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$890,000 in 1948 compared with \$329,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,090 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,652 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Dorchester County, Maryland, which also includes data for the city of Cambridge. Final figures, superseding the preliminary data for Dorchester County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Dorchester County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 22, 1950

Release Series BC-1P-19-011

FREDERICK COUNTY, MD.

Retail, wholesale, and service establishments located in Frederick County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$49.6 million, an increase of 185 percent over the \$17.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$17.5 million in 1948 as compared with \$4.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.9 million in 1948 compared with \$0.6 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,137 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,393 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Frederick County Maryland, which also includes data for the cities of Brunswick and Frederick. Final figures, superseding the preliminary data for Frederick County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Frederick County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

GARRETT COUNTY, MD.

Retail, wholesale, and service establishments located in Garrett County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.3 million, an increase of 215 percent over the \$3.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.8 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$282,000 in 1948 compared with \$80,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 634 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 358 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Garrett County, Maryland. Final figures, superseding the preliminary data for Garrett County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Garrett County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 17, 1950

Release Series BC-1P- 19-013

HARFORD COUNTY, MD.

Retail, wholesale, and service establishments located in Harford County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$34.1 million, an increase of 292 percent over the \$8.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.8 million in 1948 as compared with \$7.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.4 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,998 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,145 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Harford County, Maryland, which also includes data for the city of Havre de Grace. Final figures, superseding the preliminary data for Harford County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Harford County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

KENT COUNTY, MD.

Retail, wholesale, and service establishments located in Kent County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.6 million, an increase of 190 percent over the \$4.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.2 million in 1948 as compared with \$1.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$394,000 in 1948 compared with \$75,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments reported a combined total of 678 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 639 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kent County, Maryland, which also includes data for the city of Chestertown. Final figures, superseding the preliminary data for Kent County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kent County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

For Release April 13, 1950

Release Series BC-1P- 19-016

MONTGOMERY COUNTY, MD.

Retail, wholesale, and service establishments located in Montgomery County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$103.2 million, an increase of 325 percent over the \$24.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.1 million in 1948 as compared with \$8.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.4 million in 1948 compared with \$1.0 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 6,405 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,996 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Montgomery County, Maryland, which also includes data for the city of Takoma Park. Final figures, superseding the preliminary data for Montgomery County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Montgomery County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

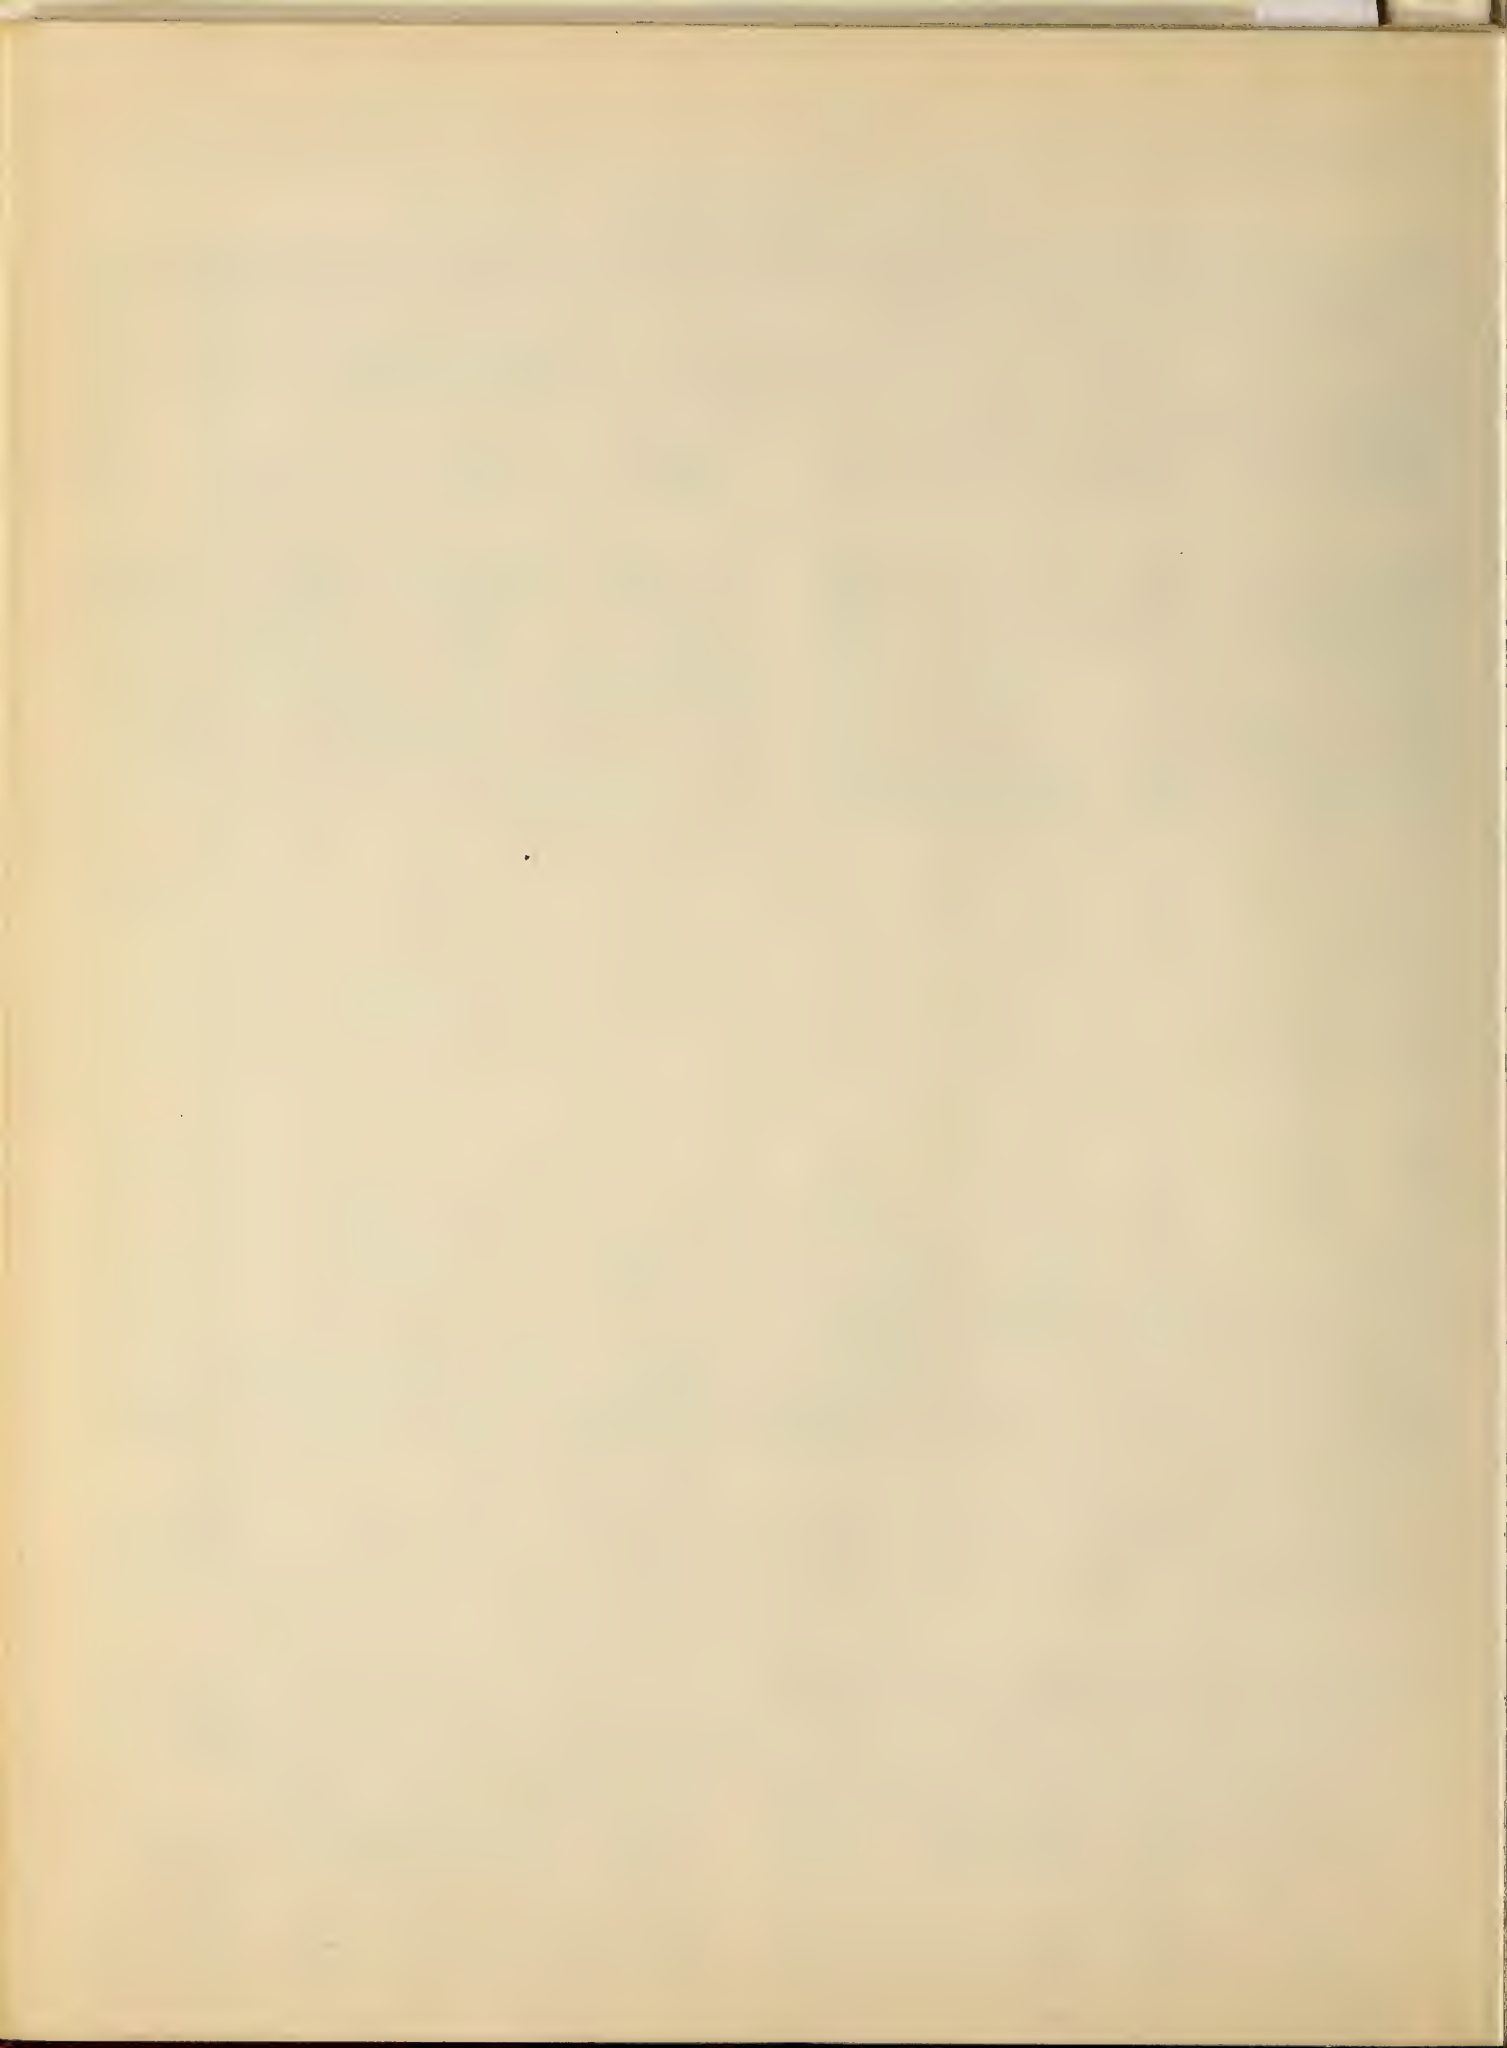

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 13, 1950

Release Series BC-1P- 19-017

PRINCE GEORGES COUNTY, MD.

Retail, wholesale, and service establishments located in Prince Georges County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$78.7 million, an increase of 292 percent over the \$20.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.0 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.2 million in 1948 compared with \$1.0 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 4,785 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,267 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Prince Georges County, Maryland, which also includes data for the cities of Hyattsville, Laurel, Mount Ranier, and Takoma Park. Final figures, superseding the preliminary data for Prince Georges County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Prince Georges County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

QUEEN ANNES COUNTY, MD.

Retail, wholesale, and service establishments located in Queen Annes County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.2 million, an increase of 229 percent over the \$2.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$5.8 million in 1948 as compared with \$1.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$403,000 in 1948 compared with \$65,000 in 1939.

Retail trade establishments in the county reported 293 paid employees for the workweek ended nearest November 15, 1948. Wholesale trade establishments reported 305 paid employees for the same week in 1948. For the selected service trades, paid employees numbered 30 for the November 15, 1948 workweek.

These preliminary figures have been derived from a Census report on Queen Annes County, Maryland. Final figures, superseding the preliminary data for Queen Annes County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Queen Annes County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

SAINT MARYS COUNTY, MD.

Retail, wholesale, and service establishments located in Saint Marys County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.5 million, an increase of 443 percent over the \$2.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.1 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$473,000 in 1948 compared with \$44,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 720 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 218 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Saint Marys County, Maryland. Final figures, superseding the preliminary data for Saint Marys County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Saint Marys County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-52-019

SOMERSET COUNTY, MD.

Retail, wholesale, and service establishments located in Somerset County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.1 million, an increase of 421 percent over the \$2.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.0 million in 1948 as compared with \$3.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$315,000 in 1948 compared with \$114,000 in 1939.

Retail trade establishments in the county reported 501 paid employees for the workweek ended nearest November 15, 1948. Wholesale trade establishments reported 769 paid employees for the same week in 1948. For the selected service trades, paid employees numbered 53 for the November 15, 1948 workweek.

These preliminary figures have been derived from a Census report on Somerset County, Maryland, which also includes data for the city of Crisfield. Final figures, superseding the preliminary data for Somerset County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Somerset County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 17, 1950

Release Series BC-1P-19-021

TALBOT COUNTY, MD.

Retail, wholesale, and service establishments located in Talbot County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.1 million, an increase of 255 percent over the \$6.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.3 million in 1948 as compared with \$3.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,451 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,258 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Talbot County, Maryland, which also includes data for the city of Easton. Final figures, superseding the preliminary data for Talbot County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Talbot County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

For Release April 3, 1950

Release Series BC-1P-19-022

WASHINGTON COUNTY, MD.

Retail, wholesale, and service establishments located in Washington County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$63.9 million, an increase of 194 percent over the \$21.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$56.9 million in 1948 as compared with \$16.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.5 million in 1948 compared with \$1.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 5,698 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 4,218 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Washington County, Maryland, which also includes data for the city of Hagerstown. Final figures, superseding the preliminary data for Washington County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Washington County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

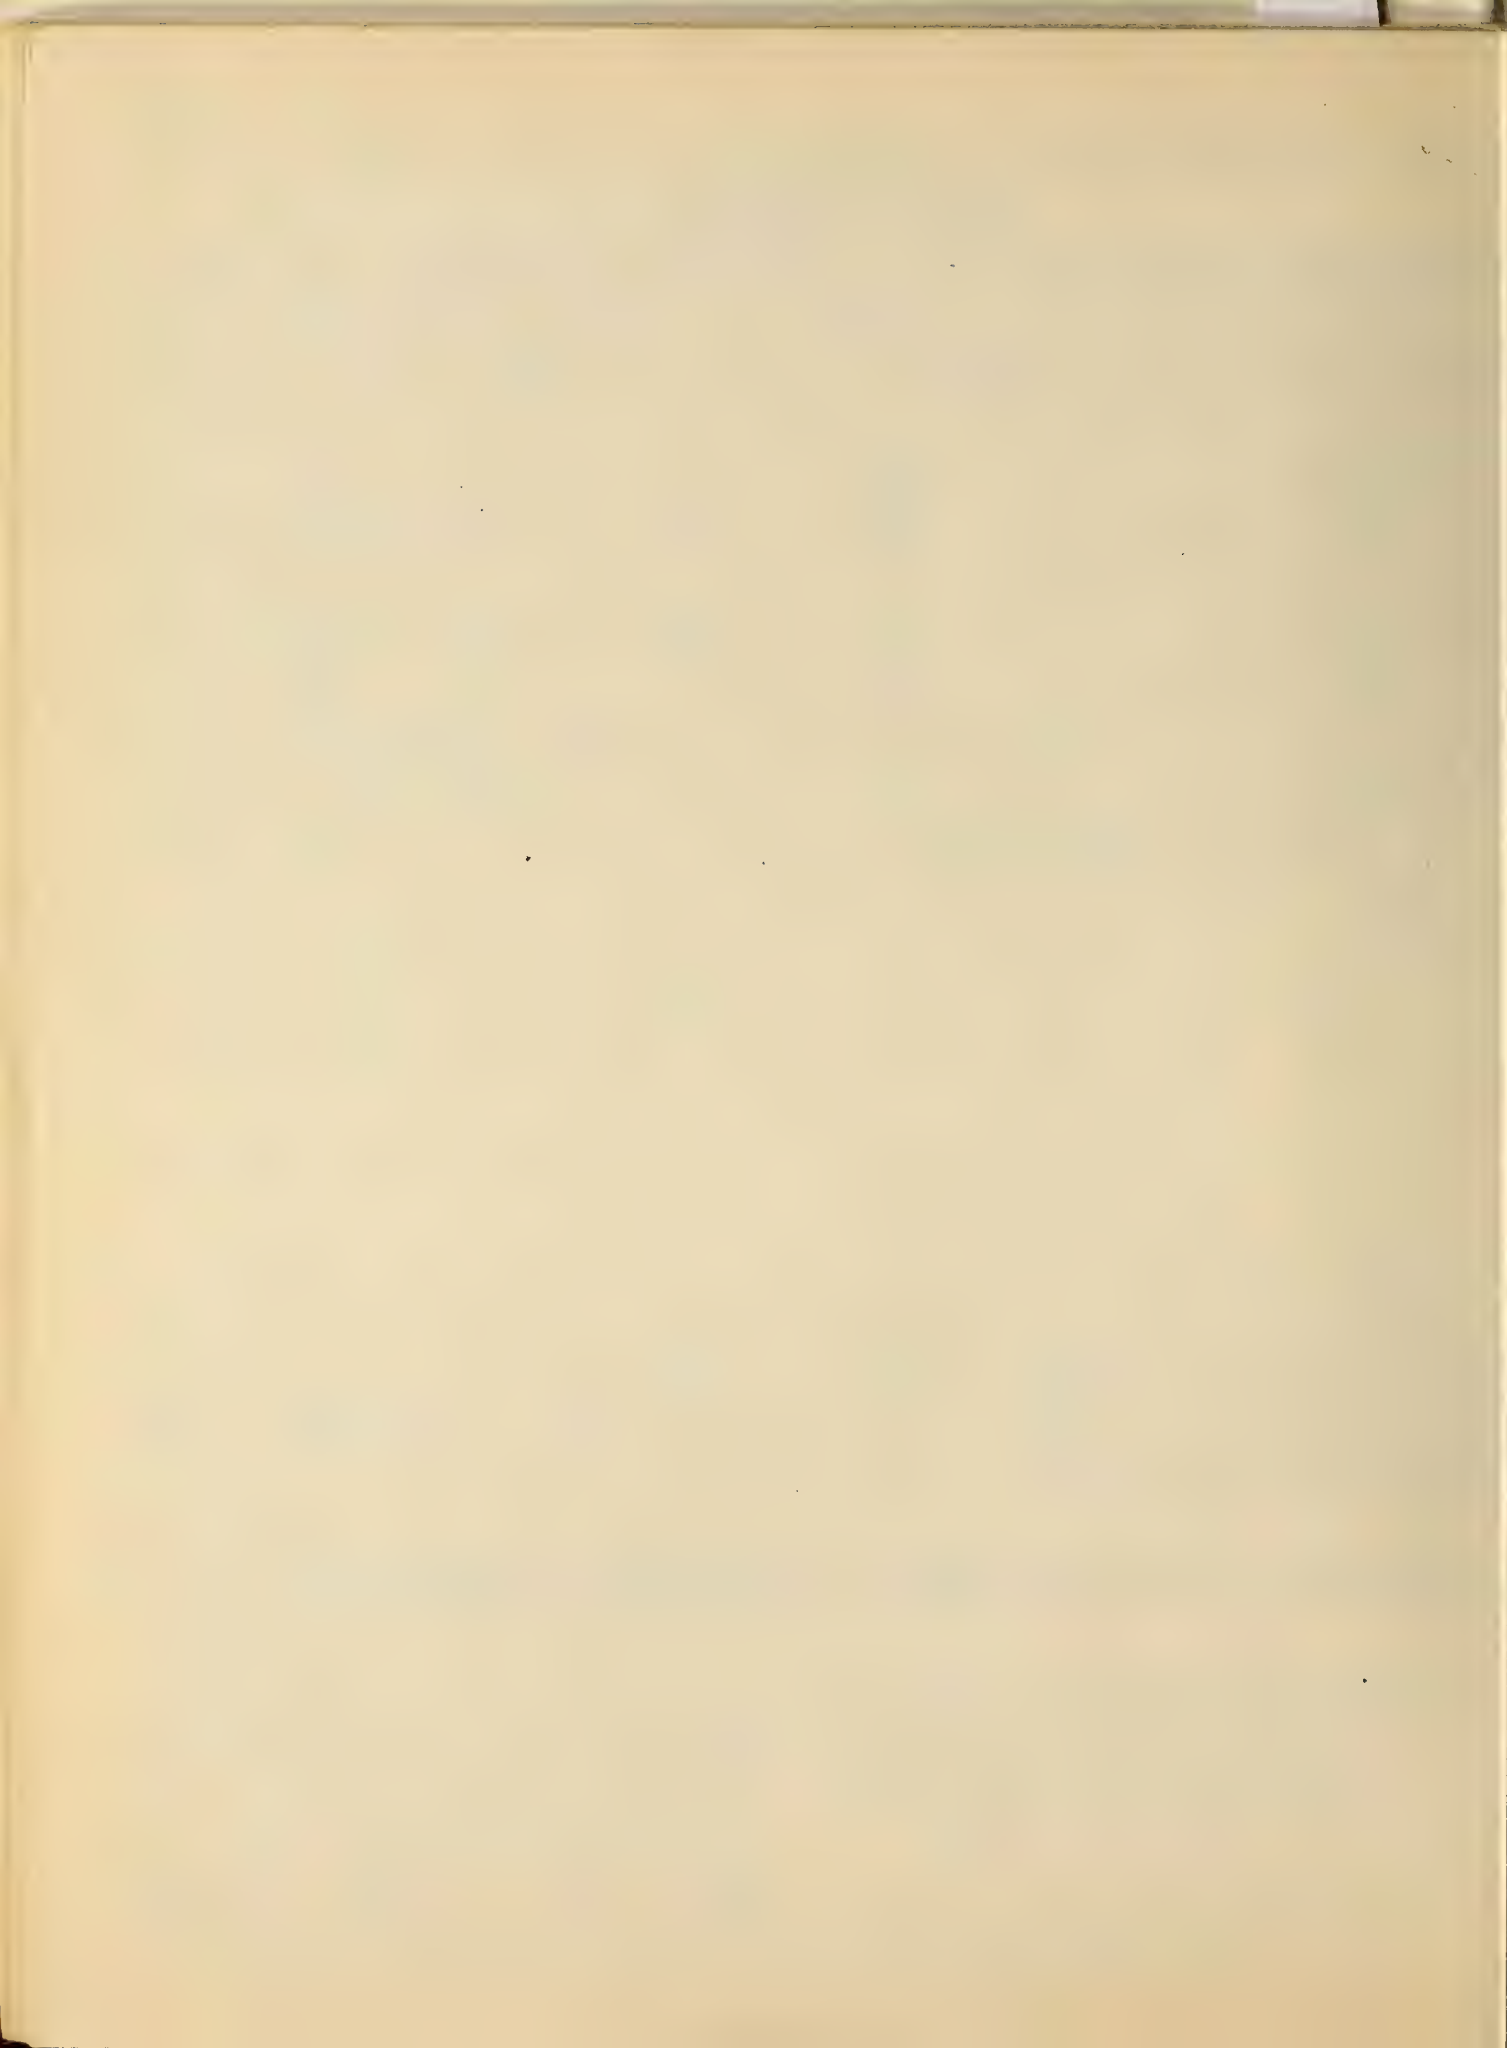

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 5, 1950

Release Series BC-1P-19-023

WICOMICO COUNTY, MD.

Retail, wholesale, and service establishments located in Wicomico County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$44.6 million, an increase of 269 percent over the \$12.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$32.5 million in 1948 as compared with \$8.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.5 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,697 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,284 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wicomico County, Maryland, which also includes data for the city of Salisbury. Final figures, superseding the preliminary data for Wicomico County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wicomico County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

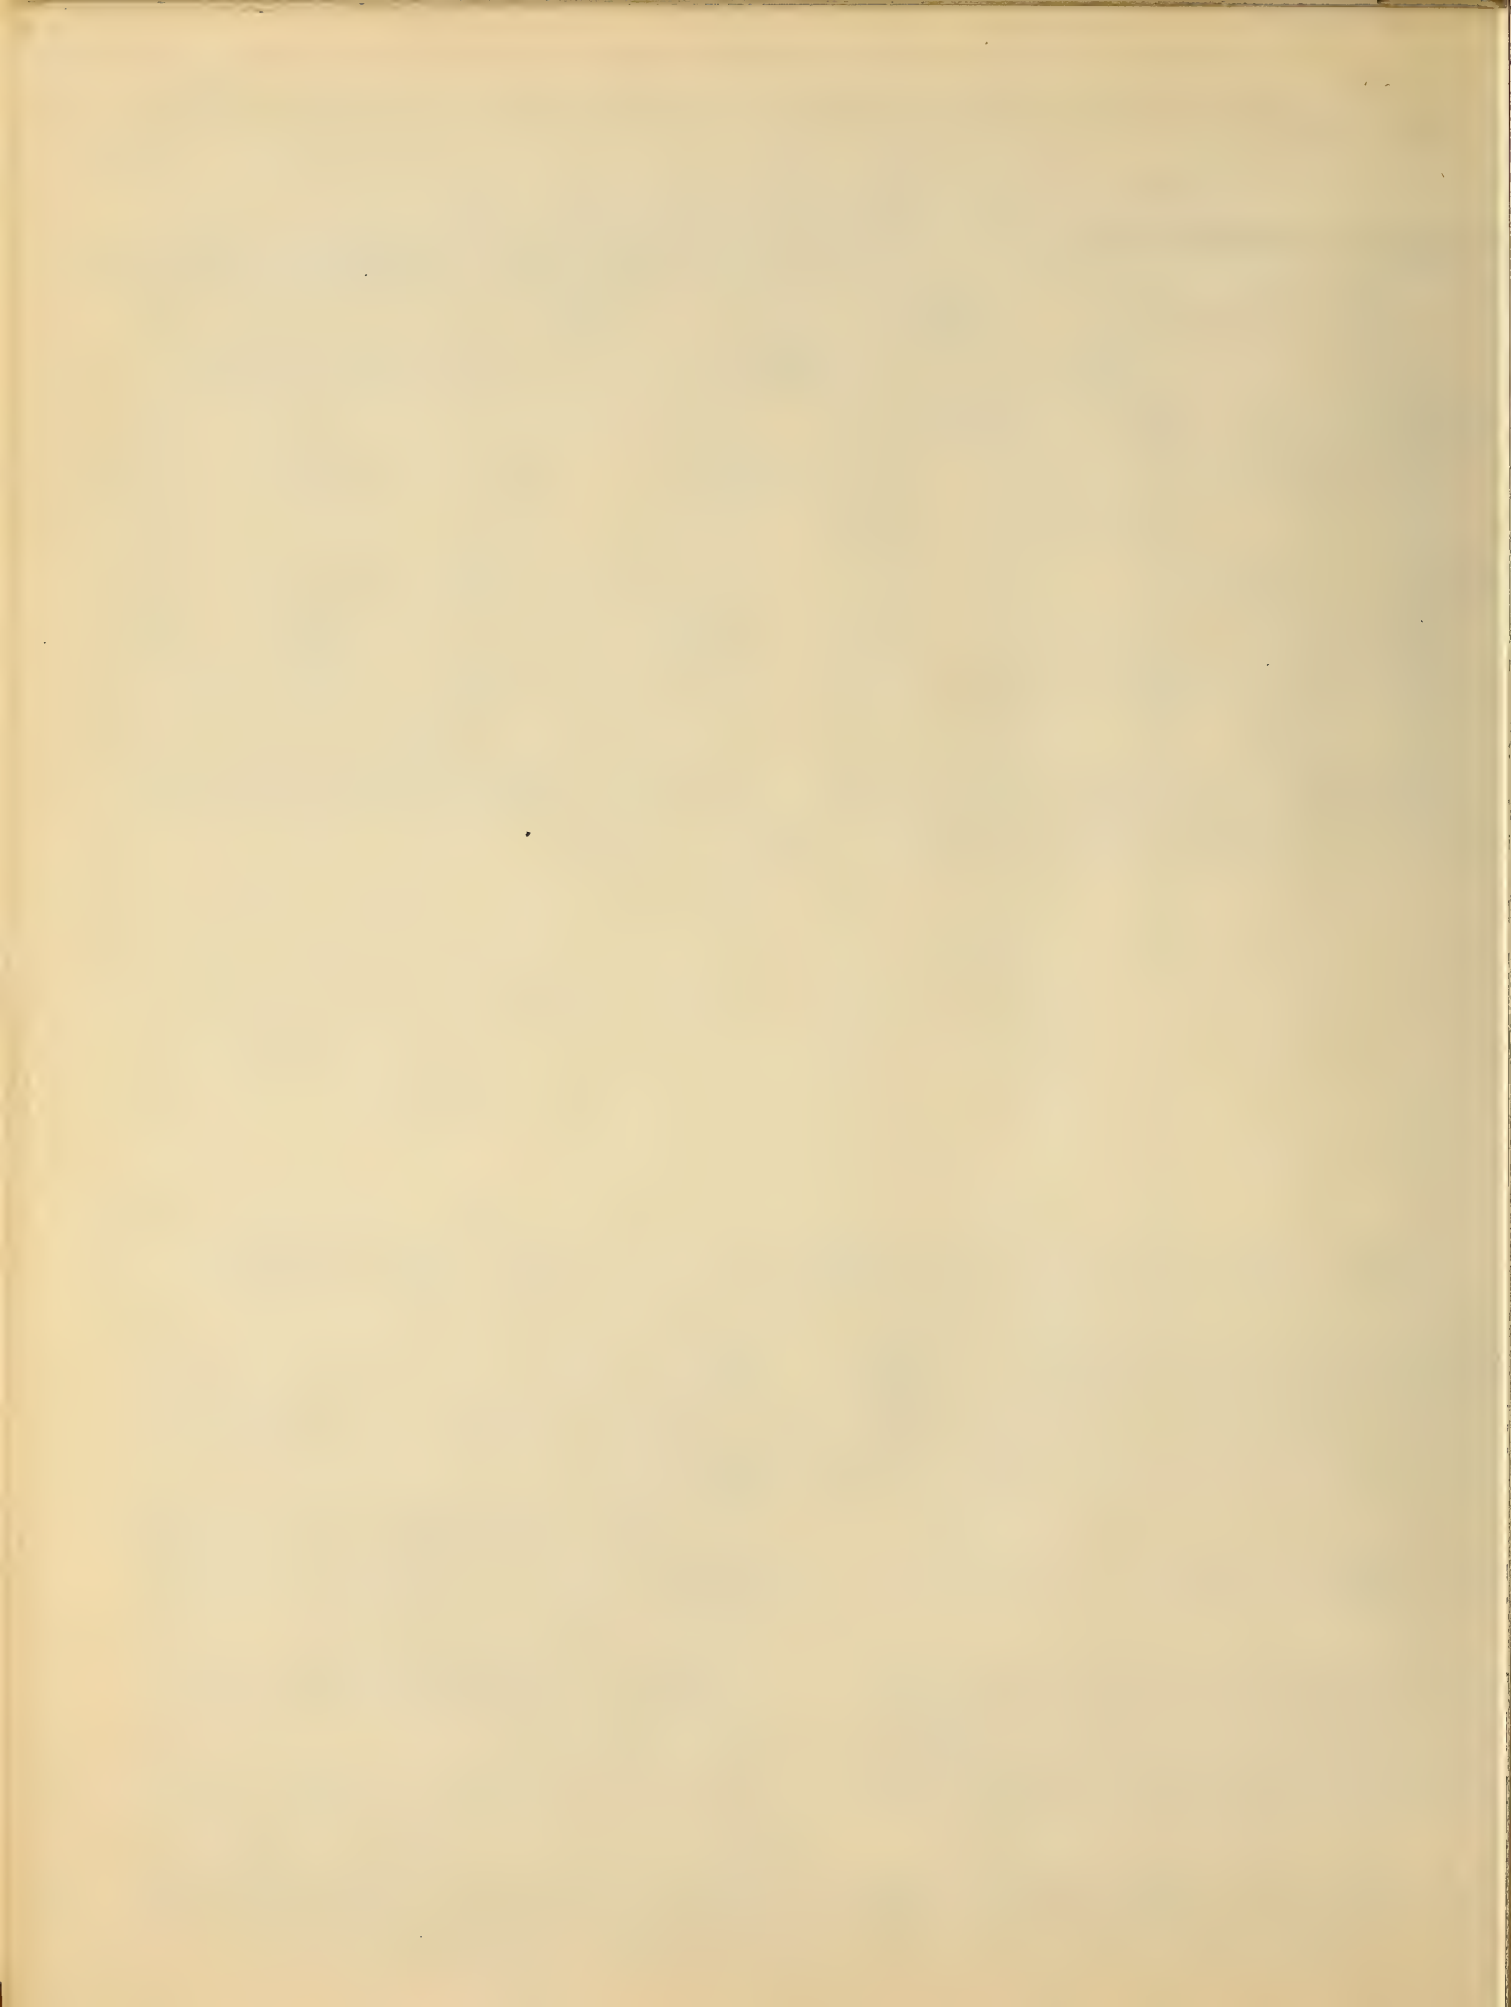

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-19-024

WORCESTER COUNTY, MD.

Retail, wholesale, and service establishments located in Worcester County, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$34.1 million, an increase of 367 percent over the \$7.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.6 million in 1948 as compared with \$3.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$782,000 in 1948 compared with \$212,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,633 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 871 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Worcester County, Maryland, which also includes data for Pocomoke City. Final figures, superseding the preliminary data for Worcester County, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Worcester County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 17, 1950

Release Series BC-1P-19-004

CITY OF BALTIMORE, MD.

Retail, wholesale, and service establishments located in Baltimore city, Maryland, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the city during 1948 aggregated \$1,051,600,000, an increase of 177 percent over the \$380,100,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the city showed a 195 percent rise over the same period, reaching a total of \$1,704,600,000 in 1948 as compared with \$578,600,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$81.2 million in 1948 compared with \$27.4 million in 1939. Hotel receipts moved from \$5.1 million in 1939 to \$12.5 million in 1948. Amusement businesses in the city recorded receipts of \$20.9 million in 1948. No comparable figures for 1939 are available.

Employment in the city also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 67,179 paid employees for the workweek ended nearest November 15, 1948. Of these, 56,335 worked the full week, and the remainder part of the week. The comparable figures for 1939 were 49,997 and 40,781. Wholesale trade establishments reported a total of 24,577 full- and part-week employees for the week of November 15, 1948, compared with 18,312 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 13,940; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 10,769.

These preliminary figures have been derived from a Census report on Baltimore city, Maryland.

Final figures, superseding the preliminary data for Baltimore city, will be included in a Bulletin for the State of Maryland to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Baltimore city as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

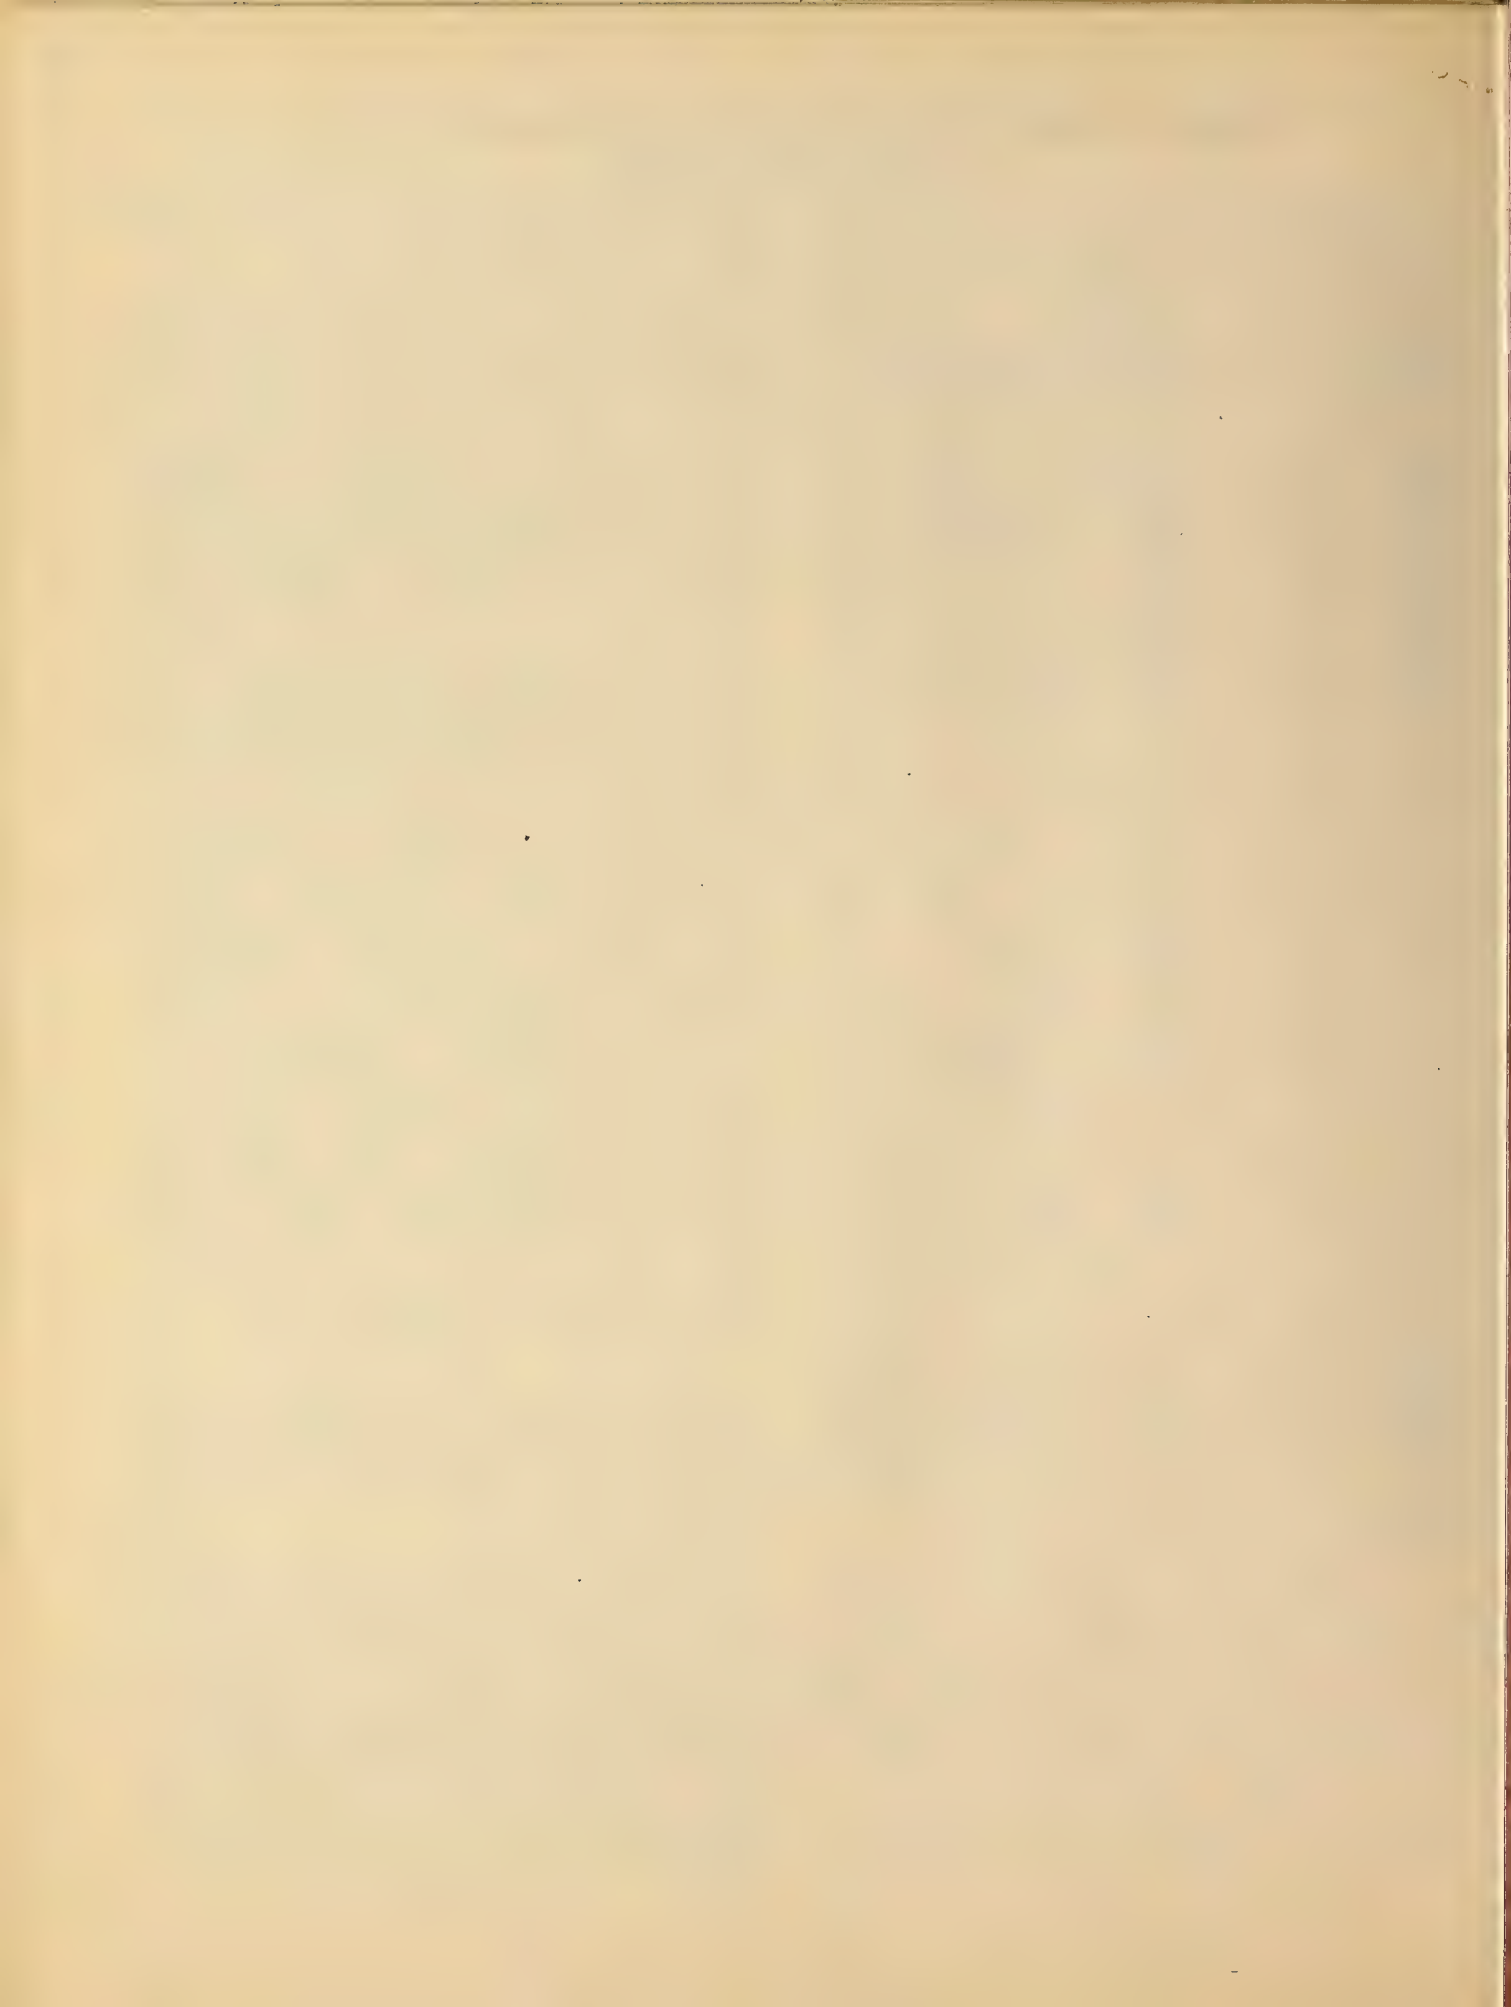

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P-20-000

MASSACHUSETTS

Retail, wholesale, and service establishments located in Massachusetts showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the State during 1948 aggregated \$4,258,300,000, an increase of 145 percent over the \$1,737,700,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the State showed a 183 percent rise over the same period, reaching a total of \$6,327,300,000 in 1948 as compared with \$2,232,100,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$275,300,000 in 1948 compared with \$124,300,000 in 1939. Hotel receipts moved from \$26,800,000 in 1939 to \$68,300,000 in 1948. Amusement businesses in the State recorded receipts of \$88,000,000 in 1948 compared with \$38,600,000 in 1939.

Employment in the State also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 254,609 paid employees for the workweek ended nearest November 15, 1948. Of these, 199,982 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 210,116 and 164,550. Wholesale trade establishments reported a total of 80,591 full- and part-week employees for the week of November 15, 1948, compared with 60,134 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 44,265; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 37,381.

These preliminary figures have been compiled from similar releases being made available for each county in Massachusetts. Final figures, superseding the preliminary data for Massachusetts, will be included in a State Bulletin to be issued in several months. Similar data will be made available in preliminary and final form for each of the States.

A single copy of the preliminary release for the State of Massachusetts as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 23, 1950

Release Series BC-1P-20-001

BARNSTABLE COUNTY, MASS.

Retail, wholesale, and service establishments located in Barnstable County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$60.1 million, an increase of 193 percent over the \$20.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.5 million in 1948 as compared with \$4.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.1 million in 1948 compared with \$1.1 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,694 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,968 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Barnstable County, Massachusetts, which also includes data for Barnstable town and Provincetown town. Final figures, superseding the preliminary data for Barnstable County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Barnstable County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 24, 1950

Release Series BC-1P-20-002

BERKSHIRE COUNTY, MASS.

Retail, wholesale, and service establishments located in Berkshire County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$125.6 million, an increase of 154 percent over the \$49.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$41.5 million in 1948 as compared with \$16.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.3 million in 1948 compared with \$2.1 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 8,353 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 6,475 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Berkshire County, Massachusetts, which also includes data for Adams town, Dalton town, Great Barrington town, Lee town, North Adams, and Pittsfield. Final figures, superseding the preliminary data for Berkshire County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Berkshire County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BRISTOL COUNTY, MASS.

Retail, wholesale, and service establishments located in Bristol County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$316.1 million, an increase of 165 percent over the \$119.4 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 201 percent rise over the same period, reaching a total of \$175.5 million in 1948 as compared with \$58.3 million in 1939. The service trades included in the Census of Business reported receipts totaling \$19.2 million in 1948 compared with \$6.6 million in 1939. Amusement businesses in the county recorded receipts of \$5.9 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 18,056 paid employees for the workweek ended nearest November 15, 1948. Of these, 14,106 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 13,888 and 10,448. Wholesale trade establishments reported a total of 3,545 full- and part-week employees for the week of November 15, 1948, compared with 2,340 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 3,272; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 2,061.

These preliminary figures have been derived from a Census report on Bristol County, Massachusetts. The report also contains data for Attleboro, Dartmouth town, Fairhaven town, Fall River, Mansfield town, New Bedford, North Attleboro town, Somerset town and Taunton.

Final figures, superseding the preliminary data for Bristol County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Bristol County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-20-004

DUKES COUNTY, MASS.

Retail and service establishments located in Dukes County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.7 million, an increase of 116 percent over the \$3.1 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$235,000 in 1948 compared with \$158,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 498 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 268 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Dukes County, Massachusetts. Final figures, superseding the preliminary data for Dukes County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Dukes County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-20-005

ESSEX COUNTY, MASS.

Retail, wholesale, and service establishments located in Essex County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$458.8 million, an increase of 157 percent over the \$178.3 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 174 percent rise over the same period, reaching a total of \$189.8 million in 1948 as compared with \$69.2 million in 1939. The service trades included in the Census of Business reported receipts totaling \$27.7 million in 1948 compared with \$11.5 million in 1939. Amusement businesses in the county recorded receipts of \$7.1 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 28,039 paid employees for the workweek ended nearest November 15, 1948. Of these, 21,037 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 21,665 and 15,595. Wholesale trade establishments reported a total of 4,379 full- and part-week employees for the week of November 15, 1948, compared with 2,981 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 4,805; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 3,441.

These preliminary figures have been derived from a Census report on Essex County, Massachusetts. The report also contains data for eighteen cities of 2,500 inhabitants or more located in Essex County.

Final figures, superseding the preliminary data for Essex County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Essex County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

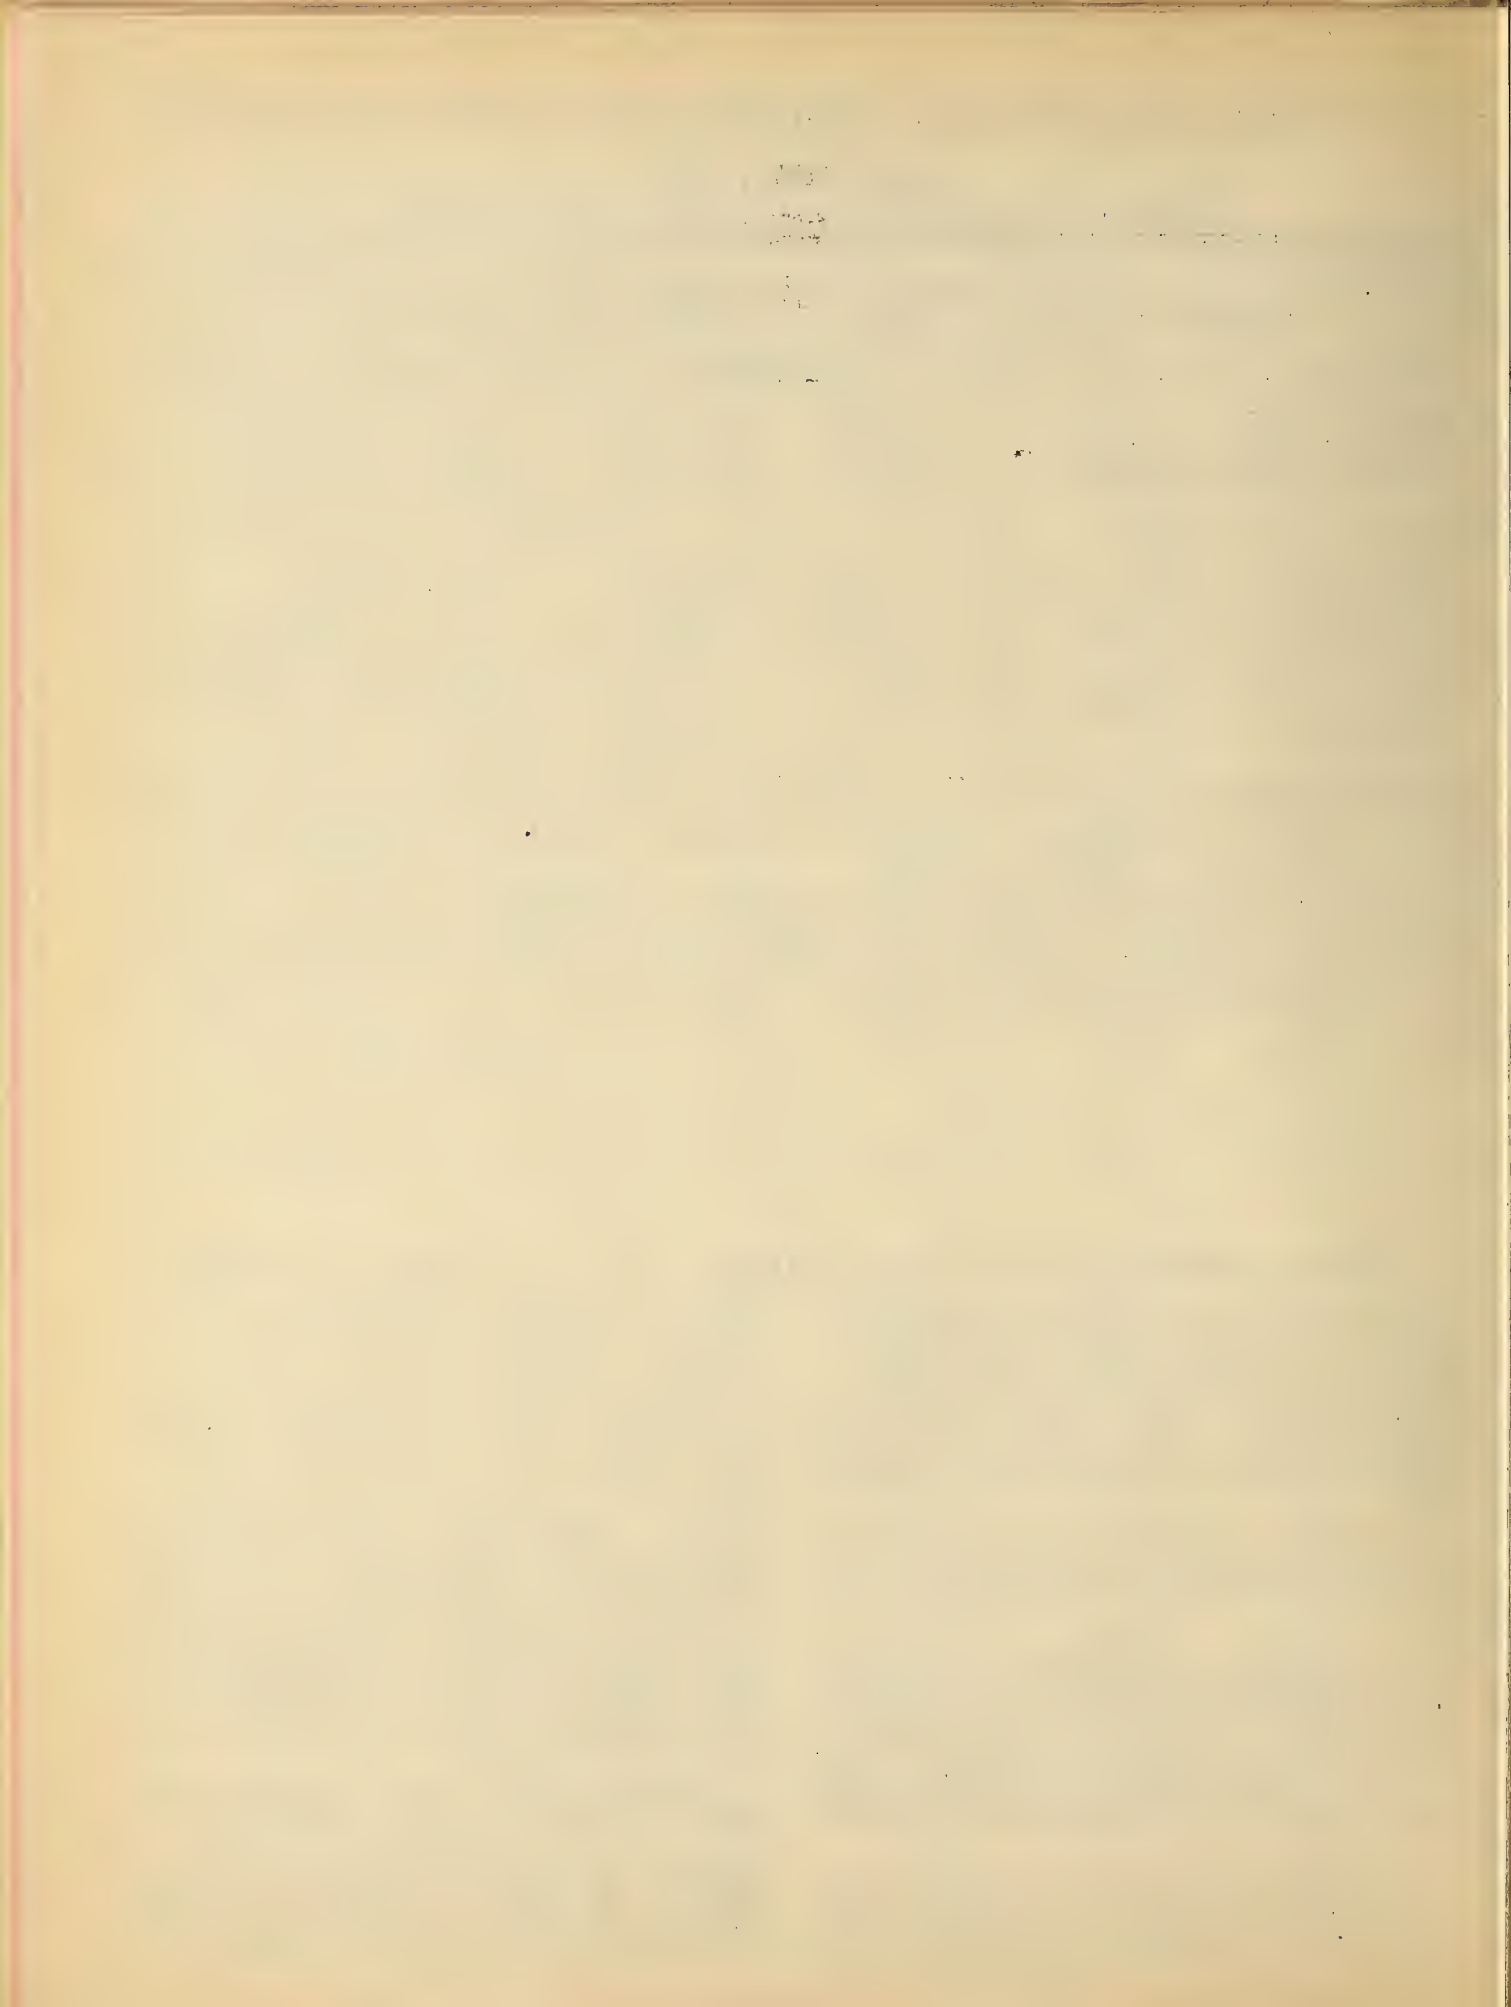

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release April 27, 1950

Release Series BC-1P-20-006

FRANKLIN COUNTY, MASS.

Retail, wholesale, and service establishments located in Franklin County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$48.7 million, an increase of 156 percent over the \$19.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.5 million in 1948 as compared with \$3.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.7 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,071 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,210 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Franklin County, Massachusetts, which also includes data for Greenfield town, Montague town, and Orange town. Final figures, superseding the preliminary data for Franklin County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Franklin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 1, 1950

Release Series BC-1P- 20-007

HAMPDEN COUNTY, MASS.

Retail, wholesale, and service establishments located in Hampden County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$352.8 million, an increase of 158 percent over the \$136.7 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 182 percent rise over the same period, reaching a total of \$277.4 million in 1948 as compared with \$98.3 million in 1939. The service trades included in the Census of Business reported receipts totaling \$22.4 million in 1948 compared with \$8.5 million in 1939. Hotel receipts moved from \$2.5 million in 1939 to \$5.7 million in 1948. Amusement businesses in the county recorded receipts of \$6.1 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 21,324 paid employees for the workweek ended nearest November 15, 1948. Of these, 16,316 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 16,772 and 12,923. Wholesale trade establishments reported a total of 5,264 full- and part-week employees for the week of November 15, 1948, compared with 3,720 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 3,459; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 2,448.

These preliminary figures have been derived from a Census report on Hampden County, Massachusetts. The report also contains data for Chicopee, Holyoke, Longmeadow town, Ludlow town, Palmer town, Springfield, Westfield, and West Springfield town.

Final figures, superseding the preliminary data for Hampden County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hampden County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BUREAU OF THE CENSUS

For Release May 22, 1950

Release Series BC-1P-20-008

HAMPSHIRE COUNTY, MASS.

Retail, wholesale, and service establishments located in Hampshire County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$59.2 million, an increase of 143 percent over the \$24.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.4 million in 1948 as compared with \$4.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.7 million in 1948 compared with \$1.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,721 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 3,129 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Hampshire County, Massachusetts, which also includes data for Amherst town, Easthampton town, Northampton, South Hadley town, and Ware town. Final figures, superseding the preliminary data for Hampshire County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hampshire County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-20-009

MIDDLESEX COUNTY, MASS.

Retail, wholesale, and service establishments located in Middlesex County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$754.0 million, an increase of 150 percent over the \$301.4 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 276 percent rise over the same period, reaching a total of \$555.7 million in 1948 as compared with \$147.7 million in 1939. The service trades included in the Census of Business reported receipts totaling \$49.1 million in 1948 compared with \$24.5 million in 1939. Hotel receipts moved from \$1.1 million in 1939 to \$2.2 million in 1948. Amusement businesses in the county recorded receipts of \$9.6 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 42,637 paid employees for the workweek ended nearest November 15, 1948. Of these, 31,758 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 35,877 and 26,120. Wholesale trade establishments reported a total of 10,267 full- and part-week employees for the week of November 15, 1948, compared with 6,221 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 8,295; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 7,694.

These preliminary figures have been derived from a Census report on Middlesex County, Massachusetts. The report also contains data for twenty-six cities of 2,500 inhabitants or more located in Middlesex County.

Final figures, superseding the preliminary data for Middlesex County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Middlesex County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

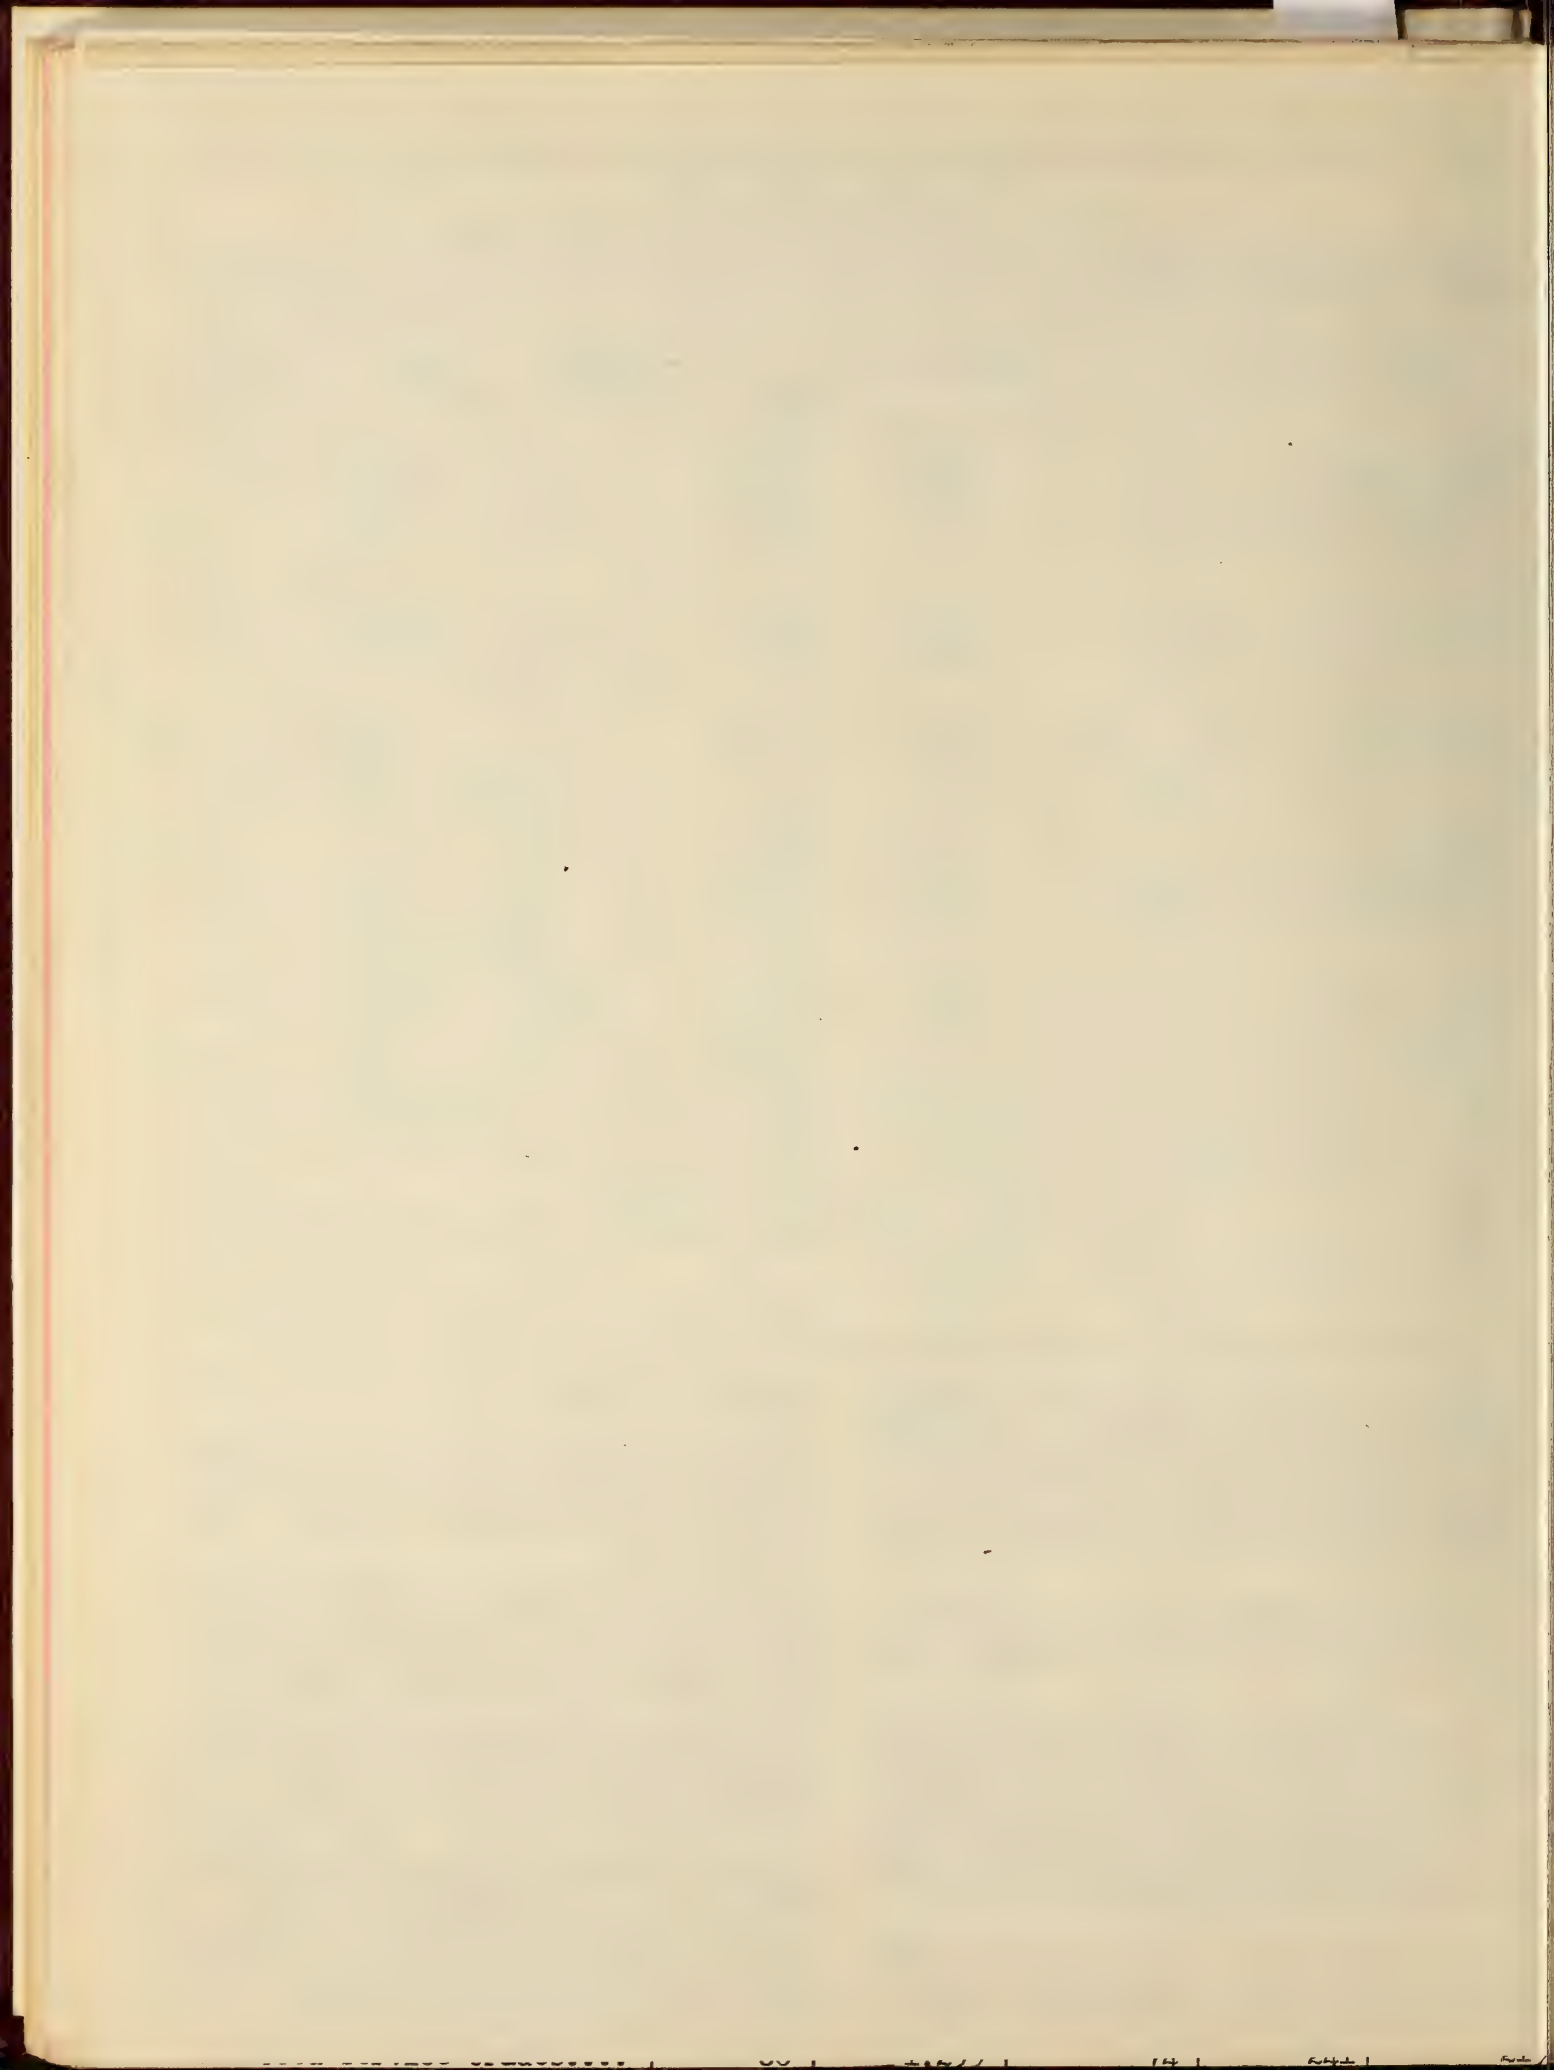

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-20-010

NANTUCKET COUNTY, MASS.

Retail and service establishments located in Nantucket County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.8 million, an increase of 205 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$256,000 in 1948 compared with \$171,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 387 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 172 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Nantucket County, Massachusetts. Final figures, superseding the preliminary data for Nantucket County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Nantucket County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-20-011

NORFOLK COUNTY, MASS.

Retail, wholesale, and service establishments located in Norfolk County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$286.0 million, an increase of 151 percent over the \$114.1 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 150 percent rise over the same period, reaching a total of \$69.5 million in 1948 as compared with \$27.8 million in 1939. The service trades included in the Census of Business reported receipts totaling \$15.8 million in 1948 compared with \$7.9 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 15,909 paid employees for the workweek ended nearest November 15, 1948. Of these, 12,236 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 12,878 and 10,174. Wholesale trade establishments reported a total of 1,286 full- and part-week employees for the week of November 15, 1948, compared with 866 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 2,539; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 2,428.

These preliminary figures have been derived from a Census report on Norfolk County, Massachusetts. The report also contains data for Braintree town, Brookline town, Canton town, Dedham town, Franklin town, Milton town, Needham town, Norwood town, Quincy, Randolph town, Stoughton town, Walpole town, Wellesley town, and Weymouth town.

Final figures, superseding the preliminary data for Norfolk County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Norfolk County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-20-012

PLYMOUTH COUNTY, MASS.

Retail, wholesale, and service establishments located in Plymouth County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$166.4 million, an increase of 143 percent over the \$68.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$54.1 million in 1948 as compared with \$20.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$7.9 million in 1948 compared with \$3.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 11,635 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 8,879 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Plymouth County, Massachusetts, which also includes data for Abington town, Bridgewater town, Brockton, Hingham town, Middleborough town, Plymouth town, Rockland town, and Whitman town. Final figures, superseding the preliminary data for Plymouth County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Plymouth County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P-20-013

SUFFOLK COUNTY, MASS.

Retail, wholesale, and service establishments located in Suffolk County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U.S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$1,143,300,000, an increase of 122 percent over the \$515,000,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 175 percent rise over the same period, reaching a total of \$4,625,400,000 in 1948 as compared with \$1,680,300,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$95,000,000 in 1948 compared with \$46,600,000 in 1939. Hotel receipts moved from \$15,200,000 in 1939 to \$34,200,000 in 1948. Amusement businesses in the county recorded receipts of \$42,500,000 in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 76,539 paid employees for the workweek ended nearest November 15, 1948. Of these, 63,995 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 69,546 and 58,449. Wholesale trade establishments reported a total of 47,222 full- and part-week employees for the week of November 15, 1948, compared with 37,793 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 14,795; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 14,265.

These preliminary figures have been derived from a Census report on Suffolk County, Massachusetts. The report also contains data for Boston, Chelsea, Revere, and Winthrop town.

Final figures, superseding the preliminary data for Suffolk County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Suffolk County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 1, 1950

Release Series BC-1P-20-014

WORCESTER COUNTY, MASS.

Retail, wholesale, and service establishments located in Worcester County, Massachusetts, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$474.8 million, an increase of 155 percent over the \$186.0 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 200 percent rise over the same period, reaching a total of \$302.4 million in 1948 as compared with \$100.8 million in 1939. The service trades included in the Census of Business reported receipts totaling \$25.9 million in 1948 compared with \$9.7 million in 1939. Hotel receipts moved from \$2.0 million in 1939 to \$4.7 million in 1948. Amusement businesses in the county recorded receipts of \$6.5 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 26,679 paid employees for the workweek ended nearest November 15, 1948. Of these, 20,494 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 20,979 and 16,358. Wholesale trade establishments reported a total of 5,844 full- and part-week employees for the week of November 15, 1948, compared with 3,906 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 3,942; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 2,771.

These preliminary figures have been derived from a Census report on Worcester County, Massachusetts. The report also contains data for Athol town, Auburn town, Blackstone town, Clinton town, Dudley town, Fitchburg, Gardner, Hopedale town, Leominster, Milford town, Millbury town, Northbridge town, Southbridge town, Spencer town, Uxbridge town, Webster town, Winchendon town and Worcester.

Final figures, superseding the preliminary data for Worcester County, will be included in a Bulletin for the State of Massachusetts to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Worcester County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P-21-000

MICHIGAN

Retail, wholesale, and service establishments located in Michigan showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the State during 1948 aggregated \$5,941,500,000, an increase of 226 percent over the \$1,820,800,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the State showed a 237 percent rise over the same period, reaching a total of \$6,486,000,000 in 1948 as compared with \$1,926,500,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$362,400,000 in 1948 compared with \$122,500,000 in 1939. Hotel receipts moved from \$29,100,000 in 1939 to \$67,600,000 in 1948. Amusement businesses in the State recorded receipts of \$92,600,000 in 1948 compared with \$36,000,000 in 1939.

Employment in the State also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 305,887 paid employees for the workweek ended nearest November 15, 1948. Of these, 240,319 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 208,645 and 165,837. Wholesale trade establishments reported a total of 83,190 full- and part-week employees for the week of November 15, 1948, compared with 53,695 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 55,273; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 35,952.

These preliminary figures have been compiled from similar releases being made available for each county in Michigan. Final figures, superseding the preliminary data for Michigan, will be included in a State Bulletin to be issued in several months. Similar data will be made available in preliminary and final form for each of the States.

A single copy of the preliminary release for the State of Michigan as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 26, 1950

Release Series BC-1P-21-001

ALCONA COUNTY, MICHIGAN

Retail and service establishments located in Alcona County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.4 million, an increase of 240 percent over the \$1.0 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$70,000 in 1948 compared with \$17,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 103 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 52 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Alcona County, Michigan. Final figures, superseding the preliminary data for Alcona County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Alcona County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-002

ALGER COUNTY, MICH.

Retail, wholesale, and service establishments located in Alger County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.1 million, an increase of 173 percent over the \$2.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.6 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$142,000 in 1948 compared with \$35,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 387 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 255 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Alger County, Michigan, which also includes data for the city of Munising. Final figures, superseding the preliminary data for Alger County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Alger County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-21-003

ALLEGAN COUNTY, MICH.

Retail, wholesale, and service establishments located in Allegan County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$36.8 million, an increase of 250 percent over the \$10.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.1 million in 1948 as compared with \$5.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,906 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,169 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Allegan County, Michigan, which also includes data for the cities of Allegan and Otsego. Final figures, superseding the preliminary data for Allegan County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Allegan County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-004

ALPENA COUNTY, MICH.

Retail, wholesale, and service establishments located in Alpena County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$18.9 million, an increase of 200 percent over the \$6.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.1 million in 1948 as compared with \$2.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$684,000 in 1948 compared with \$211,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,302 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 767 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Alpena County, Michigan, which also includes data for the city of Alpena. Final figures, superseding the preliminary data for Alpena County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Alpena County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release May 4, 1950

Release Series BC-1P21-005

ANTRIM COUNTY, MICH.

Retail, wholesale, and service establishments located in Antrim County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.1 million, an increase of 294 percent over the \$1.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$945,000 in 1948 as compared with \$399,000 in 1939. The service trades included in the Census of Business recorded receipts totaling \$143,000 in 1948 compared with \$31,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 354 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 138 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Antrim County, Michigan. Final figures, superseding the preliminary data for Antrim County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Antrim County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

ARENAC COUNTY, MICH.

Retail, wholesale, and service establishments located in Arenac County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.9 million, an increase of 259 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.7 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$247,000 in 1948 compared with \$43,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 424 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 250 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Arenac County, Michigan. Final figures, superseding the preliminary data for Arenac County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Arenac County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BARAGA COUNTY, MICH.

Retail, wholesale, and service establishments located in Baraga County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.5 million, an increase of 162 percent over the \$2.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.2 million in 1948 as compared with \$0.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$125,000 in 1948 compared with \$22,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 302 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 209 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Baraga County, Michigan, which also includes data for the city of L'Anse. Final figures, superseding the preliminary data for Baraga County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Baraga County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BARRY COUNTY, MICH.

Retail, wholesale, and service establishments located in Barry County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.9 million, an increase of 273 percent over the \$4.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.3 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$631,000 in 1948 compared with \$111,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 848 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 534 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Barry County, Michigan, which also includes data for the city of Hastings. Final figures, superseding the preliminary data for Barry County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Barry County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 27, 1950

Release Series BC-1P- 21-009

BAY COUNTY, MICH.

Retail, wholesale, and service establishments located in Bay County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$87.8 million, an increase of 260 percent over the \$24.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$55.6 million in 1948 as compared with \$16.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.1 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 5,504 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 3,753 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Bay County, Michigan, which also includes data for Bay City. Final figures, superseding the preliminary data for Bay County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Bay County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

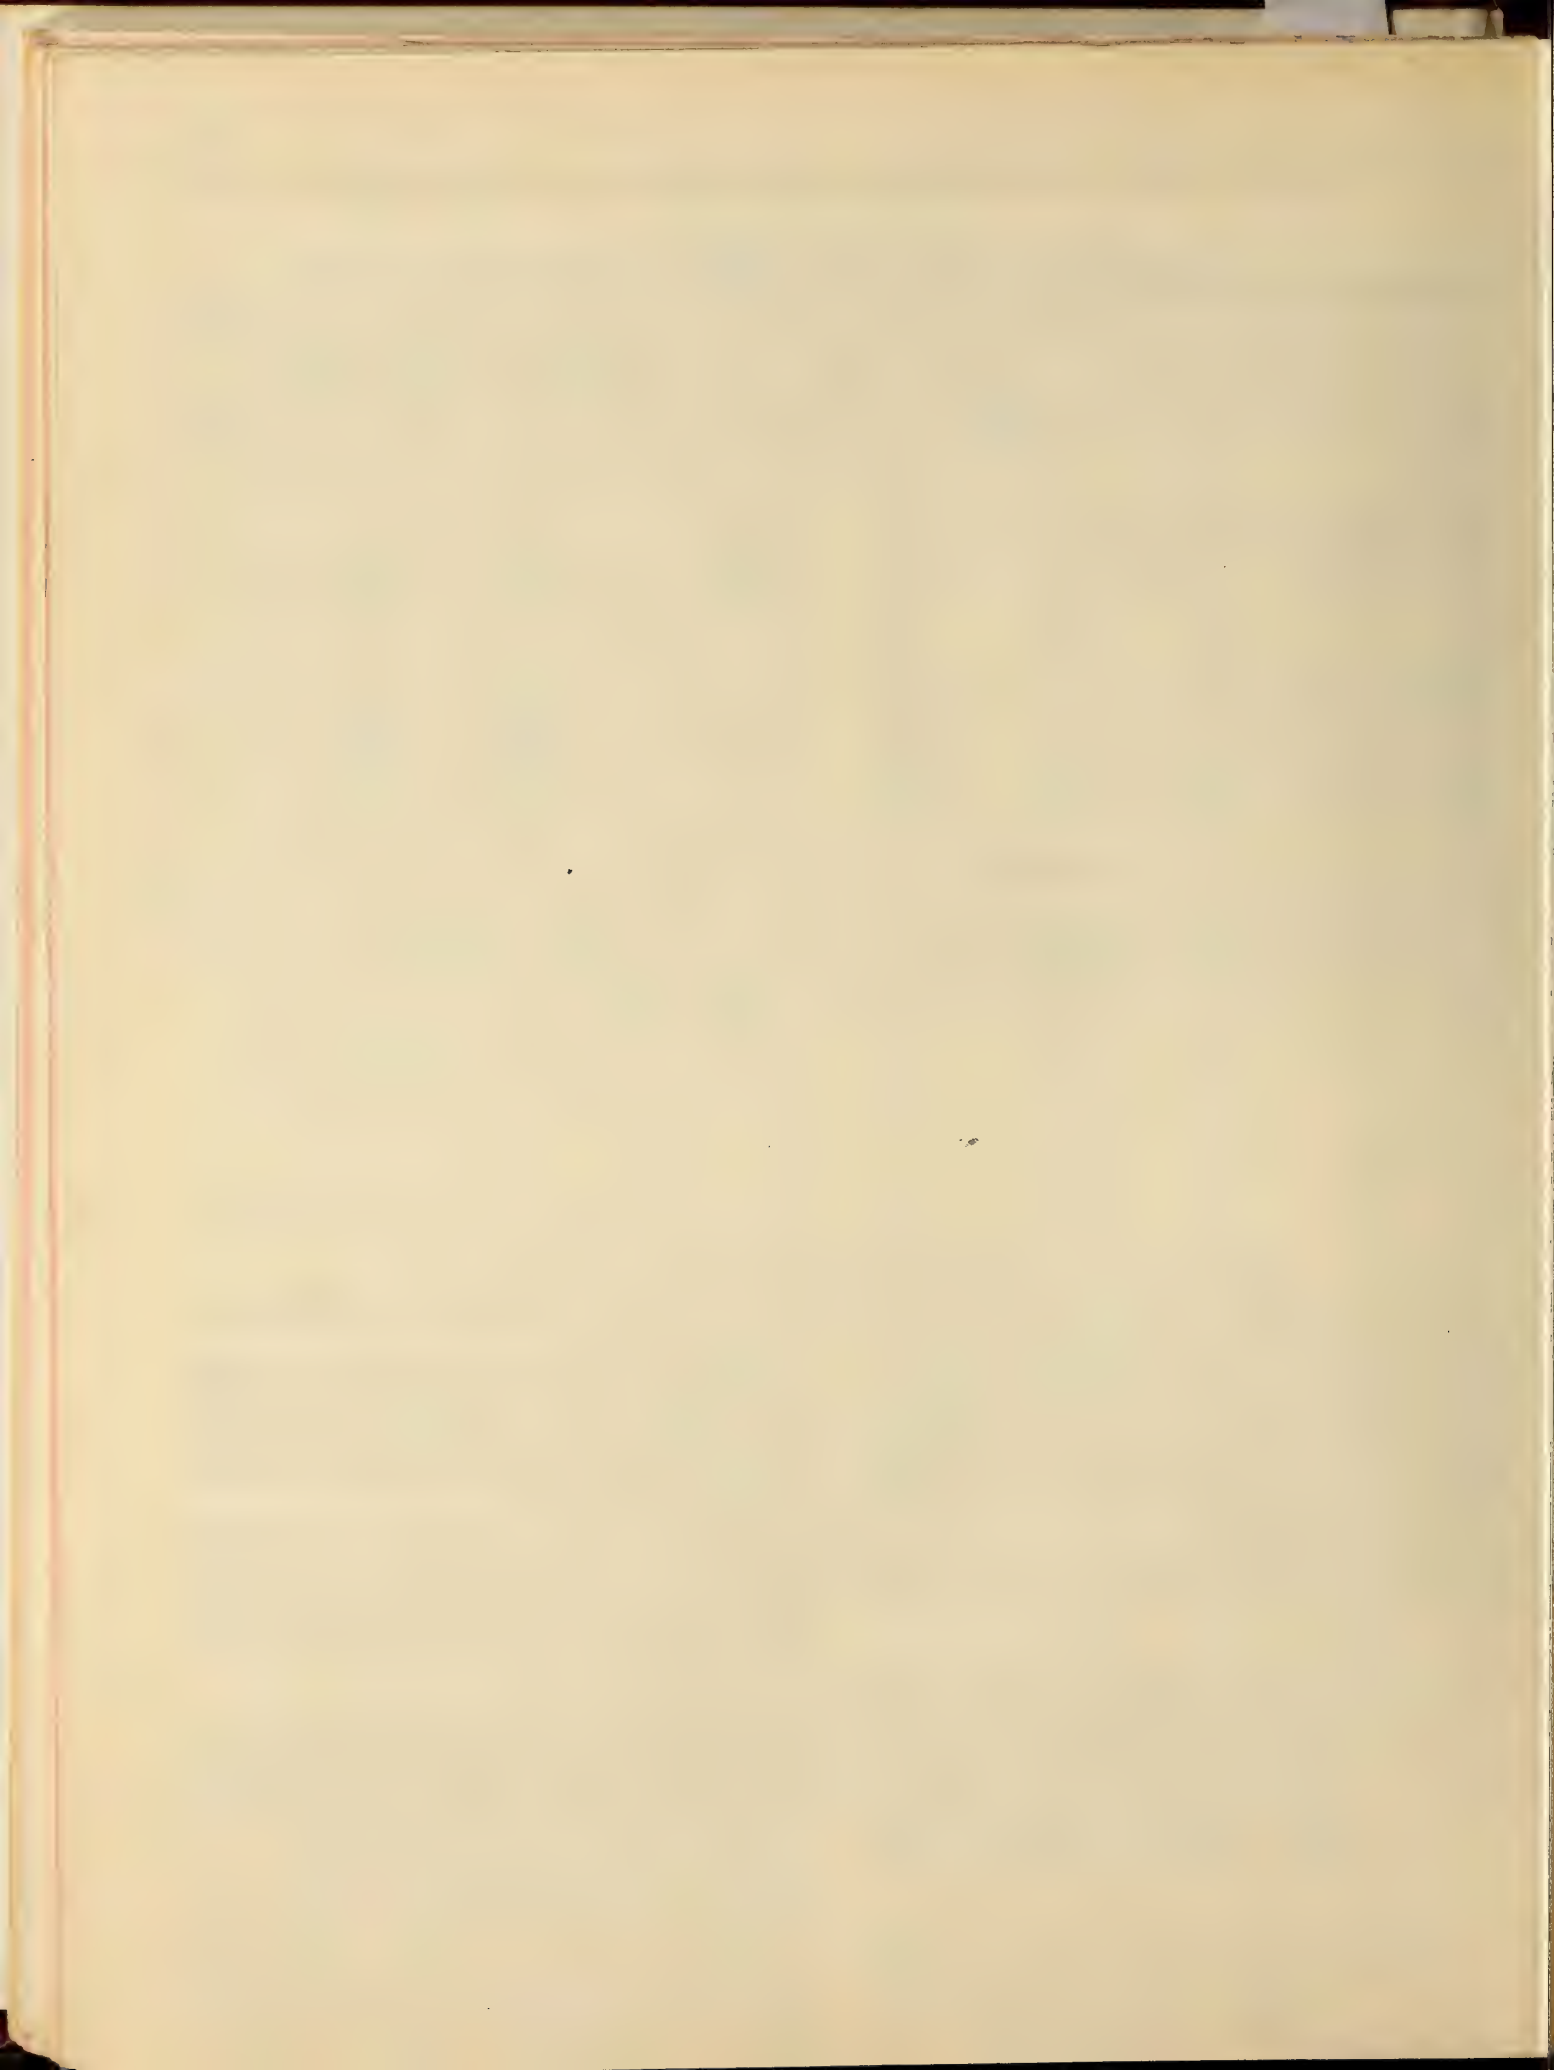

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-010

BENZIE COUNTY, MICH.

Retail, wholesale, and service establishments located in Benzie County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.5 million, an increase of 210 percent over the \$2.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.2 million in 1948 as compared with \$0.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$188,000 in 1948 compared with \$76,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 299 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 208 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Benzie County, Michigan. Final figures, superseding the preliminary data for Benzie County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Benzie County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BERRIEN COUNTY, MICH.

Retail, wholesale, and service establishments located in Berrien County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$109.5 million, an increase of 247 percent over the \$31.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$47.8 million in 1948 as compared with \$13.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.1 million in 1948 compared with \$1.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 7,167 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 4,231 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Berrien County, Michigan, which also includes data for the cities of Benton Harbor, Buchanan, Niles, and St. Joseph. Final figures, superseding the preliminary data for Berrien County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Berrien County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

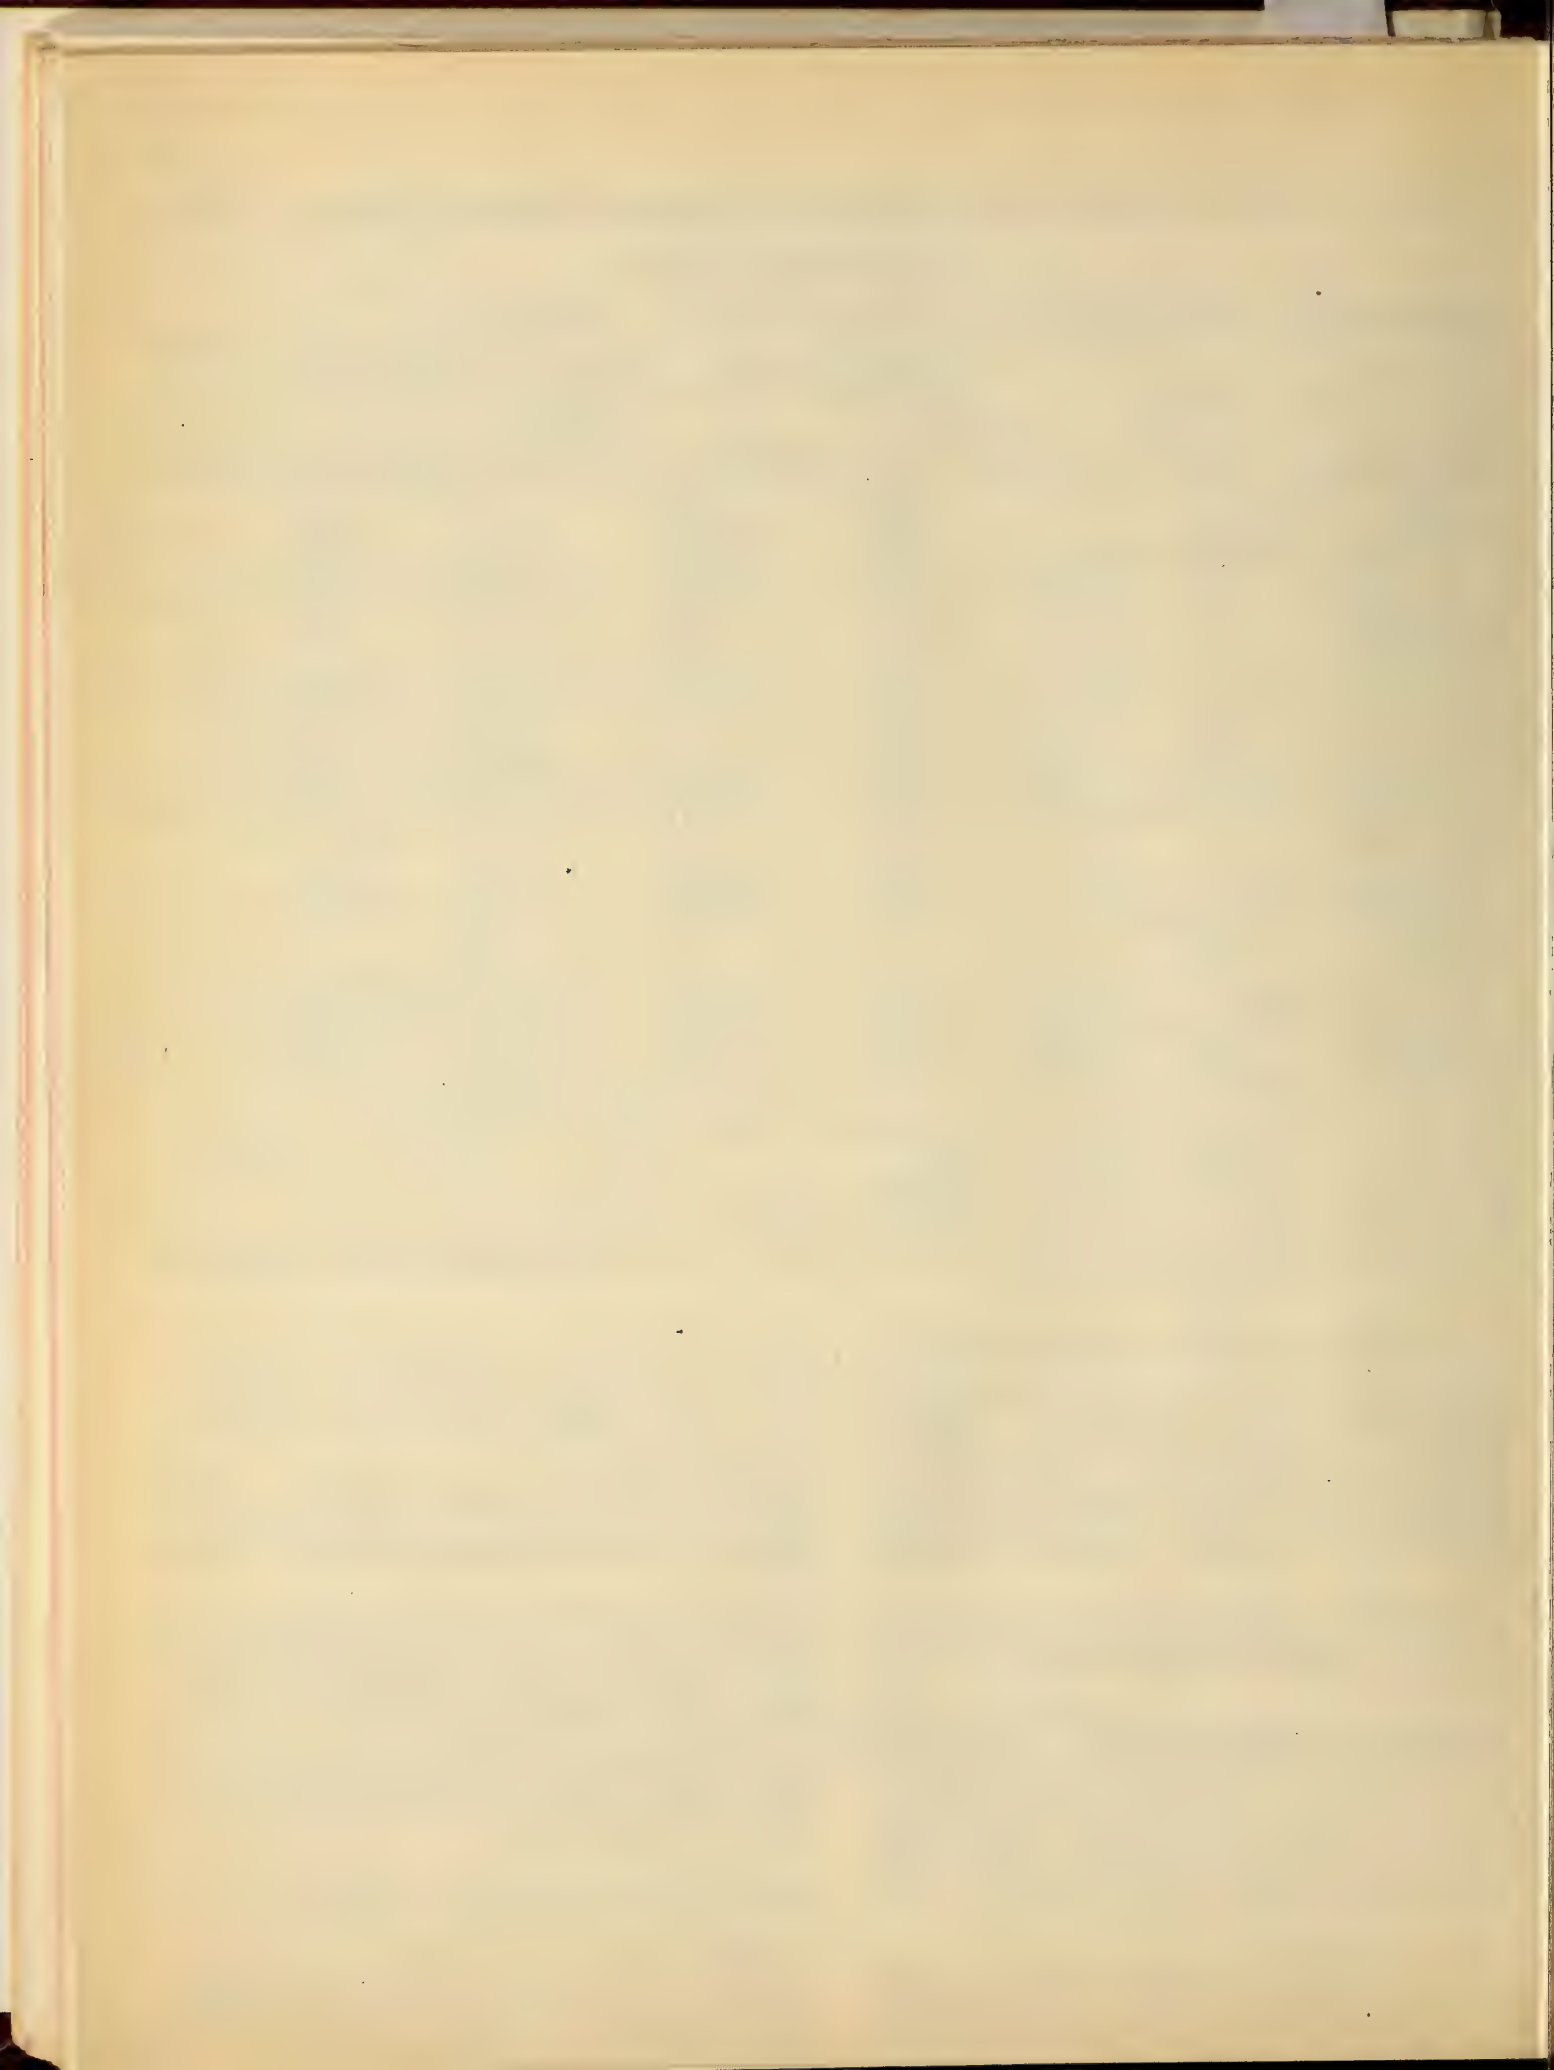

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

For Release May 15, 1950

Release Series BC-1P-21-012

BRANCH COUNTY, MICH.

Retail, wholesale, and service establishments located in Branch County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$24.6 million, an increase of 237 percent over the \$7.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.3 million in 1948 as compared with \$4.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$780,000 in 1948 compared with \$239,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,380 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 901 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Branch County, Michigan, which also includes data for the city of Coldwater. Final figures, superseding the preliminary data for Branch County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Branch County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 21-013

CALHOUN COUNTY, MICH.

Retail, wholesale, and service establishments located in Calhoun County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$112.0 million, an increase of 228 percent over the \$34.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$52.2 million in 1948 as compared with \$18.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.8 million in 1948 compared with \$1.9 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 7,418 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 5,266 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Calhoun County, Michigan, which also includes data for the cities of Albion, Battle Creek, and Marshall. Final figures, superseding the preliminary data for Calhoun County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Calhoun County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CASS COUNTY, MICH.

Retail, wholesale, and service establishments located in Cass County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$18.2 million, an increase of 264 percent over the \$5.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.2 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$558,000 in 1948 compared with \$129,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,163 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 569 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cass County, Michigan, which also includes data for the city of Dowagiac. Final figures, superseding the preliminary data for Cass County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cass County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P-21-015

CHARLEVOIX COUNTY, MICH.

Retail, wholesale, and service establishments located in Charlevoix County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.6 million, an increase of 182 percent over the \$3.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.2 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$220,000 in 1948 compared with \$135,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 542 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 301 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Charlevoix County, Michigan, which also includes data for Boyne City. Final figures, superseding the preliminary data for Charlevoix County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Charlevoix County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-21-016

CHEBOYGAN COUNTY, MICH.

Retail, wholesale, and service establishments located in Cheboygan County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.9 million, an increase of 240 percent over the \$3.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.2 million in 1948 as compared with \$1.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$304,000 in 1948 compared with \$124,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 770 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 404 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cheboygan County, Michigan, which also includes data for the city of Cheboygan. Final figures, superseding the preliminary data for Cheboygan County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cheboygan County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 26, 1950

Release Series BC-1P-21-017

CHIPPEWA COUNTY, MICH.

Retail, wholesale, and service establishments located in Chippewa County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.5 million, an increase of 208 percent over the \$8.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.6 million in 1948 as compared with \$4.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$979,000 in 1948 compared with \$398,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,729 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,288 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Chippewa County, Michigan, which also includes data for the city of Sault Sainte Marie. Final figures, superseding the preliminary data for Chippewa County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Chippewa County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-018

CLARE COUNTY, MICH.

Retail, wholesale, and service establishments located in Clare County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.7 million, an increase of 196 percent over the \$2.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.4 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$291,000 in 1948 compared with \$89,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 433 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 283 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Clare County, Michigan. Final figures, superseding the preliminary data for Clare County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Clare County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CLINTON COUNTY, MICH.

Retail, wholesale, and service establishments located in Clinton County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.0 million, an increase of 198 percent over the \$5.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.1 million in 1948 as compared with \$7.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$486,000 in 1948 compared with \$191,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 938 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 834 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Clinton County, Michigan, which also includes data for the city of St. Johns. Final figures, superseding the preliminary data for Clinton County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Clinton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 26, 1950

Release Series BC-1P- 21-020

CRAWFORD COUNTY, MICH.

Retail and service establishments located in Crawford County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.4 million, an increase of 127 percent over the \$1.5 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$83,000 in 1948 compared with \$39,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 203 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 174 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Crawford County, Michigan. Final figures, superseding the preliminary data for Crawford County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Crawford County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-21-021

DELTA COUNTY, MICH.

Retail, wholesale, and service establishments located in Delta County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.0 million, an increase of 160 percent over the \$10.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$16.7 million in 1948 as compared with \$6.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$707,000 in 1948 compared with \$375,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,851 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,347 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Delta County, Michigan, which also includes data for the cities of Escanaba and Gladstone. Final figures, superseding the preliminary data for Delta County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Delta County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release May 8, 1950

Release Series BC-1P-21-022

DICKINSON COUNTY, MICH.

Retail, wholesale, and service establishments located in Dickinson County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$22.4 million, an increase of 203 percent over the \$7.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.1 million in 1948 as compared with \$4.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$849,000 in 1948 compared with \$307,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,553 paid employees for the week ended nearest November 15, 1948. This compared with a total of 1,055 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Dickinson County, Michigan, which also includes data for the cities of Iron Mountain, Kingsford, and Norway. Final figures, superseding the preliminary data for Dickinson County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Dickinson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P-21-023

EATON COUNTY, MICH.

Retail, wholesale, and service establishments located in Eaton County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.7 million, an increase of 242 percent over the \$8.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.5 million in 1948 as compared with \$3.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.2 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,579 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 991 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Eaton County, Michigan, which also includes data for the cities of Charlotte, Eaton Rapids, and Grand Ledge. Final figures, superseding the preliminary data for Eaton County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Eaton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release May 8, 1950

Release Series BC-1P- 21-024

EMMET COUNTY, MICH.

Retail, wholesale, and service establishments located in Emmet County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.1 million, an increase of 196 percent over the \$6.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.4 million in 1948 as compared with \$2.3 in 1939. The service trades included in the Census of Business recorded receipts totaling \$680,000 in 1948 compared with \$278,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,109 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 783 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Emmet County, Michigan, which also includes data for the city of Petoskey. Final figures, superseding the preliminary data for Emmet County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Emmet County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release May 4, 1950

Release Series BC-1P- 21-025

GENESEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Genesee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$242.7 million, an increase of 185 percent over the \$85.3 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 72 percent rise over the same period, reaching a total of \$130.4 million in 1948 as compared with \$76.0 million in 1939. The service trades included in the Census of Business reported receipts totaling \$11.6 million in 1948 compared with \$4.3 million in 1939. Amusement businesses in the county recorded receipts of \$3.5 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 12,459 paid employees for the workweek ended nearest November 15, 1948. Of these, 9,656 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 9,333 and 7,250. Wholesale trade establishments reported a total of 3,804 full- and part-week employees for the week of November 15, 1948, compared with 2,171 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 1,730; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 1,240.

These preliminary figures have been derived from a Census report on Genesee County, Michigan. The report also contains data for the cities of Fenton and Flint.

Final figures, superseding the preliminary data for Genesee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Genesee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GLADWIN COUNTY, MICH.

Retail, wholesale, and service establishments located in Gladwin County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.6 million, an increase of 211 percent over the \$1.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.9 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$96,000 in 1948 compared with \$80,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 276 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 242 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Gladwin County, Michigan. Final figures, superseding the preliminary data for Gladwin County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Gladwin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release April 24, 1950

Release Series BC-1P- 21-027

GOGEBIC COUNTY, MICH.

Retail, wholesale, and service establishments located in Gogebic County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.3 million, an increase of 148 percent over the \$9.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.5 million in 1948 as compared with \$3.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$903,000 in 1948 compared with \$354,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,598 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,239 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Gogebic County, Michigan, which also includes data for the cities of Bessemer, Ironwood, and Wakefield. Final figures, superseding the preliminary data for Gogebic County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Gogebic County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release April 27, 1950

Release Series BC-1P-21-028

GRAND TRAVERSE COUNTY, MICH.

Retail, wholesale, and service establishments located in Grand Traverse County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$30.0 million, an increase of 226 percent over the \$9.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.3 million in 1948 as compared with \$2.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.4 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,046 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,173 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Grand Traverse County, Michigan, which also includes data for Traverse City. Final figures, superseding the preliminary data for Grand Traverse County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Grand Traverse County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P-21-029

GRATIOT COUNTY, MICH.

Retail, wholesale, and service establishments located in Gratiot County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.9 million, an increase of 210 percent over the \$9.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.2 million in 1948 as compared with \$4.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.2 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,655 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,272 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Gratiot County, Michigan, which also includes data for the cities of Alma and St. Louis. Final figures, superseding the preliminary data for Gratiot County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Gratiot County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release April 26, 1950

Release Series BC-1P-21-030

HILLSDALE COUNTY, MICH.

Retail, wholesale, and service establishments located in Hillsdale County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$24.2 million, an increase of 284 percent over the \$6.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.7 million in 1948 as compared with \$3.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.0 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,223 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 796 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Hillsdale County, Michigan, which also includes data for the city of Hillsdale. Final figures, superseding the preliminary data for Hillsdale County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hillsdale County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P- 21-031

HOUGHTON COUNTY, MICH.

Retail, wholesale, and service establishments located in Houghton County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$29.9 million, an increase of 135 percent over the \$12.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.9 million in 1948 as compared with \$6.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,160 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,900 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Houghton County, Michigan, which also includes data for the cities of Hancock, Houghton and Laurium. Final figures, superseding the preliminary data for Houghton County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Houghton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 22, 1950

Release Series BC-1P-21-032

HURON COUNTY, MICH.

Retail, wholesale, and service establishments located in Huron County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$28.5 million, an increase of 261 percent over the \$7.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$21.8 million in 1948 as compared with \$6.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$816,000 in 1948 compared with \$267,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,550 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,315 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Huron County, Michigan, which also includes data for the city of Bad Axe. Final figures, superseding the preliminary data for Huron County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Huron County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-21-033

INGHAM COUNTY, MICH.

Retail, wholesale, and service establishments located in Ingham County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$184.7 million, an increase of 235 percent over the \$55.2 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 311 percent rise over the same period, reaching a total of \$140.0 million in 1948 as compared with \$34.1 million in 1939. The service trades included in the Census of Business reported receipts totaling \$8.0 million in 1948 compared with \$2.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 10,311 paid employees for the workweek ended nearest November 15, 1948. Of these, 8,092 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 7,314 and 5,667. Wholesale trade establishments reported a total of 1,983 full- and part-week employees for the week of November 15, 1948, compared with 1,376 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 1,247; the comparable figure for 1939 adjusted for change in scope between the two Censuses, was 876.

These preliminary figures have been derived from a Census report on Ingham County, Michigan. The report also contains data for the cities of East Lansing, Lansing, and Mason.

Final figures, superseding the preliminary data for Ingham County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Ingham County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

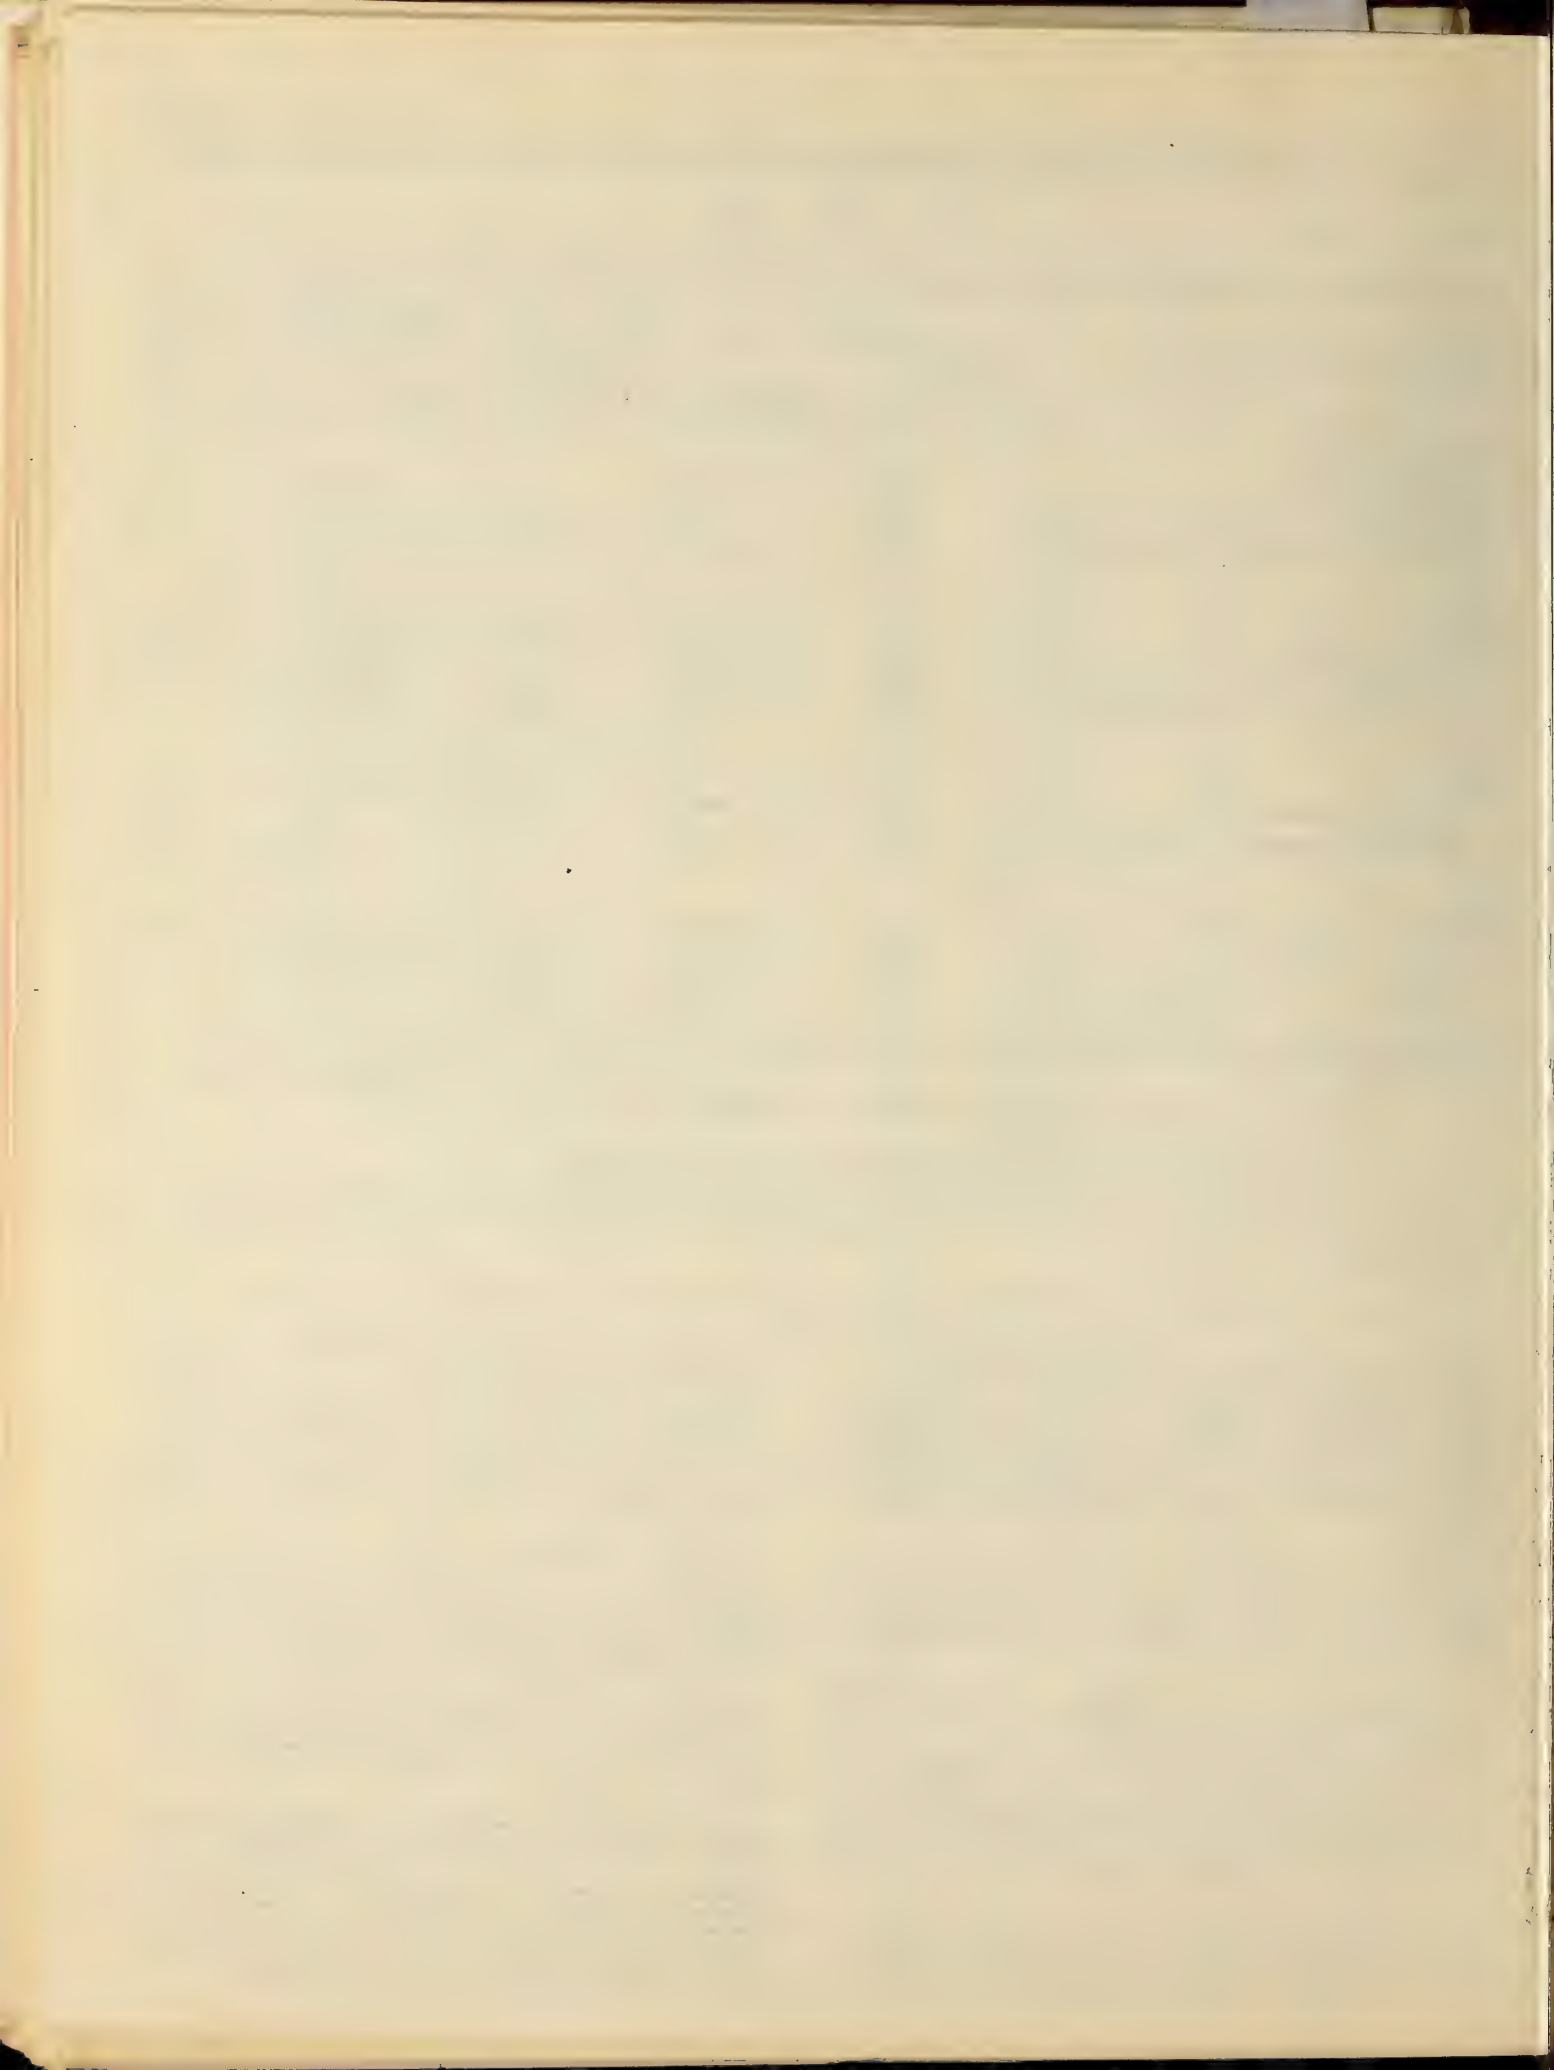

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

BUREAU OF THE CENSUS

For Release May 8, 1950

Release Series BC-1P-21-034

IONIA COUNTY, MICH.

Retail, wholesale, and service establishments located in Ionia County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.1 million, an increase of 227 percent over the \$8.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.6 million in 1948 as compared with \$2.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$775,000 in 1948 compared with \$271,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,530 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,008 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Ionia County, Michigan, which also includes data for the cities of Belding and Ionia. Final figures, superseding the preliminary data for Ionia County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Ionia County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

IOSCO COUNTY, MICH.

Retail, wholesale, and service establishments located in Iosco County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.3 million, an increase of 323 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.8 million in 1948 as compared with \$0.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$262,000 in 1948 compared with \$32,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 470 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 206 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Iosco County, Michigan. Final figures, superseding the preliminary data for Iosco County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Iosco County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

IRON COUNTY, MICH.

Retail, wholesale, and service establishments located in Iron County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.9 million, an increase of 212 percent over the \$5.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.3 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$431,000 in 1948 compared with \$135,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 918 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 580 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Iron County, Michigan, which also includes data for the cities of Crystal Falls and Iron River. Final figures, superseding the preliminary data for Iron County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Iron County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-21-037

ISABELLA COUNTY, MICH.

Retail, wholesale, and service establishments located in Isabella County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.3 million, an increase of 208 percent over the \$6.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.2 million in 1948 as compared with \$4.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$535,000 in 1948 compared with \$196,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,289 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 889 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Isabella County, Michigan, which also includes data for the city of Mount Pleasant. Final figures, superseding the preliminary data for Isabella County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Isabella County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-21-038

JACKSON COUNTY, MICH.

Retail, wholesale, and service establishments located in Jackson County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$104.6 million, an increase of 218 percent over the \$32.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$67.0 million in 1948 as compared with \$16.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.7 million in 1948 compared with \$2.0 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 7,496 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 5,447 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jackson County, Michigan, which also includes data for the city of Jackson. Final figures, superseding the preliminary data for Jackson County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jackson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-21-039

KALAMAZOO COUNTY, MICH.

Retail, wholesale, and service establishments located in Kalamazoo County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$122.7 million, an increase of 199 percent over the \$41.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$91.2 million in 1948 as compared with \$23.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$6.8 million in 1948 compared with \$2.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 9,276 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 6,483 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kalamazoo County, Michigan, which also includes data for the city of Kalamazoo. Final figures, superseding the preliminary data for Kalamazoo County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kalamazoo County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

KALKASKA COUNTY, MICH.

Retail and service establishments located in Kalkaska County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.4 million, an increase of 243 percent over the \$0.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$64,000 in 1948 compared with \$6,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 113 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 56 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kalkaska County, Michigan. Final figures, superseding the preliminary data for Kalkaska County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kalkaska County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P-21-041

KENT COUNTY, MICH.

Retail, wholesale, and service establishments located in Kent County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$295.0 million, an increase of 212 percent over the \$94.5 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 289 percent rise over the same period, reaching a total of \$352.4 million in 1948 as compared with \$90.7 million in 1939. The service trades included in the Census of Business reported receipts totaling \$19.6 million in 1948 compared with \$7.2 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 16,409 paid employees for the workweek ended nearest November 15, 1948. Of these, 12,869 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 11,511 and 9,067. Wholesale trade establishments reported a total of 5,261 full- and part-week employees for the week of November 15, 1948, compared with 3,789 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 2,917; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 2,463.

These preliminary figures have been derived from a Census report on Kent County, Michigan. The report also contains data for the cities of East Grand Rapids and Grand Rapids.

Final figures, superseding the preliminary data for Kent County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kent County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

KEWEENAW COUNTY, MICH.

Retail establishments located in Keweenaw County, Michigan, showed an expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$955,000, an increase of 68 per cent over the \$567,000 in 1939, when the preceding Census of Business was taken.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trade. Retail establishments reported a total of 46 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 41 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Keweenaw County, Michigan. Final figures, superseding the preliminary data for Keweenaw County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Keweenaw County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LAKE COUNTY, MICH.

Retail and service establishments located in Lake County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.9 million, an increase of 314 percent over the \$0.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$25,000 in 1948 compared with \$13,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 159 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 52 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lake County, Michigan. Final figures, superseding the preliminary data for Lake County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lake County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LAPEER COUNTY, MICH.

Retail, wholesale, and service establishments located in Lapeer County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$24.9 million, an increase of 236 percent over the \$7.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.8 million in 1948 as compared with \$1.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$960,000 in 1948 compared with \$293,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,206 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 756 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lapeer County, Michigan, which also includes data for the city of Lapeer. Final figures, superseding the preliminary data for Lapeer County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lapeer County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 27, 1950

Release Series BC-1P-21-045

LEELANAU COUNTY, MICH.

Retail, wholesale, and service establishments located in Leelanau County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.2 million, an increase of 223 percent over the \$1.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.5 million in 1948 as compared with \$0.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$132,000 in 1948 compared with \$44,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 195 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 110 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Leelanau County, Michigan. Final figures, superseding the preliminary data for Leelanau County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Leelanau County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 1, 1950

Release Series BC-1P- 21-046

LENAWEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Lenawee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$59.2 million, an increase of 270 percent over the \$16.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$30.0 million in 1948 as compared with \$5.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.2 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,444 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,002 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lenawee County, Michigan, which also includes data for the cities of Adrian and Tecumseh. Final figures, superseding the preliminary data for Lenawee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lenawee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

For Release April 27, 1950

Release Series BC-1P-21-047

LIVINGSTON COUNTY, MICH.

Retail, wholesale, and service establishments located in Livingston County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$21.5 million, an increase of 252 percent over the \$6.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.1 million in 1948 as compared with \$1.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$611,000 in 1948 compared with \$219,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,012 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 642 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Livingston County, Michigan, which also includes data for the city of Howell. Final figures, superseding the preliminary data for Livingston County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Livingston County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-048

LUCE COUNTY, MICH.

Retail, wholesale, and service establishments located in Luce County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.0 million, an increase of 163 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.8 million in 1948 as compared with \$0.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$113,000 in 1948 compared with \$35,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 347 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 227 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Luce County, Michigan, which also includes data for the city of Newberry. Final figures, superseding the preliminary data for Luce County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Luce County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P-21-049

MACKINAC COUNTY, MICH.

Retail, wholesale, and service establishments located in Mackinac County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.0 million, an increase of 218 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.8 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$210,000 in 1948 compared with \$46,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 508 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 258 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mackinac County, Michigan, which also includes data for the city of St. Ignace. Final figures, superseding the preliminary data for Mackinac County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mackinac County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 16 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 21-050

MACOMB COUNTY, MICH.

Retail, wholesale, and service establishments located in Macomb County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$121.5 million, an increase of 326 percent over the \$28.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$21.6 million in 1948 as compared with \$5.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$4.4 million in 1948 compared with \$0.9 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 5,881 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,994 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Macomb County, Michigan, which also includes data for the cities of Center Line, East Detroit, Mount Clemens, Romeo, Roseville, and St. Clair Shores. Final figures, superseding the preliminary data for Macomb County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Macomb County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-051

MANISTEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Manistee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.9 million, an increase of 167 percent over the \$5.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.2 million in 1948 as compared with \$1.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$543,000 in 1948 compared with \$152,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 898 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 630 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Manistee County, Michigan, which also includes data for the city of Manistee. Final figures, superseding the preliminary data for Manistee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Manistee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release May 1, 1950

Release Series BC-1P- 21-052

MARQUETTE COUNTY, MICH.

Retail, wholesale, and service establishments located in Marquette County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$36.2 million, an increase of 159 percent over the \$14.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$22.4 million in 1948 as compared with \$8.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,711 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,197 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Marquette County, Michigan, which also includes data for the cities of Ishpeming, Marquette, and Negaunee. Final figures, superseding the preliminary data for Marquette County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Marquette County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 8, 1950

Release Series BC-1P-21-053

MASON COUNTY, MICH.

Retail, wholesale, and service establishments located in Mason County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$19.5 million, an increase of 255 percent over the \$5.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$5.4 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$587,000 in 1948 compared with \$247,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,263 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 720 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mason County, Michigan, which also includes data for the city of Ludington. Final figures, superseding the preliminary data for Mason County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mason County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 24, 1950

Release Series BC-1P-21-054

MECOSTA COUNTY, MICH.

Retail, wholesale, and service establishments located in Mecosta County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.5 million, an increase of 229 percent over the \$4.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.4 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$412,000 in 1948 compared with \$189,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 832 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 566 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mecosta County, Michigan, which also includes data for the city of Big Rapids. Final figures, superseding the preliminary data for Mecosta County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mecosta County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-21-055

MENOMINEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Menominee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.8 million, an increase of 276 percent over the \$4.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.3 million in 1948 as compared with \$3.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$547,000 in 1948 compared with \$250,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,001 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 601 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Menominee County, Michigan, which also includes data for the city of Menominee. Final figures, superseding the preliminary data for Menominee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Menominee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-056

MIDLAND COUNTY, MICH.

Retail, wholesale, and service establishments located in Midland County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.3 million, an increase of 222 percent over the \$7.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.2 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$894,000 in 1948 compared with \$244,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,321 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 819 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Midland County, Michigan, which also includes data for the city of Midland. Final figures, superseding the preliminary data for Midland County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Midland County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

MISSAUKEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Missaukee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.4 million, an increase of 193 percent over the \$1.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.1 million in 1948 as compared with \$0.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$65,000 in 1948 compared with \$32,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 191 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 147 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Missaukee County, Michigan. Final figures, superseding the preliminary data for Missaukee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Missaukee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

MONROE COUNTY, MICH.

Retail, wholesale, and service establishments located in Monroe County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$56.6 million, an increase of 277 percent over the \$15.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$22.0 million in 1948 as compared with \$5.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.2 million in 1948 compared with \$0.6 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,071 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,754 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Monroe County, Michigan, which also includes data for the city of Monroe. Final figures, superseding the preliminary data for Monroe County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Monroe County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-059

MONTCALM COUNTY, MICH.

Retail, wholesale, and service establishments located in Montcalm County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$28.1 million, an increase of 296 percent over the \$7.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.3 million in 1948 as compared with \$4.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$714,000 in 1948 compared with \$256,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,496 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,022 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Montcalm County, Michigan, which also includes data for the city of Greenville. Final figures, superseding the preliminary data for Montcalm County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Montcalm County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-060

MONTMORENCY COUNTY, MICH.

Retail and service establishments located in Montmorency County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.5 million, an increase of 338 percent over the \$0.8 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$24,000 in 1948 compared with \$11,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 132 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 80 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Montmorency County, Michigan. Final figures, superseding the preliminary data for Montmorency County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Montmorency County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release May 1, 1950

Release Series BC-1P-21-061

MUSKEGON COUNTY, MICH.

Retail, wholesale, and service establishments located in Muskegon County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$116.5 million, an increase of 269 percent over the \$31.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$62.8 million in 1948 as compared with \$15.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$5.3 million in 1948 compared with \$1.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 7,741 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 4,633 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Muskegon County, Michigan, which also includes data for the cities of Muskegon and Muskegon Heights. Final figures, superseding the preliminary data for Muskegon County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Muskegon County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

NEWAYGO COUNTY, MICH.

Retail, wholesale, and service establishments located in Newaygo County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.6 million, an increase of 278 percent over the \$3.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.7 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$363,000 in 1948 compared with \$104,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 707 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 370 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Newaygo County, Michigan, which also includes data for the city of Fremont. Final figures, superseding the preliminary data for Newaygo County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Newaygo County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-063

OAKLAND COUNTY, MICH.

Retail, wholesale, and service establishments located in Oakland County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$313.9 million, an increase of 278 percent over the \$83.0 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 203 percent rise over the same period, reaching a total of \$88.2 million in 1948 as compared with \$29.1 million in 1939. The service trades included in the Census of Business reported receipts totaling \$12.7 million in 1948 compared with \$3.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 15,088 paid employees for the workweek ended nearest November 15, 1948. Of these, 11,479 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 8,323 and 6,437. Wholesale trade establishments reported a total of 1,542 full- and part-week employees for the week of November 15, 1948, compared with 895 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 1,856; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 940.

These preliminary figures have been derived from a Census report on Oakland County, Michigan. The report also contains data for the cities of Berkley, Birmingham, Clawson, Ferndale, Hazel Park, Pleasant Ridge, Pontiac, Rochester, and Royal Oak.

Final figures, superseding the preliminary data for Oakland County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Oakland County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-064

OCEANA COUNTY, MICH.

Retail, wholesale, and service establishments located in Oceana County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.6 million, an increase of 242 percent over the \$3.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.5 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$451,000 in 1948 compared with \$71,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 530 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 360 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Oceana County, Michigan. Final figures, superseding the preliminary data for Oceana County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Oceana County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

ONTONAGON COUNTY, MICH.

Retail, wholesale, and service establishments located in Ontonagon County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.2 million, an increase of 213 percent over the \$2.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.2 million in 1948 as compared with \$0.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$86,000 in 1948 compared with \$51,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 343 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 255 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Ontonagon County, Michigan. Final figures, superseding the preliminary data for Ontonagon County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Ontonagon County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 24, 1950

Release Series BC-1P-21-067

OSCEOLA COUNTY, MICH.

Retail, wholesale, and service establishments located in Osceola County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.7 million, an increase of 234 percent over the \$2.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.5 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$295,000 in 1948 compared with \$86,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 524 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 341 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Osceola County, Michigan. Final figures, superseding the preliminary data for Osceola County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Osceola County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

OSCODA COUNTY, MICH.

Retail establishments located in Oscoda County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$1.8 million, an increase of 260 percent over the \$0.5 million in 1939, when the preceding Census of Business was taken.

Employment in the county decreased over the 9-year period between 1939 and 1948 for the above trades. Retail establishments reported a total of 87 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 97 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Oscoda County, Michigan. Final figures, superseding the preliminary data for Oscoda County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Oscoda County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

OTSEGO COUNTY, MICH.

Retail, wholesale, and service establishments located in Otsego County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.5 million, an increase of 206 percent over the \$1.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.2 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$115,000 in 1948 compared with \$50,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 290 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 187 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Otsego County, Michigan. Final figures, superseding the preliminary data for Otsego County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Otsego County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 26, 1950

Release Series BC-1P-21-070

OTTAWA COUNTY, MICH.

Retail, wholesale, and service establishments located in Ottawa County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$62.5 million, an increase of 238 percent over the \$18.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$30.8 million in 1948 as compared with \$6.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.3 million in 1948 compared with \$0.6 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,601 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,211 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Ottawa County, Michigan, which also includes data for the cities of Grand Haven, Holland, and Zeeland. Final figures, superseding the preliminary data for Ottawa County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Ottawa County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-071

PRESQUE ISLE COUNTY, MICH.

Retail, wholesale, and service establishments located in Presque Isle County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.8 million, an increase of 225 percent over the \$2.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.7 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$278,000 in 1948 compared with \$73,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 338 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 241 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Presque Isle County, Michigan, which also includes data for Rogers City. Final figures, superseding the preliminary data for Presque Isle County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. a single copy of the preliminary release for Presque Isle County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

ROSCOMMON COUNTY, MICH.

Retail and service establishments located in Roscommon County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.9 million, an increase of 393 percent over the \$1.4 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$109,000 in 1948 compared with \$20,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 407 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 143 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Roscommon County, Michigan. Final figures, superseding the preliminary data for Roscommon County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Roscommon County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-073

SAGINAW COUNTY, MICH.

Retail, wholesale, and service establishments located in Saginaw County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$131.8 million, an increase of 200 percent over the \$44.0 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 219 percent rise over the same period, reaching a total of \$132.7 million in 1948 as compared with \$41.6 million in 1939. The service trades included in the Census of Business reported receipts totaling \$6.4 million in 1948 compared with \$2.2 million in 1939. Amusement businesses in the county recorded receipts of \$1.9 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 6,977 paid employees for the workweek ended nearest November 15, 1948. Of these, 5,272 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 5,492 and 4,137. Wholesale trade establishments reported a total of 2,774 full- and part-week employees for the week of November 15, 1948, compared with 1,886 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 1,023; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 679.

These preliminary figures have been derived from a Census report on Saginaw County, Michigan. The report also contains data for the city of Saginaw.

Final figures, superseding the preliminary data for Saginaw County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Saginaw County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

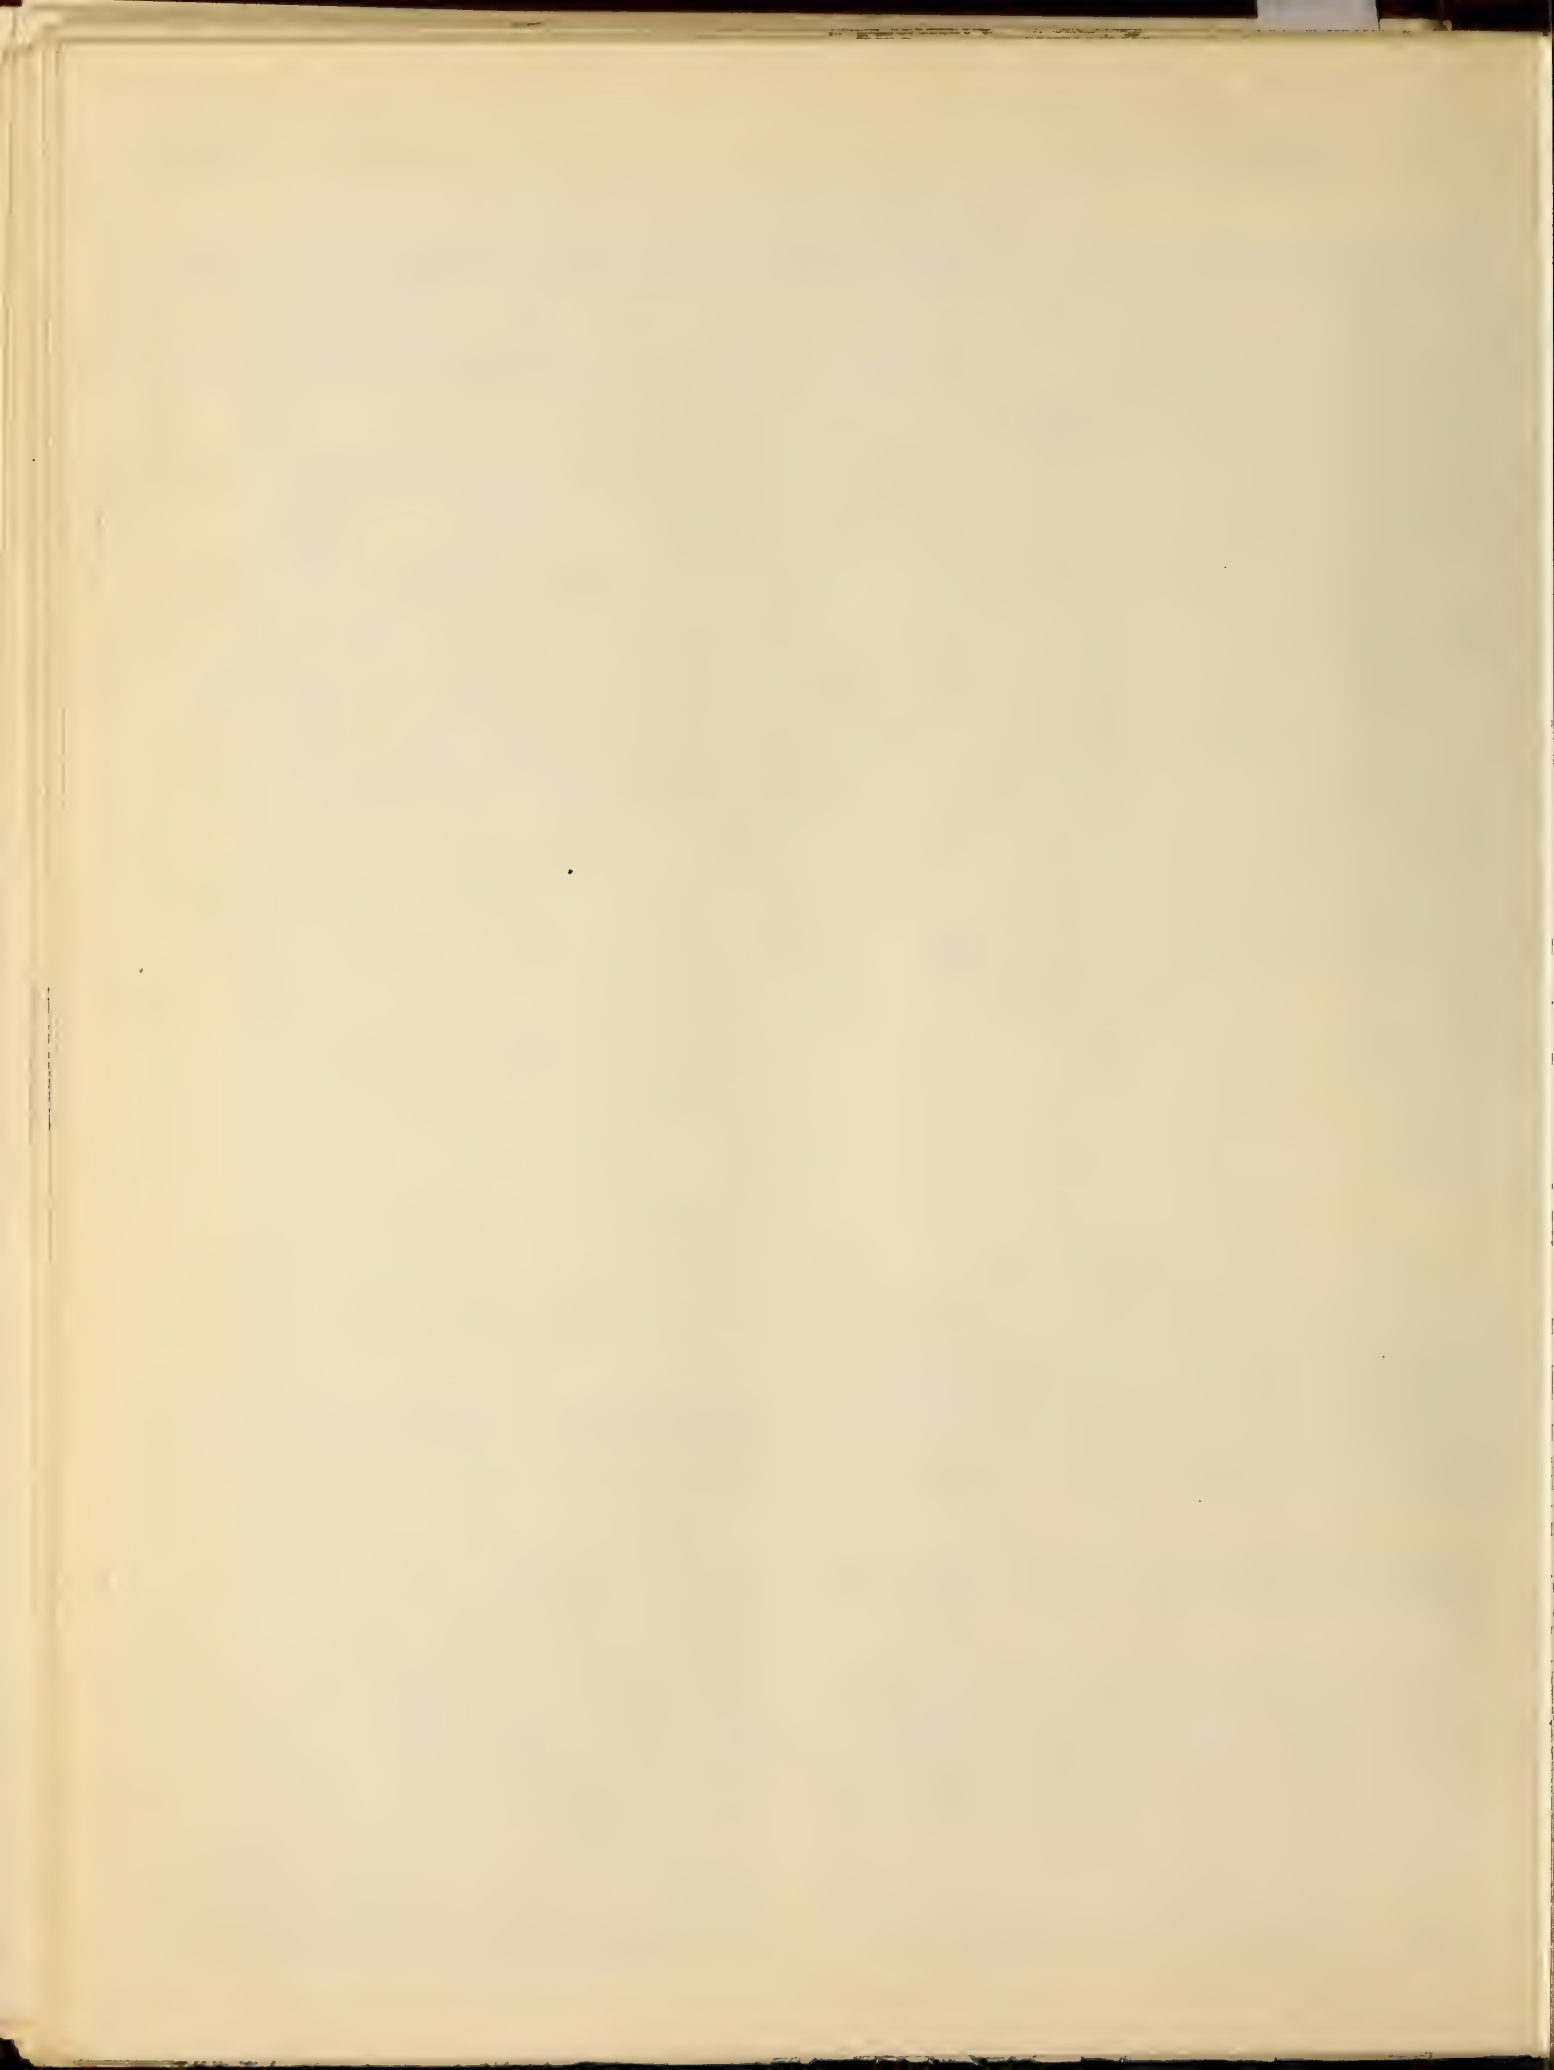

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-074

ST. CLAIR COUNTY, MICH.

Retail, wholesale, and service establishments located in St. Clair County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$82.8 million, an increase of 217 percent over the \$26.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$99.6 million in 1948 as compared with \$18.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.1 million in 1948 compared with \$1.2 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 8,303 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 4,405 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on St. Clair County, Michigan, which also includes data for Marine City, Port Huron, and St. Clair. Final figures, superseding the preliminary data for St. Clair County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for St. Clair County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 27, 1950

Release Series BC-1P-21-075

ST. JOSEPH COUNTY, MICH.

Retail, wholesale, and service establishments located in St. Joseph County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$33.2 million, an increase of 222 percent over the \$10.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$18.8 million in 1948 as compared with \$4.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,016 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,387 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on St. Joseph County, Michigan, which also includes data for the cities of Sturgis and Three Rivers. Final figures, superseding the preliminary data for St. Joseph County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for St. Joseph County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-21-076

SANILAC COUNTY, MICH.

Retail, wholesale, and service establishments located in Sanilac County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.5 million, an increase of 246 percent over the \$6.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.7 million in 1948 as compared with \$3.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$809,000 in 1948 compared with \$196,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,075 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 686 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Sanilac County, Michigan. Final figures, superseding the preliminary data for Sanilac County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Sanilac County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BUREAU OF THE CENSUS

For Release May 1, 1950

Release Series BC-1P-21-078

SHIAWASSEE COUNTY, MICH.

Retail, wholesale, and service establishments located in Shiawassee County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$38.2 million, an increase of 203 percent over the \$12.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.2 million in 1948 as compared with \$5.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.3 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,383 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,799 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Shiawassee County, Michigan, which also includes data for the cities of Durand and Owosso. Final figures, superseding the preliminary data for Shiawassee County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Shiawassee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 1, 1950

Release Series BC-1P-20-079

TUSCOLA COUNTY, MICH.

Retail, wholesale, and service establishments located in Tuscola County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.8 million, an increase of 202 percent over the \$9.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.4 million in 1948 as compared with \$5.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$746,000 in 1948 compared with \$370,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,465 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,188 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tuscola County, Michigan, which also includes data for the city of Caro. Final figures, superseding the preliminary data for Tuscola County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tuscola County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 21-080

VAN BUREN COUNTY, MICH.

Retail, wholesale, and service establishments located in Van Buren County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$32.3 million, an increase of 208 percent over the \$10.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.3 million in 1948 as compared with \$4.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.2 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,684 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,193 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Van Buren County, Michigan, which also includes data for the city of South Haven. Final figures, superseding the preliminary data for Van Buren County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Van Buren County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-21-081

WASHTENAW COUNTY, MICH.

Retail, wholesale, and service establishments located in Washtenaw County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$125.5 million, an increase of 251 percent over the \$35.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$44.2 million in 1948 as compared with \$9.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$6.2 million in 1948 compared with \$2.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 8,878 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 5,576 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Washtenaw County, Michigan, which also includes data for the cities of Ann Arbor and Ypsilanti. Final figures, superseding the preliminary data for Washtenaw County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Washtenaw County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

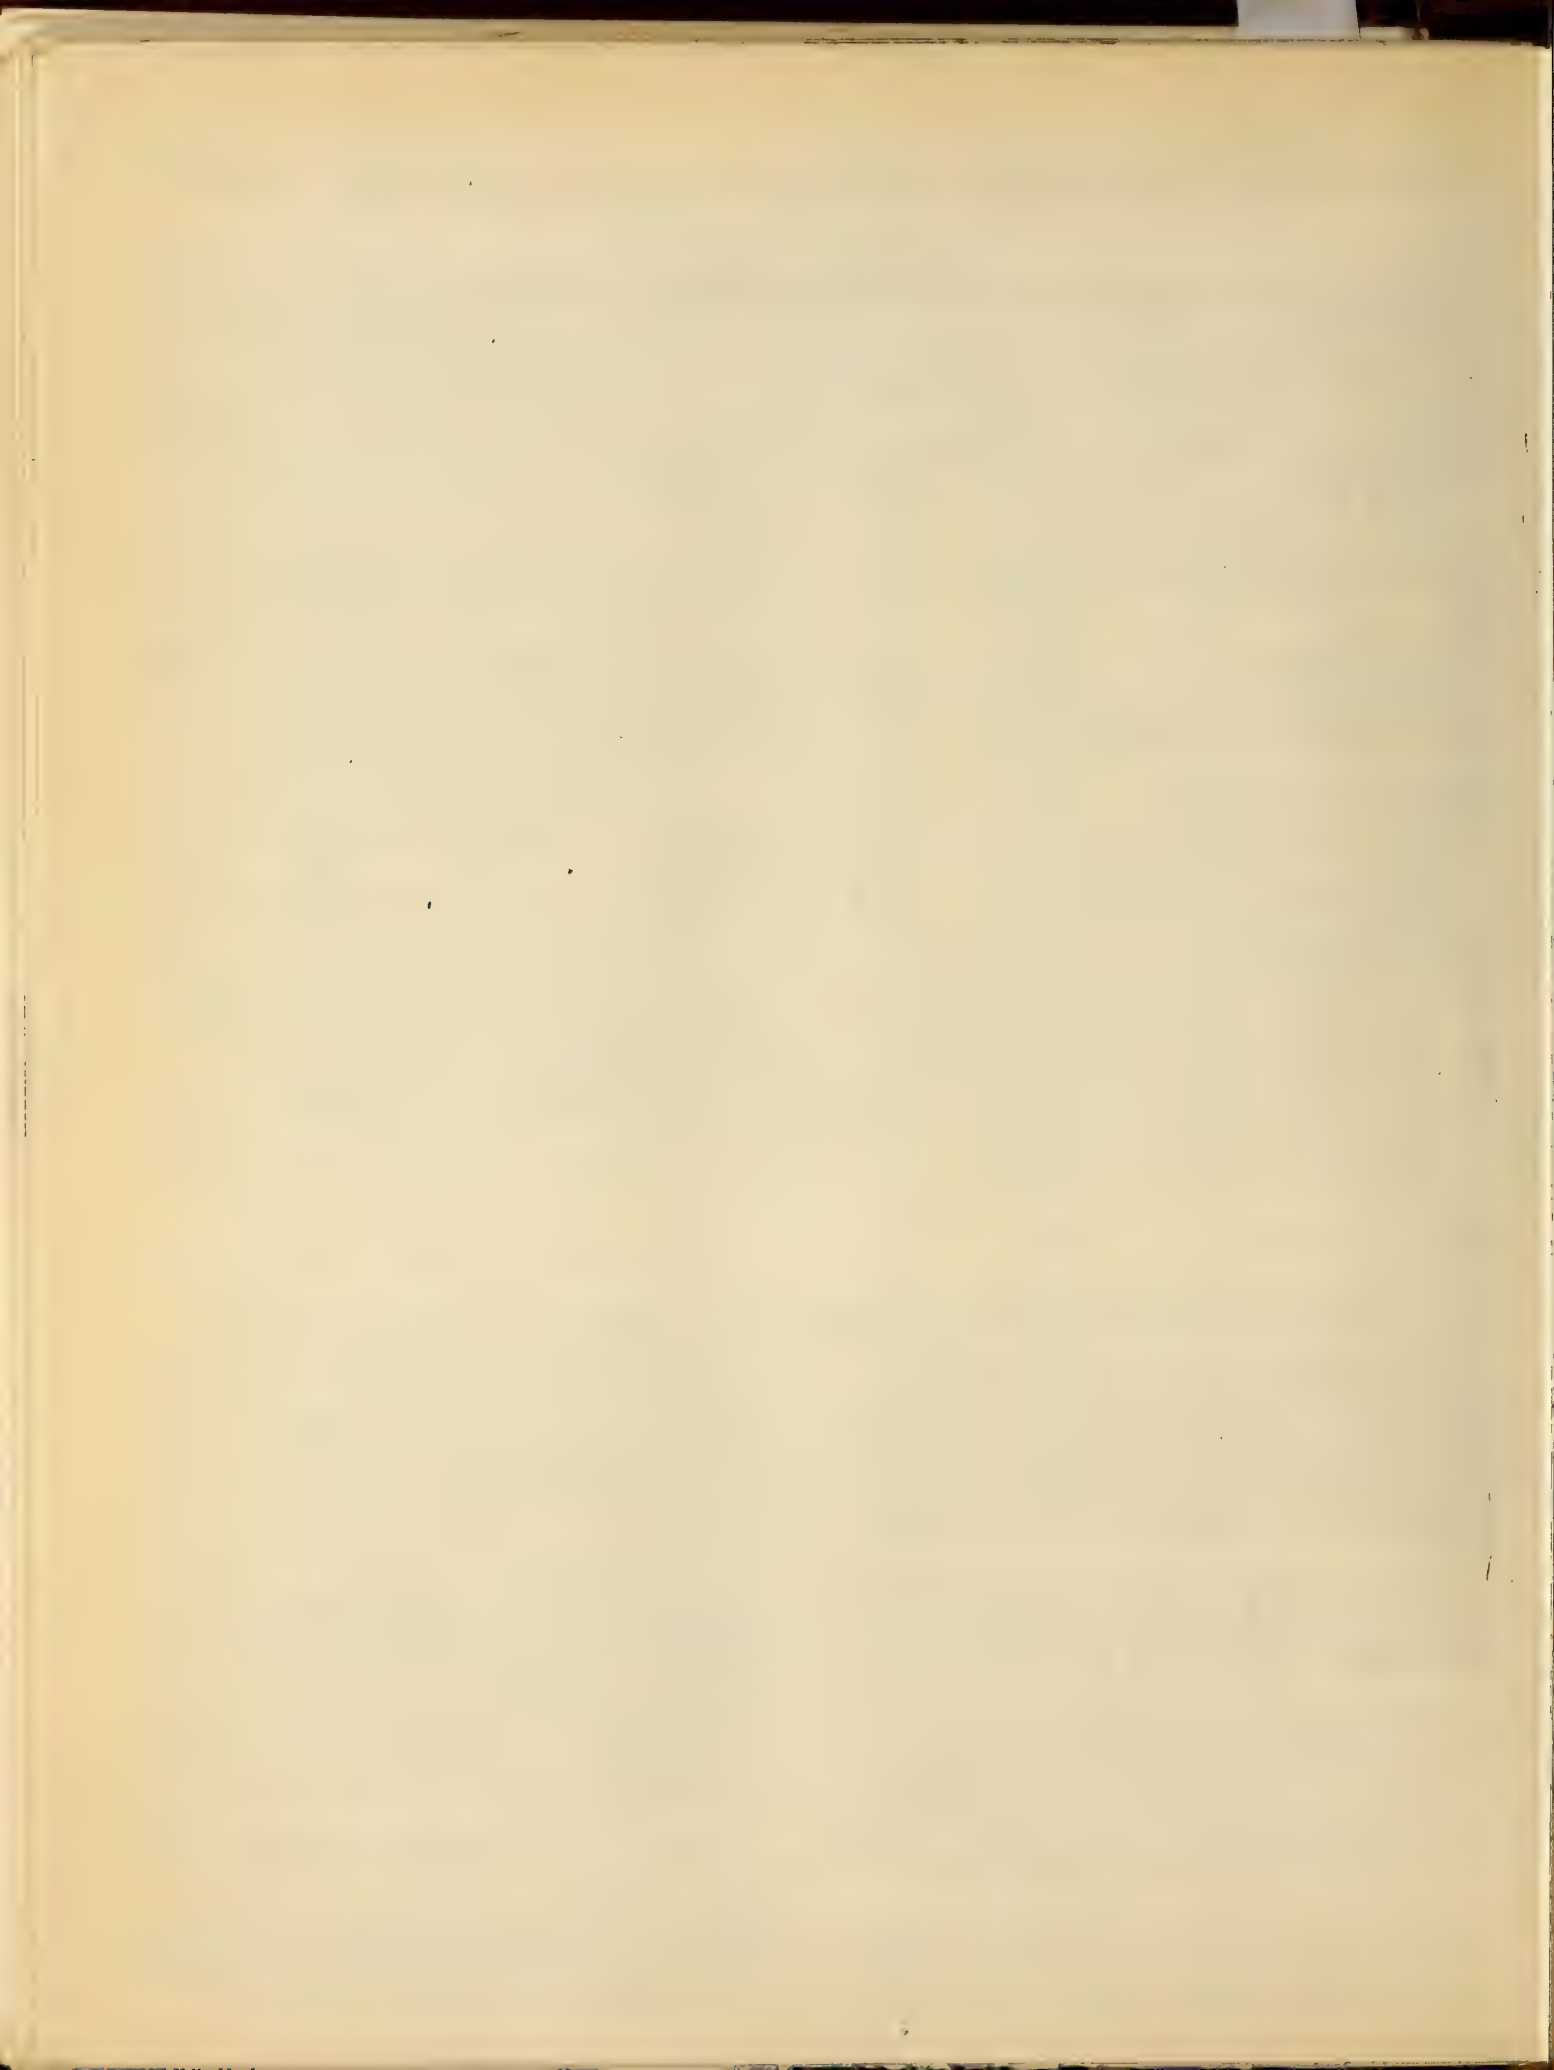

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P-21-082

WAYNE COUNTY, MICH.

Retail, wholesale, and service establishments located in Wayne County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2,566,600,000, an increase of 224 percent over the \$792,900,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 237 percent rise over the same period, reaching a total of \$4,569,500,000 in 1948 as compared with \$1,357,200,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$218,000,000 in 1948 compared with \$75,300,000 in 1939. Hotel receipts moved from \$14,800,000 in 1939 to \$29,200,000 in 1948. Amusement businesses in the county recorded receipts of \$48,600,000 in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 138,126 paid employees for the workweek ended nearest November 15, 1948. Of these, 111,645 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 97,882 and 80,611. Wholesale trade establishments reported a total of 47,086 full- and part-week employees for the week of November 15, 1948, compared with 29,158 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 34,772; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 22,504.

These preliminary figures have been derived from a Census report on Wayne County, Michigan. The report also contains data for twenty cities of 2,500 inhabitants or more located in Wayne County.

Final figures, superseding the preliminary data for Wayne County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wayne County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 22, 1950

Release Series BC-1P- 21-083

WEXFORD COUNTY, MICH.

Retail, wholesale, and service establishments located in Wexford County, Michigan, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$16.4 million, an increase of 193 percent over the \$5.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.1 million in 1948 as compared with \$3.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$406,000 in 1948 compared with \$210,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,085 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 816 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wexford County, Michigan, which also includes data for the city of Cadillac. Final figures, superseding the preliminary data for Wexford County, will be included in a Bulletin for the State of Michigan to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wexford County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 29, 1950

Release Series BC-1P- 22-000

MINNESOTA

Retail, wholesale, and service establishments located in Minnesota showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the State during 1948 aggregated \$2,896,600,000, an increase of 185 percent over the \$1,017,200,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the State showed a 238 percent rise over the same period, reaching a total of \$4,934,400,000 in 1948 as compared with \$1,458,200,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$133,800,000 in 1948 compared with \$53,100,000 in 1939. Hotel receipts moved from \$19,000,000 in 1939 to \$39,200,000 in 1948. Amusement businesses in the State recorded receipts of \$35,800,000 in 1948 compared with \$16,300,000 in 1939.

Employment in the State also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 152,939 paid employees for the workweek ended nearest November 15, 1948. Of these, 117,985 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 109,539 and 86,635. Wholesale trade establishments reported a total of 52,838 full- and part-week employees for the week of November 15, 1948, compared with 39,002 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 19,313; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 15,112.

These preliminary figures have been compiled from similar releases being made available for each county in Minnesota. Final figures, superseding the preliminary data for Minnesota will be included in a State Bulletin to be issued in several months. Similar data will be made available in preliminary and final form for each of the States.

A single copy of the preliminary release for the State of Minnesota as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

AITKIN COUNTY, MINN.

Retail, wholesale, and service establishments located in Aitkin County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.5 million, an increase of 166 percent over the \$3.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.3 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$224,000 in 1948 compared with \$111,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 521 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 303 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Aitkin County, Minnesota. Final figures, superseding the preliminary data for Aitkin County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Aitkin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-002

ANOKA COUNTY, MINN.

Retail, wholesale, and service establishments located in Anoka County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.4 million, an increase of 212 percent over the \$4.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.8 million in 1948 as compared with \$0.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$467,000 in 1948 compared with \$145,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 753 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 489 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Anoka County, Minnesota, which also includes data for the cities of Anoka and Columbia Heights. Final figures, superseding the preliminary data for Anoka County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Anoka County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BECKER COUNTY, MINN.

Retail, wholesale, and service establishments located in Becker County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$16.0 million, an increase of 196 percent over the \$5.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.9 million in 1948 as compared with \$2.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$395,000 in 1948 compared with \$157,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 897 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 593 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Becker County, Minnesota, which also includes data for the city of Detroit Lakes. Final figures, superseding the preliminary data for Becker County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Becker County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 27, 1950

Release Series BC-1P-22-004

BELTRAMI COUNTY, MINN.

Retail, wholesale, and service establishments located in Beltrami County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.1 million, an increase of 168 percent over the \$7.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.2 million in 1948 as compared with \$4.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$666,000 in 1948 compared with \$261,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,246 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 952 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Beltrami County, Minnesota, which also includes data for the city of Bemidji. Final figures, superseding the preliminary data for Beltrami County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Beltrami County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-005

BENTON COUNTY, MINN.

Retail, wholesale, and service establishments located in Benton County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.6 million, an increase of 232 percent over the \$3.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.5 million in 1948 as compared with \$3.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$485,000 in 1948 compared with \$99,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 643 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 444 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Benton County, Minnesota, which also includes data for the cities of St. Cloud and Sauk Rapids. Final figures, superseding the preliminary data for Benton County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Benton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BIG STONE COUNTY, MINN.

Retail, wholesale, and service establishments located in Big Stone County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.6 million, an increase of 186 percent over the \$3.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.3 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$283,000 in 1948 compared with \$79,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 577 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 428 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Big Stone County, Minnesota. Final figures, superseding the preliminary data for Big Stone County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Big Stone County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

BLUE EARTH COUNTY, MINN.

Retail, wholesale, and service establishments located in Blue Earth County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$48.9 million, an increase of 202 percent over the \$16.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$51.5 million in 1948 as compared with \$13.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.7 million in 1948 compared with \$0.9 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,374 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,433 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Blue Earth County, Minnesota, which also includes data for the city of Mankato. Final figures, superseding the preliminary data for Blue Earth County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Blue Earth County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

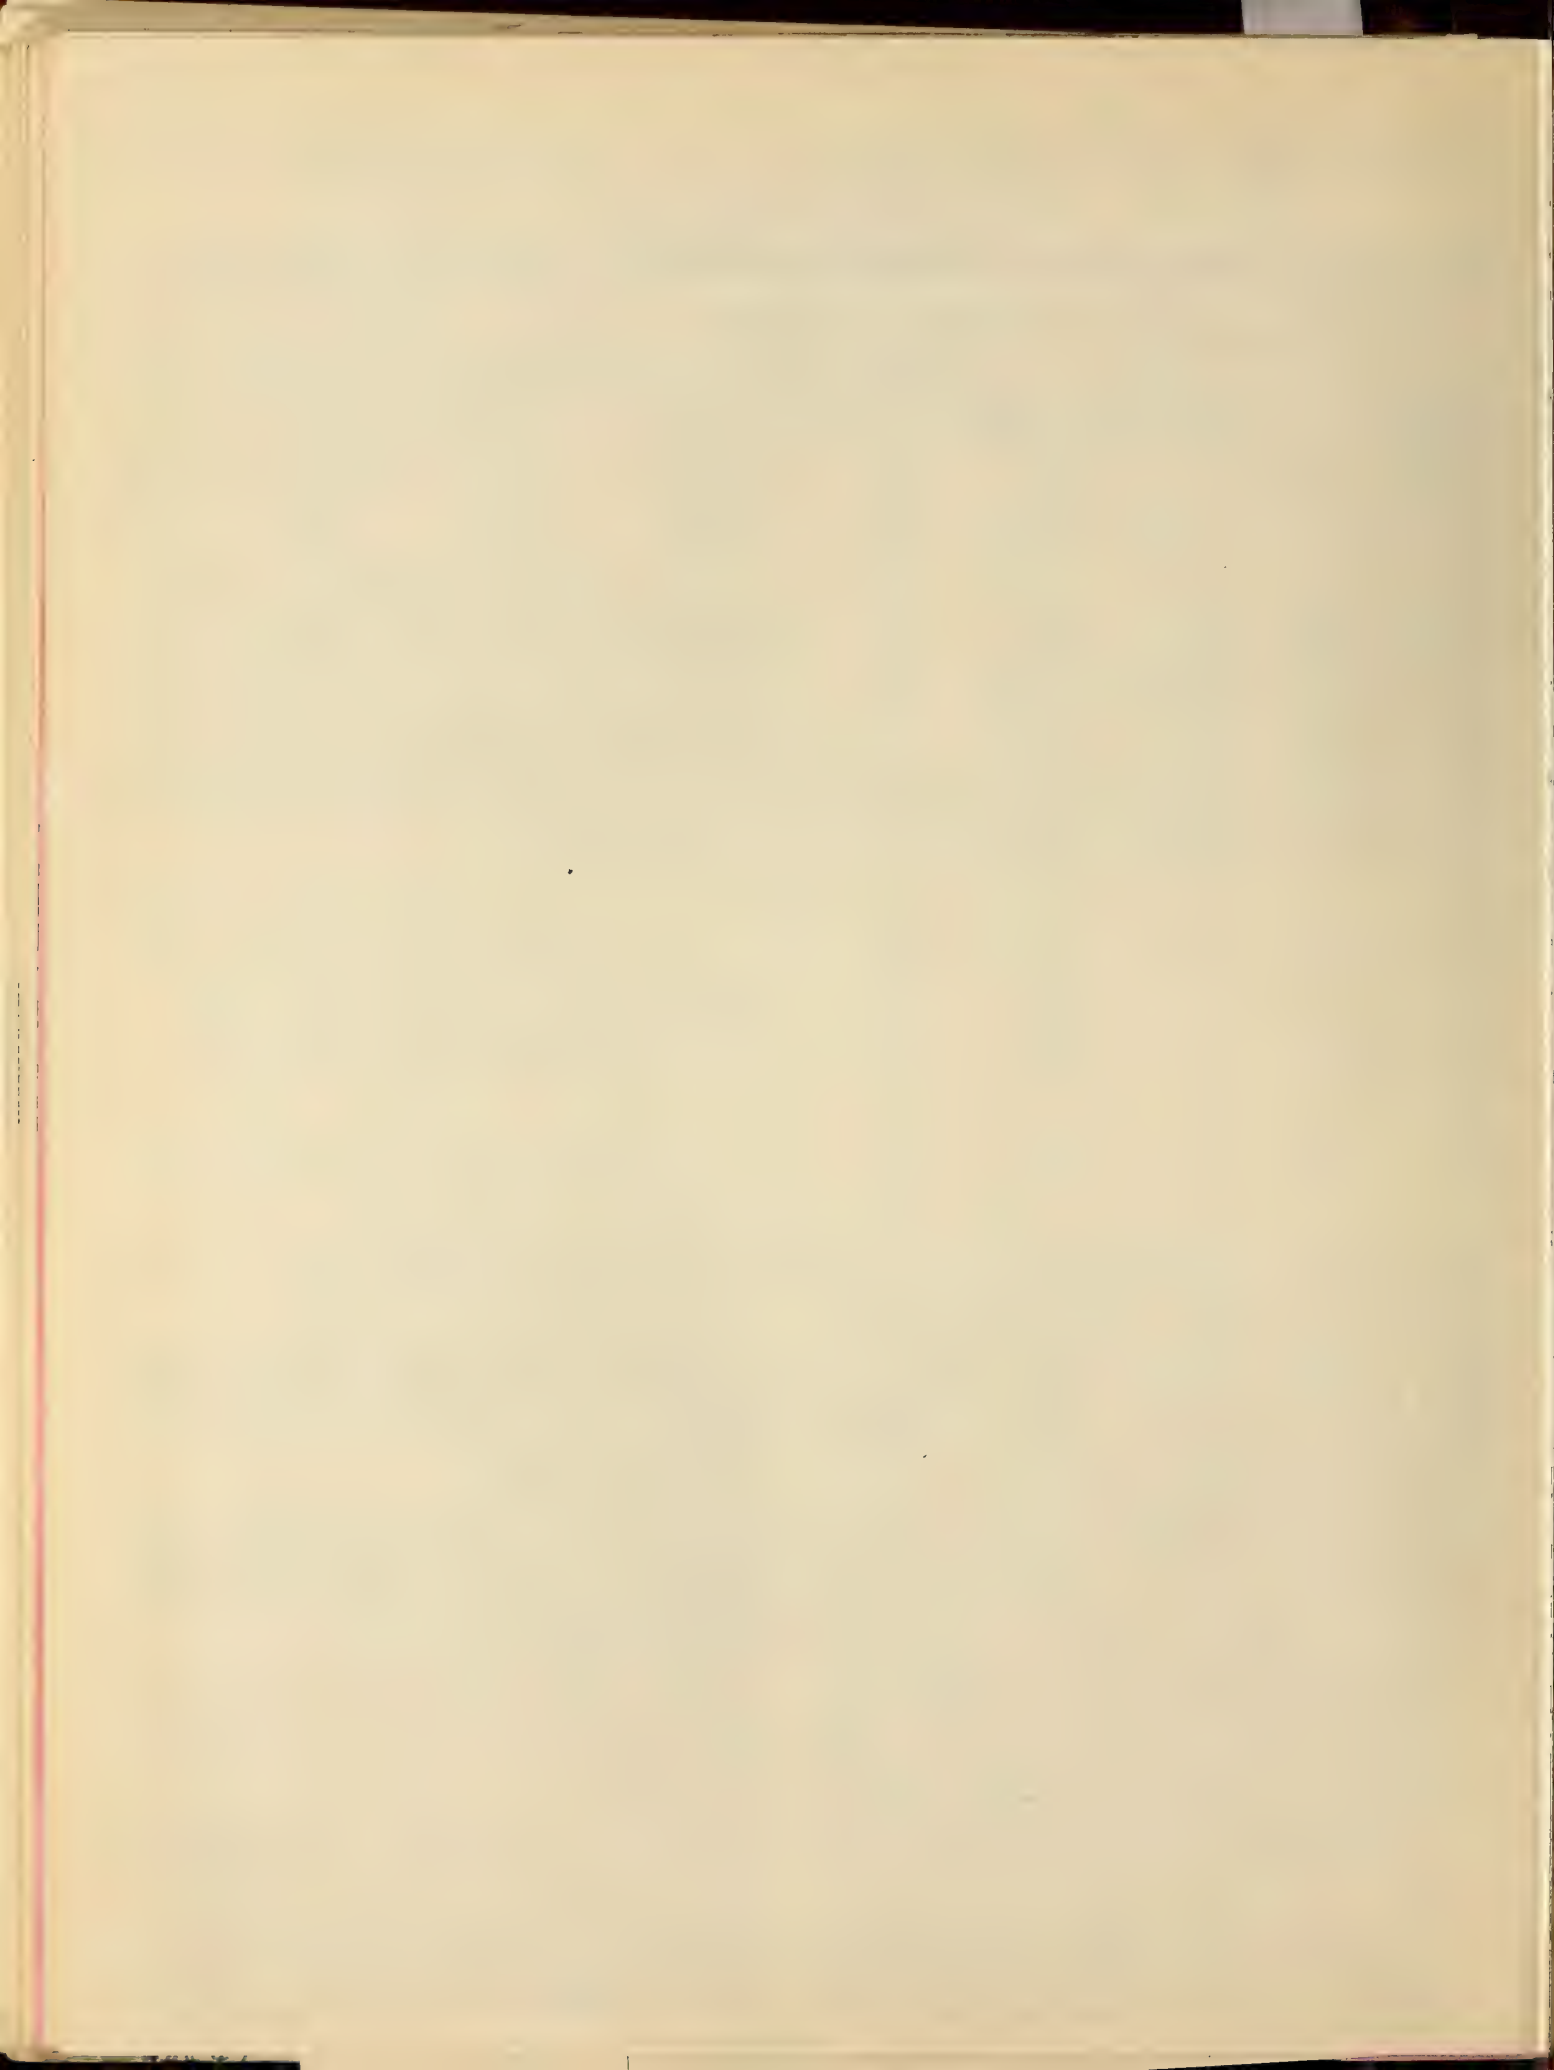

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

For Release April 24, 1950

Release Series BC-1P-22-008

BROWN COUNTY, MINN.

Retail, wholesale, and service establishments located in Brown County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.2 million, an increase of 194 percent over the \$8.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$15.9 million in 1948 as compared with \$5.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.2 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,621 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,179 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Brown County, Minnesota, which also includes data for the cities of New Ulm and Sleepy Eye. Final figures, superseding the preliminary data for Brown County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Brown County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 22-009

CARLTON COUNTY, MINN.

Retail, wholesale, and service establishments located in Carlton County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.1 million, an increase of 167 percent over the \$6.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.9 million in 1948 as compared with \$1.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$452,000 in 1948 compared with \$186,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 890 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 574 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Carlton County, Minnesota, which also includes data for the city of Cloquet. Final figures, superseding the preliminary data for Carlton County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Carlton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

CARVER COUNTY, MINN.

Retail, wholesale, and service establishments located in Carver County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.6 million, an increase of 196 percent over the \$4.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.1 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$369,000 in 1948 compared with \$193,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 554 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 461 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Carver County, Minnesota. Final figures, superseding the preliminary data for Carver County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Carver County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CASS COUNTY, MINN.

Retail, wholesale, and service establishments located in Cass County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.5 million, an increase of 209 percent over the \$3.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.4 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$263,000 in 1948 compared with \$81,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 543 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 269 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cass County, Minnesota. Final figures, superseding the preliminary data for Cass County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cass County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

CHIPPEWA COUNTY, MINN.

Retail, wholesale, and service establishments located in Chippewa County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$18.7 million, an increase of 207 percent over the \$6.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$20.1 million in 1948 as compared with \$6.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$615,000 in 1948 compared with \$201,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,128 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 713 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Chippewa County, Minnesota, which also includes data for the city of Montevideo. Final figures, superseding the preliminary data for Chippewa County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Chippewa County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

CHISAGO COUNTY, MINN.

Retail, wholesale, and service establishments located in Chisago County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.2 million, an increase of 173 percent over the \$3.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.0 million in 1948 as compared with \$0.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$365,000 in 1948 compared with \$85,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 416 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 259 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Chisago County, Minnesota. Final figures, superseding the preliminary data for Chisago County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Chisago County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CLAY COUNTY, MINN.

Retail, wholesale, and service establishments located in Clay County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$33.0 million, an increase of 318 percent over the \$7.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$34.6 million in 1948 as compared with \$8.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$921,000 in 1948 compared with \$244,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,108 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,195 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Clay County, Minnesota, which also includes data for the city of Moorhead. Final figures, superseding the preliminary data for Clay County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Clay County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CLEARWATER COUNTY, MINN.

Retail, wholesale, and service establishments located in Clearwater County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.8 million, an increase of 240 percent over the \$2.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.2 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$203,000 in 1948 compared with \$67,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 311 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 207 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Clearwater County, Minnesota. Final figures, superseding the preliminary data for Clearwater County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Clearwater County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

COOK COUNTY, MINN.

Retail and service establishments located in Cook County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.4 million, an increase of 200 percent over the \$0.8 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$69,000 in 1948 compared with \$17,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 102 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 68 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cook County, Minnesota. Final figures, superseding the preliminary data for Cook County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cook County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

COTTONWOOD COUNTY, MINN.

Retail, wholesale, and service establishments located in Cottonwood County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.2 million, an increase of 223 percent over the \$4.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.0 million in 1948 as compared with \$3.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$505,000 in 1948 compared with \$151,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 768 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 471 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Cottonwood County, Minnesota, which also includes data for the city of Windom. Final figures, superseding the preliminary data for Cottonwood County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Cottonwood County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

CROW WING COUNTY, MINN.

Retail, wholesale, and service establishments located in Crow Wing County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$31.0 million, an increase of 213 percent over the \$9.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.2 million in 1948 as compared with \$3.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$944,000 in 1948 compared with \$469,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,864 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,049 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Crow Wing County, Minnesota, which also includes data for the cities of Brainerd and Crosby. Final figures, superseding the preliminary data for Crow Wing County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Crow Wing County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-019

DAKOTA COUNTY, MINN.

Retail, wholesale, and service establishments located in Dakota County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$35.0 million, an increase of 221 percent over the \$10.9 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 302 percent rise over the same period, reaching a total of \$500.3 million in 1948 as compared with \$124.6 million in 1939. The service trades included in the Census of Business reported receipts totaling \$1.1 million in 1948 compared with \$0.3 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 1,483 paid employees for the workweek ended nearest November 15, 1948. Of these, 1,085 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 961 and 811. Wholesale trade establishments reported a total of 1,020 full- and part-week employees for the week of November 15, 1948, compared with 715 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 109; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 40.

These preliminary figures have been derived from a Census report on Dakota County, Minnesota. The report also contains data for the cities of Hastings, South St. Paul, and West St. Paul.

Final figures, superseding the preliminary data for Dakota County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Dakota County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

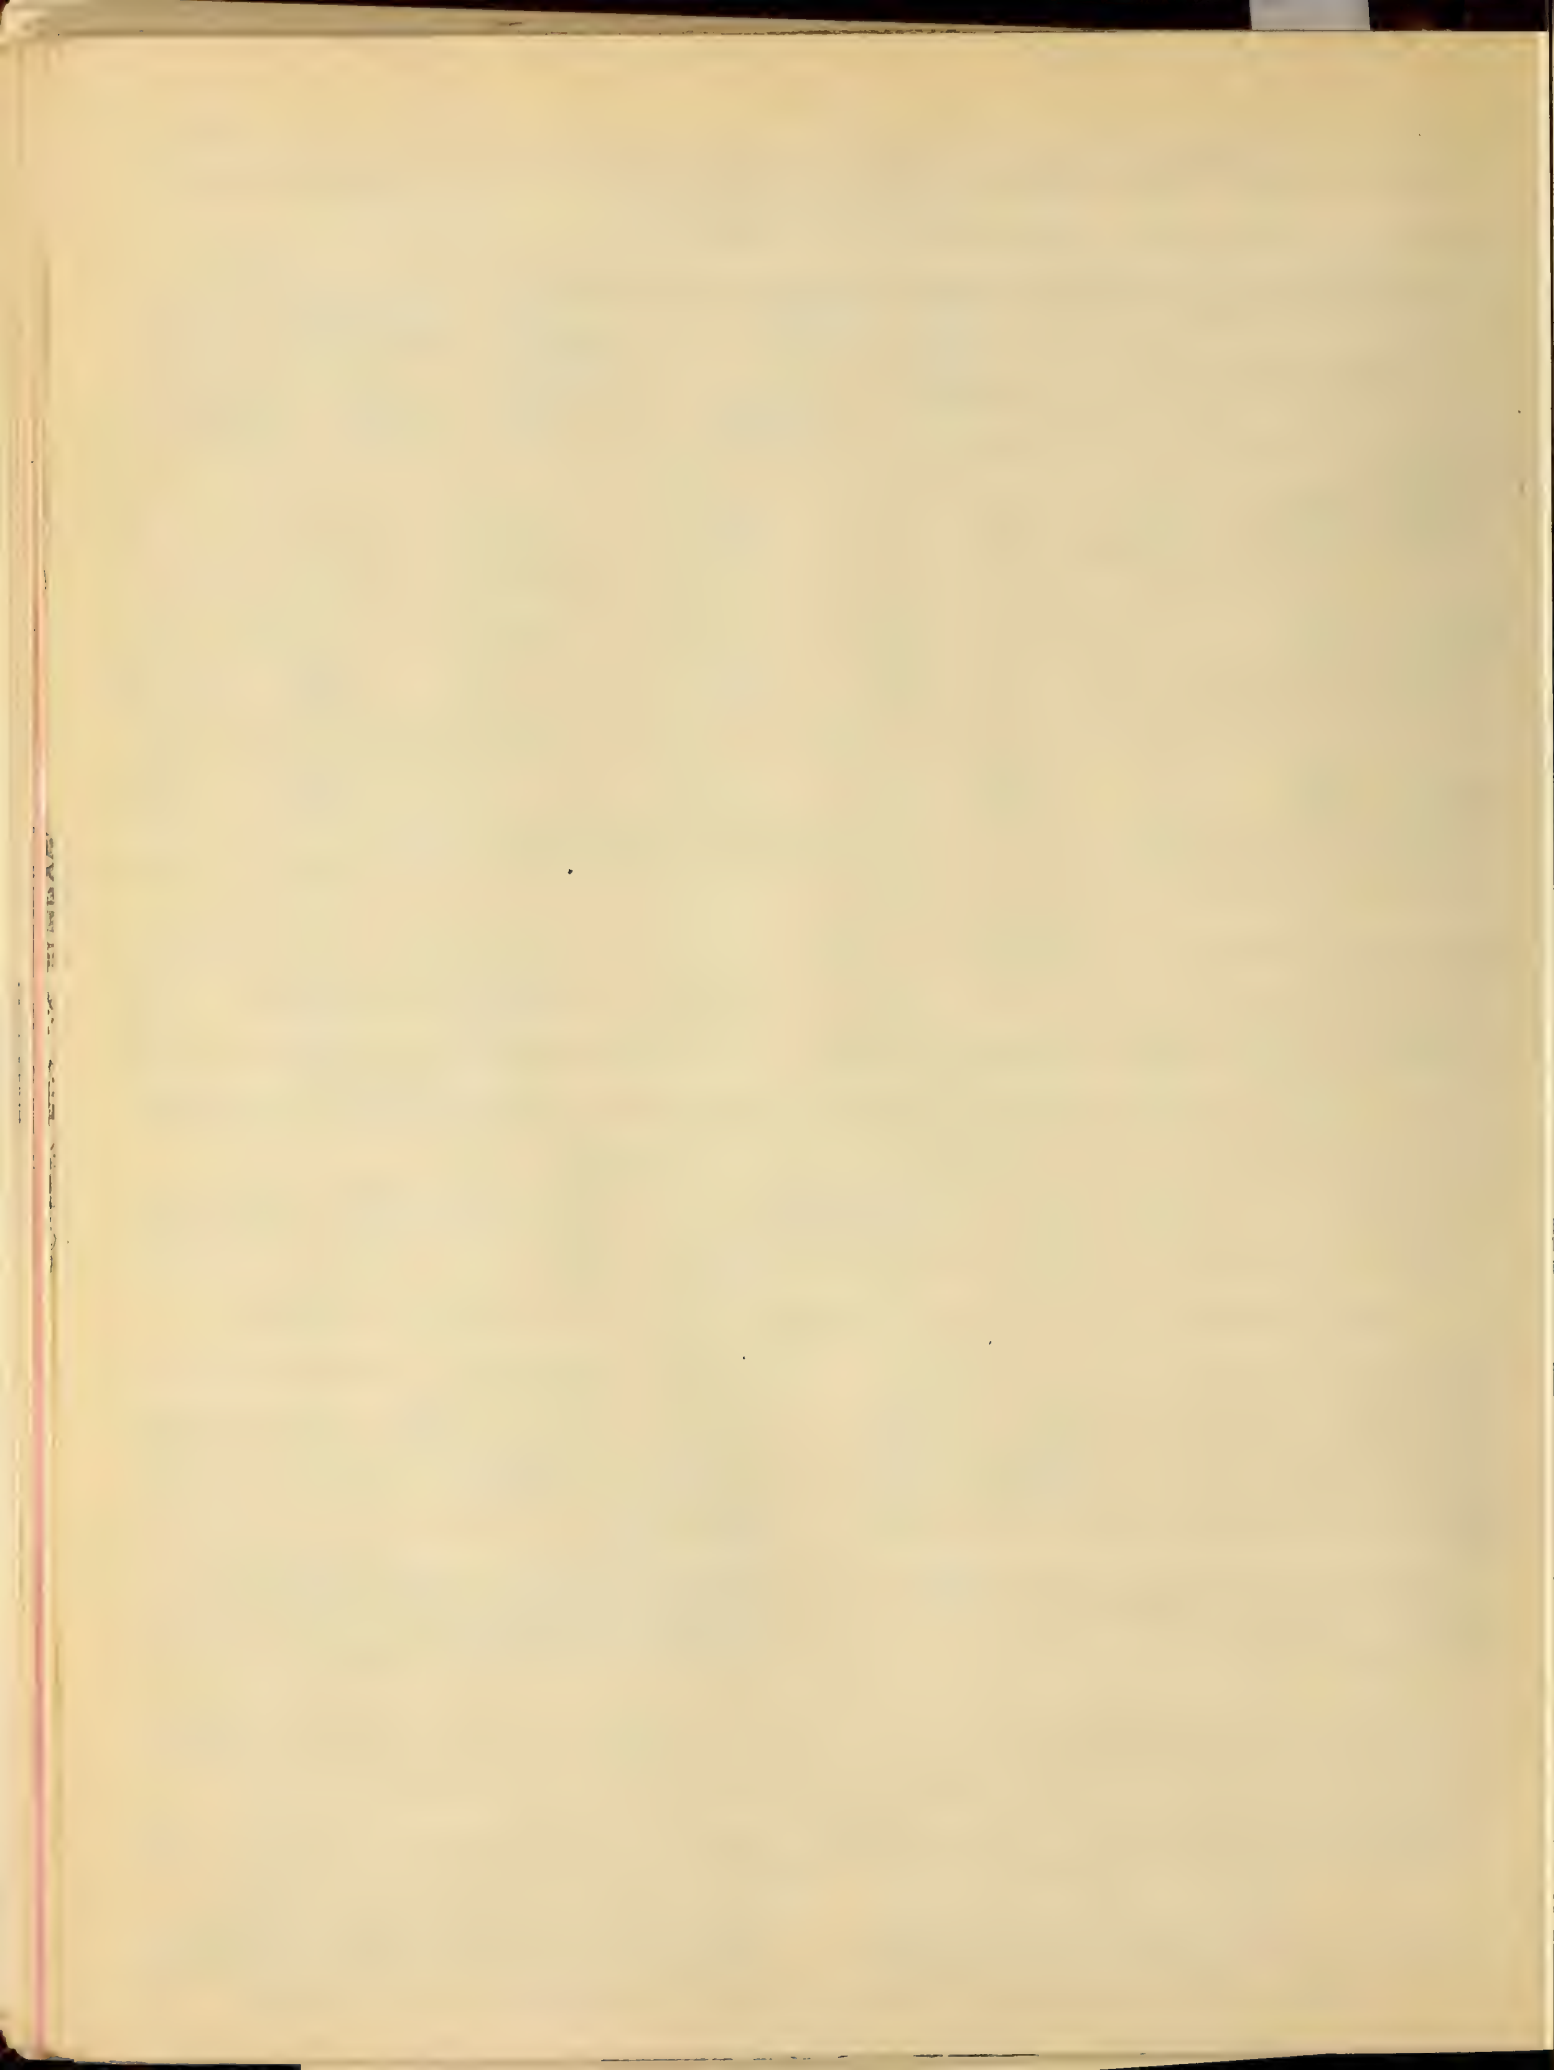

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-020

DODGE COUNTY, MINN.

Retail, wholesale, and service establishments located in Dodge County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.5 million, an increase of 215 percent over the \$2.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.6 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$189,000 in 1948 compared with \$114,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 458 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 228 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Dodge County, Minnesota. Final figures, superseding the preliminary data for Dodge County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Dodge County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

DOUGLAS COUNTY, MINN.

Retail, wholesale, and service establishments located in Douglas County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.6 million, an increase of 238 percent over the \$6.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.6 million in 1948 as compared with \$3.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$781,000 in 1948 compared with \$202,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,176 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 715 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Douglas County, Minnesota, which also includes data for the city of Alexandria. Final figures, superseding the preliminary data for Douglas County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Douglas County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-022

FARIBAULT COUNTY, MINN.

Retail, wholesale, and service establishments located in Faribault County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$22.7 million, an increase of 191 percent over the \$7.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$32.8 million in 1948 as compared with \$8.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$780,000 in 1948 compared with \$354,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,441 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 777 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Faribault County, Minnesota, which also includes data for the city of Blue Earth. Final figures, superseding the preliminary data for Faribault County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Faribault County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

FILLMORE COUNTY, MINN.

Retail, wholesale, and service establishments located in Fillmore County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.2 million, an increase of 231 percent over the \$6.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.1 million in 1948 as compared with \$5.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$507,000 in 1948 compared with \$259,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 950 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 730 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Fillmore County, Minnesota. Final figures, superseding the preliminary data for Fillmore County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Fillmore County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

FREEBORN COUNTY, MINN.

Retail, wholesale, and service establishments located in Freeborn County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$32.8 million, an increase of 204 percent over the \$10.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$25.3 million in 1948 as compared with \$6.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,400 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,364 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Freeborn County, Minnesota, which also includes data for the city of Albert Lea. Final figures, superseding the preliminary data for Freeborn County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Freeborn County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

GOODHUE COUNTY, MINN.

Retail, wholesale, and service establishments located in Goodhue County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$32.3 million, an increase of 208 percent over the \$10.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.4 million in 1948 as compared with \$3.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,835 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,179 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Goodhue County, Minnesota, which also includes data for the city of Red Wing. Final figures, superseding the preliminary data for Goodhue County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Goodhue County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

GRANT COUNTY, MINN.

Retail, wholesale, and service establishments located in Grant County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.6 million, an increase of 207 percent over the \$2.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.5 million in 1948 as compared with \$2.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$248,000 in 1948 compared with \$97,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 351 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 302 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Grant County, Minnesota. Final figures, superseding the preliminary data for Grant County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Grant County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE

PRELIMINARY

For Release May 22, 1950

Release Series BC-1P-22-027

HENNEPIN COUNTY, MINN.

Retail, wholesale, and service establishments located in Hennepin County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$787,300,000, an increase of 174 percent over the \$287,500,000 sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 242 percent rise over the same period, reaching a total of \$2,469,000,000 in 1948 as compared with \$721,400,000 in 1939. The service trades included in the Census of Business reported receipts totaling \$55,800,000 in 1948 compared with \$21,100,000 in 1939. Hotel receipts moved from \$6,800,000 in 1939 to \$14,200,000 in 1948. Amusement businesses in the county recorded receipts of \$13,300,000 in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 48,976 paid employees for the workweek ended nearest November 15, 1948. Of these, 36,738 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 35,703 and 27,934. Wholesale trade establishments reported a total of 25,860 full- and part-week employees for the week of November 15, 1948, compared with 17,176 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 8,984; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 6,715.

These preliminary figures have been derived from a Census report on Hennepin County, Minnesota. The report also contains data for the cities of Edina, Hopkins, Minneapolis, Richfield, Robbinsdale, and St. Louis Park.

Final figures, superseding the preliminary data for Hennepin County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hennepin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

HOUSTON COUNTY, MINN.

Retail, wholesale, and service establishments located in Houston County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.2 million, an increase of 209 percent over the \$3.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.5 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$307,000 in 1948 compared with \$83,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 510 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 302 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Houston County, Minnesota. Final figures, superseding the preliminary data for Houston County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Houston County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

HUBBARD COUNTY, MINN.

Retail, wholesale, and service establishments located in Hubbard County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.4 million, an increase of 208 percent over the \$2.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.3 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$211,000 in 1948 compared with \$72,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 421 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 198 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Hubbard County, Minnesota, which also includes data for the city of Park Rapids. Final figures, superseding the preliminary data for Hubbard County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hubbard County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

ISANTI COUNTY, MINN.

Retail, wholesale, and service establishments located in Isanti County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.0 million, an increase of 196 percent over the \$2.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.3 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$435,000 in 1948 compared with \$146,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 455 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 311 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Isanti County, Minnesota. Final figures, superseding the preliminary data for Isanti County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Isanti County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

ITASCA COUNTY, MINN.

Retail, wholesale, and service establishments located in Itasca County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.6 million, an increase of 213 percent over the \$8.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.6 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$600,000 in 1948 compared with \$240,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,368 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 857 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Itasca County, Minnesota, which also includes data for the city of Grand Rapids. Final figures, superseding the preliminary data for Itasca County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Itasca County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

JACKSON COUNTY, MINN.

Retail, wholesale, and service establishments located in Jackson County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.9 million, an increase of 239 percent over the \$4.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.0 million in 1948 as compared with \$4.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$375,000 in 1948 compared with \$126,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 825 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 503 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jackson County, Minnesota, which also includes data for the city of Jackson. Final figures, superseding the preliminary data for Jackson County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jackson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

KANDIYOHI COUNTY, MINN.

Retail, wholesale, and service establishments located in Kandiyohi County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.3 million, an increase of 229 percent over the \$8.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.9 million in 1948 as compared with \$5.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$823,000 in 1948 compared with \$314,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,554 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 954 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kandiyohi County, Minnesota, which also includes data for the city of Willmar. Final figures, superseding the preliminary data for Kandiyohi County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kandiyohi County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-035

KITTSOON COUNTY, MINN.

Retail, wholesale, and service establishments located in Kittson County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.4 million, an increase of 147 percent over the \$3.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.2 million in 1948 as compared with \$2.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$232,000 in 1948 compared with \$57,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 349 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 339 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kittson County, Minnesota. Final figures, superseding the preliminary data for Kittson County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kittson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

For Release April 27, 1950

Release Series BC-1P-22-036

KOOCHICHING COUNTY, MINN.

Retail, wholesale, and service establishments located in Koochiching County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.9 million, an increase of 167 percent over the \$5.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.9 million in 1948 as compared with \$1.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$367,000 in 1948 compared with \$176,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 749 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 539 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Koochiching County, Minnesota, which also includes data for the city of International Falls. Final figures, superseding the preliminary data for Koochiching County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Koochiching County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Censuses of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

LAKE COUNTY, MINN.

Retail, wholesale, and service establishments located in Lake County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.9 million, an increase of 168 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$677,000 in 1948 as compared with \$370,000 in 1939. The service trades included in the Census of Business recorded receipts totaling \$184,000 in 1948 compared with \$93,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 346 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 215 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lake County, Minnesota, which also includes data for the city of Two Harbors. Final figures, superseding the preliminary data for Lake County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lake County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

LAKE OF THE WOODS COUNTY, MINN.

Retail, wholesale, and service establishments located in Lake of the Woods County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.3 million, an increase of 136 percent over the \$1.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.4 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$103,000 in 1948 compared with \$26,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 190 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 146 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lake of the Woods County, Minnesota. Final figures, superseding the preliminary data for Lake of the Woods County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lake of the Woods County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

LE SUEUR COUNTY, MINN.

Retail, wholesale, and service establishments located in Le Sueur County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$16.0 million, an increase of 240 percent over the \$4.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.4 million in 1948 as compared with \$2.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$371,000 in 1948 compared with \$160,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 977 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 736 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Le Sueur County, Minnesota. Final figures superseding the preliminary data for Le Sueur County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Le Sueur County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LYON COUNTY, MINN.

Retail, wholesale, and service establishments located in Lyon County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.6 million, an increase of 233 percent over the \$8.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$42.3 million in 1948 as compared with \$8.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$772,000 in 1948 compared with \$274,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,532 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,183 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lyon County, Minnesota, which also includes data for the cities of Marshall and Tracy. Final figures, superseding the preliminary data for Lyon County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lyon County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P- 22-043

MCLEOD COUNTY, MINN.

Retail, wholesale, and service establishments located in McLeod County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$22.4 million, an increase of 229 percent over the \$6.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$19.1 million in 1948 as compared with \$2.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$634,000 in 1948 compared with \$264,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,260 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 726 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on McLeod County, Minnesota, which also includes data for the city of Hutchinson. Final figures, superseding the preliminary data for McLeod County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for McLeod County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

MAHNOMEN COUNTY, MINN.

Retail, wholesale, and service establishments located in Mahnomen County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.1 million, an increase of 215 percent over the \$1.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.5 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$95,000 in 1948 compared with \$27,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 165 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 127 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mahnomen County, Minnesota. Final figures, superseding the preliminary data for Mahnomen County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mahnomen County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

MARSHALL COUNTY, MINN.

Retail, wholesale, and service establishments located in Marshall County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.5 million, an increase of 209 percent over the \$3.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.9 million in 1948 as compared with \$3.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$285,000 in 1948 compared with \$100,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 498 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 402 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Marshall County, Minnesota. Final figures, superseding the preliminary data for Marshall County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Marshall County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-22-046

MARTIN COUNTY, MINN.

Retail, wholesale, and service establishments located in Martin County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$24.7 million, an increase of 184 percent over the \$8.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$33.3 million in 1948 as compared with \$5.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$891,000 in 1948 compared with \$419,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,579 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,059 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Martin County, Minnesota, which also includes data for the city of Fairmont. Final figures, superseding the preliminary data for Martin County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Martin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 19, 1950

Release Series BC-1P-22-047

MEEKER COUNTY, MINN.

Retail, wholesale, and service establishments located in Meeker County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.8 million, an increase of 216 percent over the \$5.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.6 million in 1948 as compared with \$4.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$439,000 in 1948 compared with \$162,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 984 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 561 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Meeker County, Minnesota, which also includes data for the city of Litchfield. Final figures, superseding the preliminary data for Meeker County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Meeker County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

MILLE LACS COUNTY, MINN.

Retail, wholesale, and service establishments located in Mille Lacs County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.8 million, an increase of 198 percent over the \$4.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.3 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$286,000 in 1948 compared with \$117,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 733 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 478 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mille Lacs County, Minnesota. Final figures, superseding the preliminary data for Mille Lacs County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mille Lacs County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-22-049

MORRISON COUNTY, MINN.

Retail, wholesale, and service establishments located in Morrison County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to the preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.5 million, an increase of 207 percent over the \$5.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.2 million in 1948 as compared with \$1.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$709,000 in 1948 compared with \$171,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 906 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 600 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Morrison County, Minnesota, which also includes data for the city of Little Falls. Final figures, superseding the preliminary data for Morrison County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Morrison County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-050

MOWER COUNTY, MINN.

Retail, wholesale, and service establishments located in Mower County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$40.7 million, an increase of 211 percent over the \$13.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$20.4 million in 1948 as compared with \$5.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.3 million in 1948 compared with \$0.6 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,255 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,395 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Mower County, Minnesota, which also includes data for the city of Austin. Final figures, superseding the preliminary data of Mower County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Mower County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

MURRAY COUNTY, MINN.

Retail, wholesale, and service establishments located in Murray County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.8 million, an increase of 227 percent over the \$3.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.4 million in 1948 as compared with \$3.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$303,000 in 1948 compared with \$94,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 594 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 340 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Murray County, Minnesota. Final figures, superseding the preliminary data for Murray County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Murray County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

NICOLLET COUNTY, MINN.

Retail, wholesale, and service establishments located in Nicollet County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.2 million, an increase of 220 percent over the \$3.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.4 million in 1948 as compared with \$1.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$461,000 in 1948 compared with \$237,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 898 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 431 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Nicollet County, Minnesota, which also includes data for the cities of North Mankato and St. Peter. Final figures, superseding the preliminary data for Nicollet County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Nicollet County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

NOBLES COUNTY, MINN.

Retail, wholesale, and service establishments located in Nobles County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$25.3 million, an increase of 224 percent over the \$7.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$19.0 million in 1948 as compared with \$4.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$806,000 in 1948 compared with \$255,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,252 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 885 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Nobles County, Minnesota, which also includes data for the city of Worthington. Final figures, superseding the preliminary data for Nobles County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Nobles County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

NORMAN COUNTY, MINN.

Retail, wholesale, and service establishments located in Norman County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.4 million, an increase of 185 percent over the \$3.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.4 million in 1948 as compared with \$2.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$288,000 in 1948 compared with \$78,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 476 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 423 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Norman County, Minnesota. Final figures, superseding the preliminary data for Norman County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Norman County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 24, 1950

Release Series BC-1P-22-055

OLMSTED COUNTY, MINN.

Retail, wholesale, and service establishments located in Olmsted County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$52.0 million, an increase of 191 percent over the \$17.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$19.7 million in 1948 as compared with \$5.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$3.1 million in 1948 compared with \$1.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,924 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,635 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Olmsted County, Minnesota, which also includes data for the city of Rochester. Final figures, superseding the preliminary data for Olmsted County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Olmsted County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-056

OTTER TAIL COUNTY, MINN.

Retail, wholesale, and service establishments located in Otter Tail County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$36.0 million, an increase of 213 percent over the \$11.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$21.0 million in 1948 as compared with \$6.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$807,000 in 1948 compared with \$437,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,134 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,350 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Otter Tail County, Minnesota, which also includes data for the city of Fergus Falls. Final figures, superseding the preliminary data for Otter Tail County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Otter Tail County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-057

PENNINGTON COUNTY, MINN.

Retail, wholesale, and service establishments located in Pennington County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.1 million, an increase of 221 percent over the \$4.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$20.3 million in 1948 as compared with \$5.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$494,000 in 1948 compared with \$180,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,228 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 770 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pennington County, Minnesota, which also includes data for the city of Thief River Falls. Final figures, superseding the preliminary data for Pennington County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pennington County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

PINE COUNTY, MINN.

Retail, wholesale, and service establishments located in Pine County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.2 million, an increase of 190 percent over the \$4.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.5 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$265,000 in 1948 compared with \$93,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 632 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 447 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pine County, Minnesota. Final figures, superseding the preliminary data for Pine County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pine County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 19, 1950

Release Series BC-1P-22-059

PIPESTONE COUNTY, MINN.

Retail, wholesale, and service establishments located in Pipestone County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$16.0 million, an increase of 196 percent over the \$5.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.0 million in 1948 as compared with \$5.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$501,000 in 1948 compared with \$166,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 927 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 674 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pipestone County, Minnesota, which also includes data for the city of Pipestone. Final figures, superseding the preliminary data for Pipestone County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pipestone County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census; Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-060

POLK COUNTY, MINN.

Retail, wholesale, and service establishments located in Polk County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$30.3 million, an increase of 194 percent over the \$10.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$29.2 million in 1948 as compared with \$9.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.1 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,933 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,611 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Polk County, Minnesota, which also includes data for the cities of Crookston and East Grand Forks. Final figures, superseding the preliminary data for Polk County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Polk County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 19, 1950

Release Series BC-1P-22-061

POPE COUNTY, MINN.

Retail, wholesale, and service establishments located in Pope County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.8 million, an increase of 169 percent over the \$2.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.8 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$330,000 in 1948 compared with \$84,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 489 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 313 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pope County, Minnesota, which also includes data for the city of Glenwood. Final figures, superseding the preliminary data for Pope County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pope County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release May 22, 1950

Release Series BC-1P- 22-062

RAMSEY COUNTY, MINN.

Retail, wholesale, and service establishments located in Ramsey County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$421.5 million, an increase of 145 percent over the \$172.1 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 191 percent rise over the same period, reaching a total of \$660.5 million in 1948 as compared with \$227.1 million in 1939. The service trades included in the Census of Business reported receipts totaling \$22.0 million in 1948 compared with \$9.8 million in 1939. Amusement businesses in the county recorded receipts of \$4.8 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 25,480 paid employees for the workweek ended nearest November 15, 1948. Of these, 19,352 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 21,524 and 16,876. Wholesale trade establishments reported a total of 8,931 full- and part-week employees for the week of November 15, 1948, compared with 7,748 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 3,326; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 3,269.

These preliminary figures have been derived from a Census report on Ramsey County, Minnesota. The report also contains data for the cities of North St. Paul, St. Paul, and White Bear Lake.

Final figures, superseding the preliminary data for Ramsey County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Ramsey County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

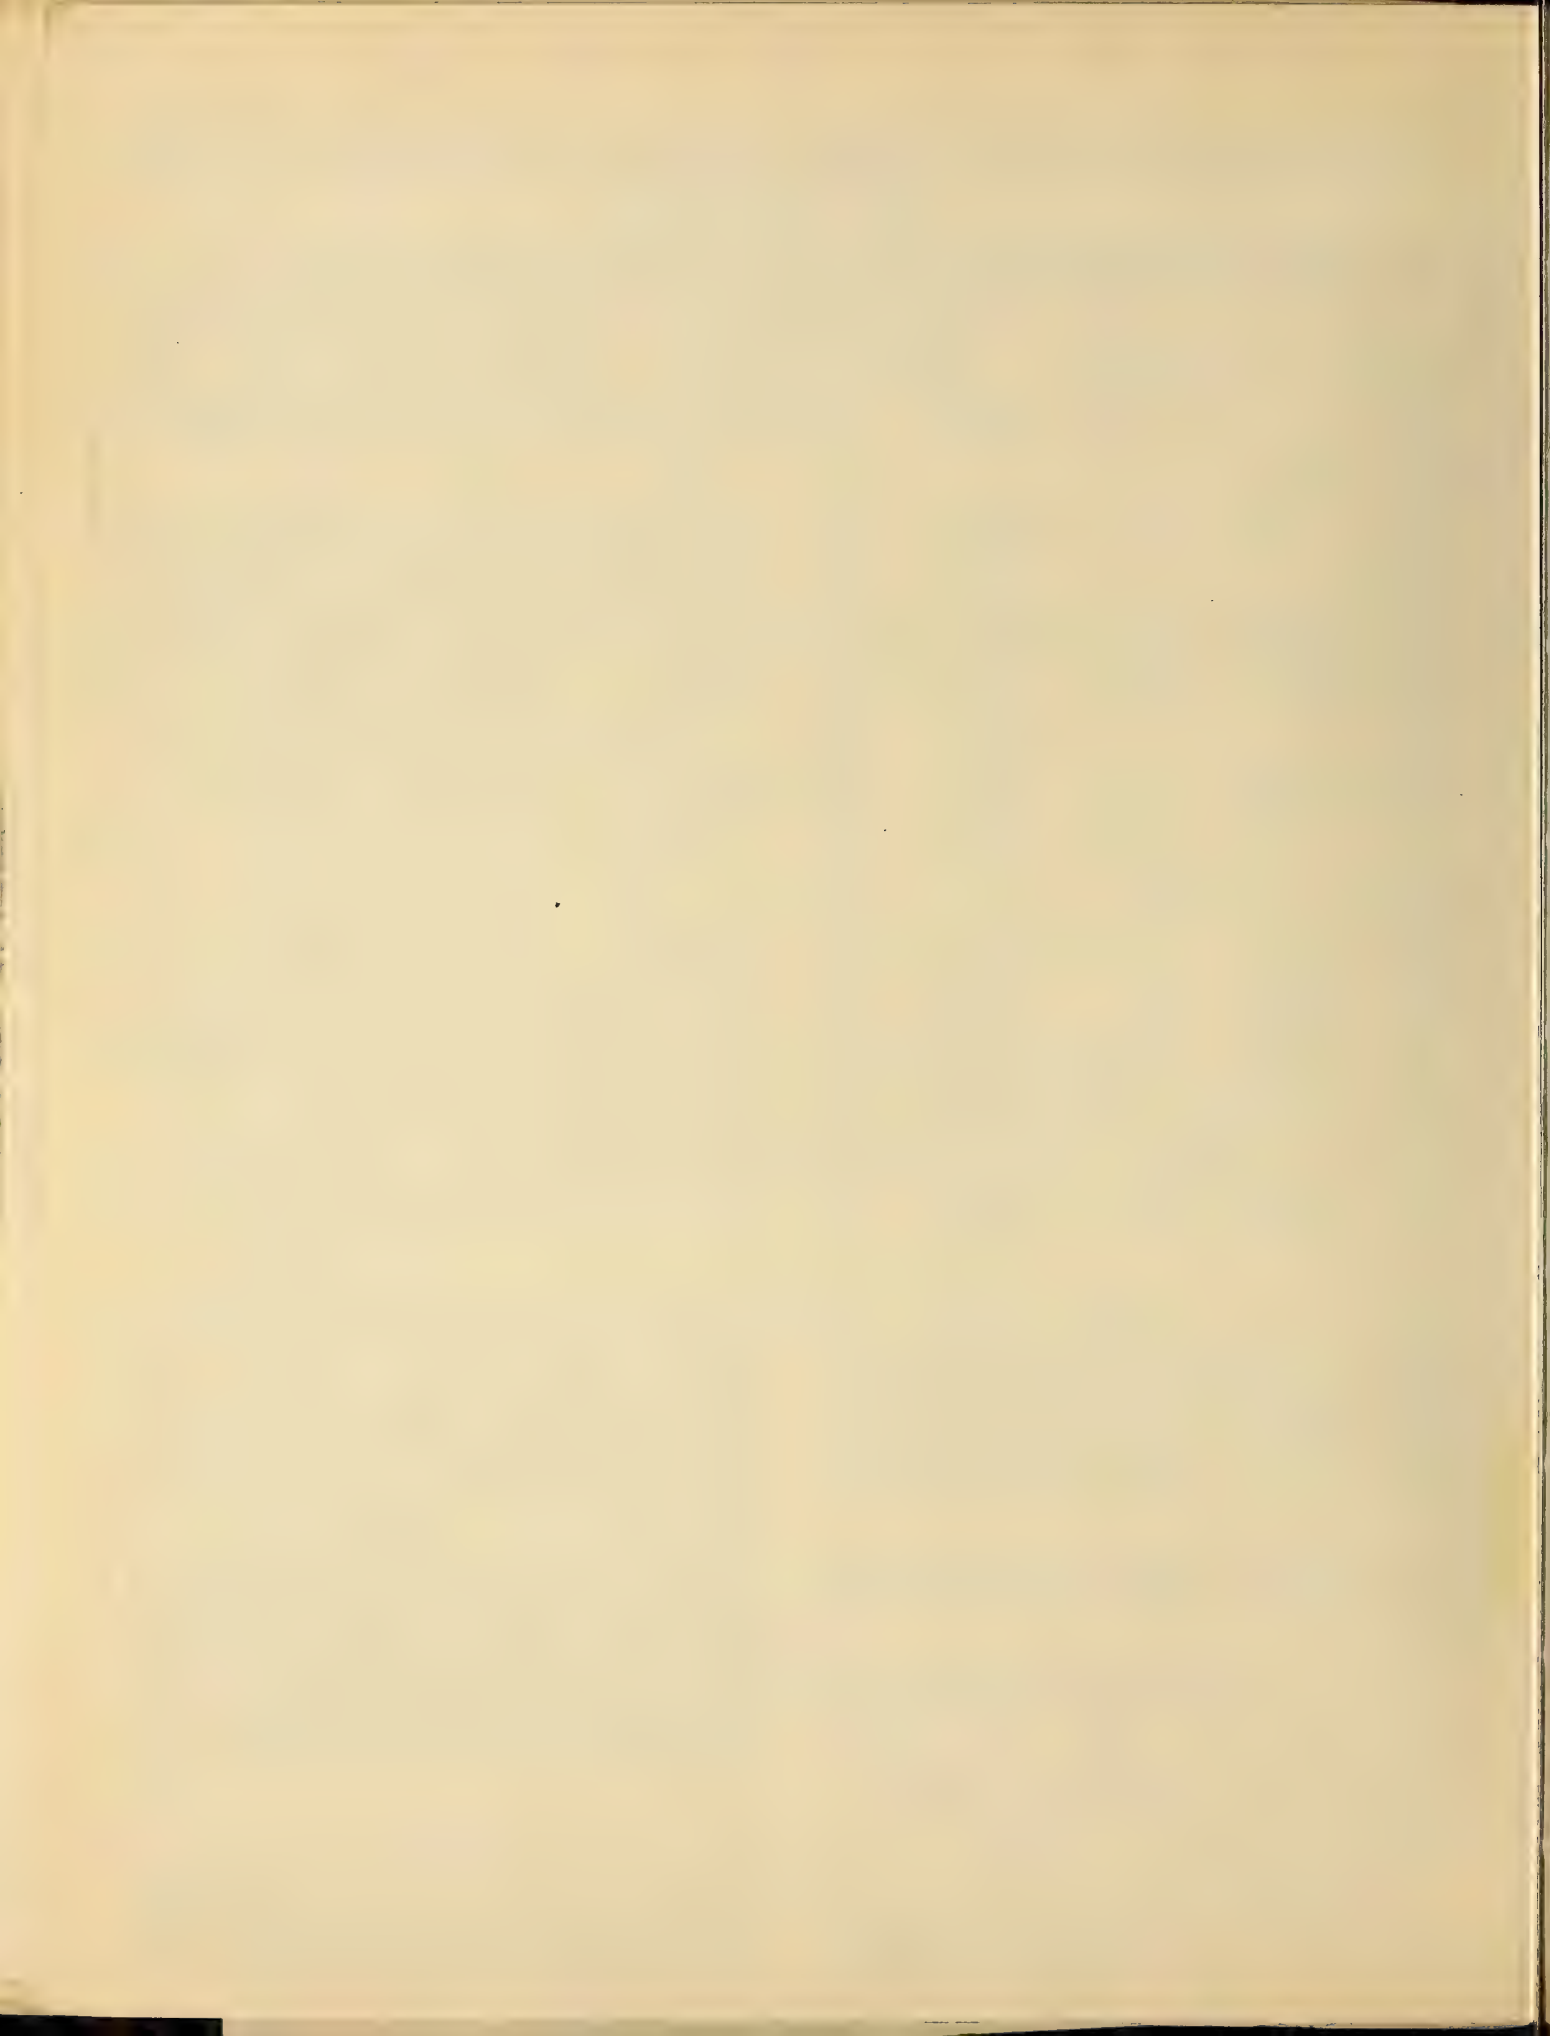

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-063

RED LAKE COUNTY, MINN.

Retail, wholesale, and service establishments located in Red Lake County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.0 million, an increase of 213 percent over the \$1.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.7 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$100,000 in 1948 compared with \$31,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 238 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 200 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Red Lake County, Minnesota. Final figures, superseding the preliminary data for Red Lake County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Red Lake County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 22-064

REDWOOD COUNTY, MINN.

Retail, wholesale, and service establishments located in Redwood County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$21.4 million, an increase of 224 percent over the \$6.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$24.4 million in 1948 as compared with \$5.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$714,000 in 1948 compared with \$241,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,099 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 663 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Redwood County, Minnesota, which also includes data for the city of Redwood Falls. Final figures, superseding the preliminary data for Redwood County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Redwood County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-065

RENVILLE COUNTY, MINN.

Retail, wholesale, and service establishments located in Renville County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.1 million, an increase of 200 percent over the \$6.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$17.3 million in 1948 as compared with \$4.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$446,000 in 1948 compared with \$223,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 957 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 638 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Renville County, Minnesota. Final figures, superseding the preliminary data for Renville County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Renville County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 24, 1950

Release Series BC-1P-22-066

RICE COUNTY, MINN.

Retail, wholesale, and service establishments located in Rice County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$27.6 million, an increase of 200 percent over the \$9.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.8 million in 1948 as compared with \$3.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$937,000 in 1948 compared with \$361,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,752 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,122 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Rice County, Minnesota, which also includes data for the cities of Faribault and Northfield. Final figures, superseding the preliminary data for Rice County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Rice County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 22-067

ROCK COUNTY, MINN.

Retail, wholesale, and service establishments located in Rock County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.1 million, an increase of 247 percent over the \$3.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.8 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$389,000 in 1948 compared with \$130,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 640 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 421 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Rock County, Minnesota, which also includes data for the city of Luverne. Final figures, superseding the preliminary data for Rock County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Rock County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P- 22-069

ST. LOUIS COUNTY, MINN.

Retail, wholesale, and service establishments located in St. Louis County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$198.7 million, an increase of 147 percent over the \$80.3 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the county showed a 192 percent rise over the same period, reaching a total of \$318.4 million in 1948 as compared with \$108.9 million in 1939. The service trades included in the Census of Business reported receipts totaling \$8.4 million in 1948 compared with \$3.8 million in 1939. Hotel receipts moved from \$2.0 million in 1939 to \$6.2 million in 1948. Amusement businesses in the county recorded receipts of \$2.5 million in 1948. No comparable figure for 1939 is available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 10,430 paid employees for the workweek ended nearest November 15, 1948. Of these, 8,287 worked the full week, and the remainder part of the week. The comparable figures for 1939 were 9,227 and 7,273. Wholesale trade establishments reported a total of 4,345 full- and part-week employees for the week of November 15, 1948, compared with 3,769 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered, 1,321; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 1,114.

These preliminary figures have been derived from a Census report on St. Louis County, Minnesota. The report also contains data for the cities of Chisholm, Duluth, Ely, Eveleth, Gilbert, Hibbing, and Virginia.

Final figures, superseding the preliminary data for St. Louis County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for St. Louis County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

SCOTT COUNTY, MINN.

Retail, wholesale, and service establishments located in Scott County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.1 million, an increase of 203 percent over the \$4.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.4 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$364,000 in 1948 compared with \$172,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 656 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 461 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Scott County, Minnesota. Final figures, superseding the preliminary data for Scott County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Scott County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

SHERBURNE COUNTY, MINN.

Retail, wholesale, and service establishments located in Sherburne County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.6 million, an increase of 167 percent over the \$2.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.8 million in 1948 as compared with \$0.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$65,000 in 1948 compared with \$25,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 285 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 194 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Sherburne County, Minnesota. Final figures, superseding the preliminary data for Sherburne County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Sherburne County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-072

SIBLEY COUNTY, MINN.

Retail, wholesale, and service establishments located in Sibley County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.1 million, an increase of 200 percent over the \$3.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.8 million in 1948 as compared with \$1.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$239,000 in 1948 compared with \$112,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 645 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 299 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Sibley County, Minnesota. Final figures, superseding the preliminary data for Sibley County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Sibley County as well as order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

PRELIMINARY

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

For Release May 15, 1950

Release Series BC-1P-22-073

STEARNS COUNTY, MINN.

Retail, wholesale, and service establishments located in Stearns County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$65.0 million, an increase of 248 percent over the \$18.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$22.5 million in 1948 as compared with \$7.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.3 million in 1948 compared with \$0.9 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 4,098 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,356 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Stearns County, Minnesota, which also includes data for the city of Sauk Centre and the part of the city of St. Cloud located in Stearns County. Final figures, superseding the preliminary data for Stearns County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Stearns County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-074

STEELE COUNTY, MINN.

Retail, wholesale, and service establishments located in Steele County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$22.1 million, an increase of 216 percent over the \$7.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$10.9 million in 1948 as compared with \$3.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$908,000 in 1948 compared with \$267,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,299 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 813 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Steele County, Minnesota, which also includes data for the city of Owatonna. Final figures, superseding the preliminary data for Steele County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Steele County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

STEVENS COUNTY, MINN.

Retail, wholesale, and service establishments located in Stevens County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.4 million, an increase of 197 percent over the \$3.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.9 million in 1948 as compared with \$2.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$366,000 in 1948 compared with \$146,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 698 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 388 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Stevens County, Minnesota, which also includes data for the city of Morris. Final figures, superseding the preliminary data for Stevens County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Stevens County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

SWIFT COUNTY, MINN.

Retail, wholesale, and service establishments located in Swift County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$17.6 million, an increase of 300 percent over the \$4.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.0 million in 1948 as compared with \$3.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$401,000 in 1948 compared with \$174,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 886 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 647 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Swift County, Minnesota, which also includes data for the city of Benson. Final figures, superseding the preliminary data for Swift County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Swift County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

TODD COUNTY, MINN.

Retail, wholesale, and service establishments located in Todd County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$16.8 million, an increase of 229 percent over the \$5.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.1 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$432,000 in 1948 compared with \$177,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 860 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 569 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Todd County, Minnesota, which also includes data for the city of Staples. Final figures, superseding the preliminary data for Todd County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Todd County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

TRAVERSE COUNTY, MINN.

Retail, wholesale, and service establishments located in Traverse County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.9 million, an increase of 259 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$7.6 million in 1948 as compared with \$1.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$229,000 in 1948 compared with \$64,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 392 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 318 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Traverse County, Minnesota. Final figures, superseding the preliminary data for Traverse County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Traverse County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

WABASHA COUNTY, MINN.

Retail, wholesale, and service establishments located in Wabasha County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$14.5 million, an increase of 215 percent over the \$4.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.1 million in 1948 as compared with \$1.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$557,000 in 1948 compared with \$160,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 741 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 492 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wabasha County, Minnesota, which also includes data for Lake City. Final figures, superseding the preliminary data for Wabasha County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wabasha County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

WADENA COUNTY, MINN.

Retail, wholesale, and service establishments located in Wadena County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.6 million, an increase of 249 percent over the \$3.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$9.6 million in 1948 as compared with \$2.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$225,000 in 1948 compared with \$66,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 663 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 571 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wadena County, Minnesota, which also includes data for the city of Wadena. Final figures, superseding the preliminary data for Wadena County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wadena County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 26, 1950

Release Series BC-1P- 22-081

WASECA COUNTY, MINN.

Retail, wholesale, and service establishments located in Waseca County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.9 million, an increase of 223 percent over the \$4.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.0 million in 1948 as compared with \$3.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$461,000 in 1948 compared with \$151,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 772 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 531 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Waseca County, Minnesota, which also includes data for the city of Waseca. Final figures, superseding the preliminary data for Waseca County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Waseca County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-22-082

WASHINGTON COUNTY, MINN.

Retail, wholesale, and service establishments located in Washington County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.8 million, an increase of 222 percent over the \$7.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.9 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$578,000 in 1948 compared with \$261,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,285 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 953 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Washington County, Minnesota, which also includes data for the cities of Bayport and Stillwater. Final figures, superseding the preliminary data for Washington County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Washington County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

WATONWAN COUNTY, MINN.

Retail, wholesale, and service establishments located in Watonwan County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.0 million, an increase of 189 percent over the \$4.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$17.4 million in 1948 as compared with \$4.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$567,000 in 1948 compared with \$128,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 828 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 600 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Watonwan County, Minnesota, which also includes data for the city of St. James. Final figures, superseding the preliminary data for Watonwan County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Watonwan County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

WILKIN COUNTY, MINN.

Retail, wholesale, and service establishments located in Wilkin County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.8 million, an increase of 252 percent over the \$2.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$13.0 million in 1948 as compared with \$2.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$195,000 in 1948 compared with \$130,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 470 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 319 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wilkin County, Minnesota, which also includes data for the city of Breckenridge. Final figures, superseding the preliminary data for Wilkin County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wilkin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release April 27, 1950

Release Series BC-1P-22-085

WINONA COUNTY, MINN.

Retail, wholesale, and service establishments located in Winona County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$37.0 million, an increase of 174 percent over the \$13.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$25.5 million in 1948 as compared with \$6.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.6 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,700 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,859 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Winona County, Minnesota, which also includes data for the city of Winona. Final figures, superseding the preliminary data for Winona County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Winona County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 22-086

WRIGHT COUNTY, MINN.

Retail, wholesale, and service establishments located in Wright County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$24.2 million, an increase of 272 percent over the \$6.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.3 million in 1948 as compared with \$2.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$554,000 in 1948 compared with \$201,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,138 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 643 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wright County, Minnesota. Final figures, superseding the preliminary data for Wright County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wright County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

YELLOW MEDICINE COUNTY, MINN.

Retail, wholesale, and service establishments located in Yellow Medicine County, Minnesota, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$14.8 million, an increase of 229 percent over the \$4.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$14.3 million in 1948 as compared with \$3.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$370,000 in 1948 compared with \$196,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 771 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 483 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Yellow Medicine County, Minnesota. Final figures, superseding the preliminary data for Yellow Medicine County, will be included in a Bulletin for the State of Minnesota to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. Release Series BC-1P-23-000

MISSISSIPPI

Retail, wholesale, and service establishments located in Mississippi showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the State during 1948 aggregated \$992.7 million, an increase of 252 percent over the \$282.4 million sales in 1939, when the preceding Census of Business was taken. Wholesale sales volume in the State showed a 299 percent rise over the same period, reaching a total of \$977.5 million in 1948 as compared with \$245.2 million in 1939. The service trades included in the Census of Business reported receipts totaling \$47.1 million in 1948 compared with \$13.0 million in 1939. Hotel receipts moved from \$4.2 million in 1939 to \$10.9 million in 1948. Amusement businesses in the State recorded receipts of \$11.3 million in 1948 compared with \$4.7 million in 1939.

Employment in the State also rose over the 9-year period between 1939 and 1948 for the trades covered by the Census of Business. Retail trade establishments reported 54,605 paid employees for the workweek ended nearest November 15, 1948. Of these, 44,692 worked the full week, and the remainder part of the week. The comparable total and full workweek figures for 1939 were 34,884 and 27,582. Wholesale trade establishments reported a total of 13,957 full- and part-week employees for the week of November 15, 1948, compared with 7,270 for the same week in 1939. For the selected service trades, November 15, 1948, paid employees numbered 11,291; the comparable figure for 1939, adjusted for change in scope between the two Censuses, was 6,336.

These preliminary figures have been compiled from similar releases being made available for each county in Mississippi. Final figures, superseding the preliminary data for Mississippi, will be included in a State Bulletin to be issued in several months. Similar data will be made available in preliminary and final form for each of the States.

A single copy of the preliminary release for the State of Mississippi as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

ADAMS COUNTY, MISS.

Retail, wholesale, and service establishments located in Adams County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.3 million, an increase of 309 percent over the \$5.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$24.3 million in 1948 as compared with \$4.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.3 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,350 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,374 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Adams County, Mississippi, which also includes data for the city of Natchez. Final figures, superseding the preliminary data for Adams County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Adams County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

ALCORN COUNTY, MISS.

Retail, wholesale, and service establishments located in Alcorn County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.6 million, an increase of 247 percent over the \$4.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$11.7 million in 1948 as compared with \$3.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$735,000 in 1948 compared with \$242,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,250 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 823 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Alcorn County, Mississippi, which also includes data for the city of Corinth. Final figures, superseding the preliminary data for Alcorn County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Alcorn County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

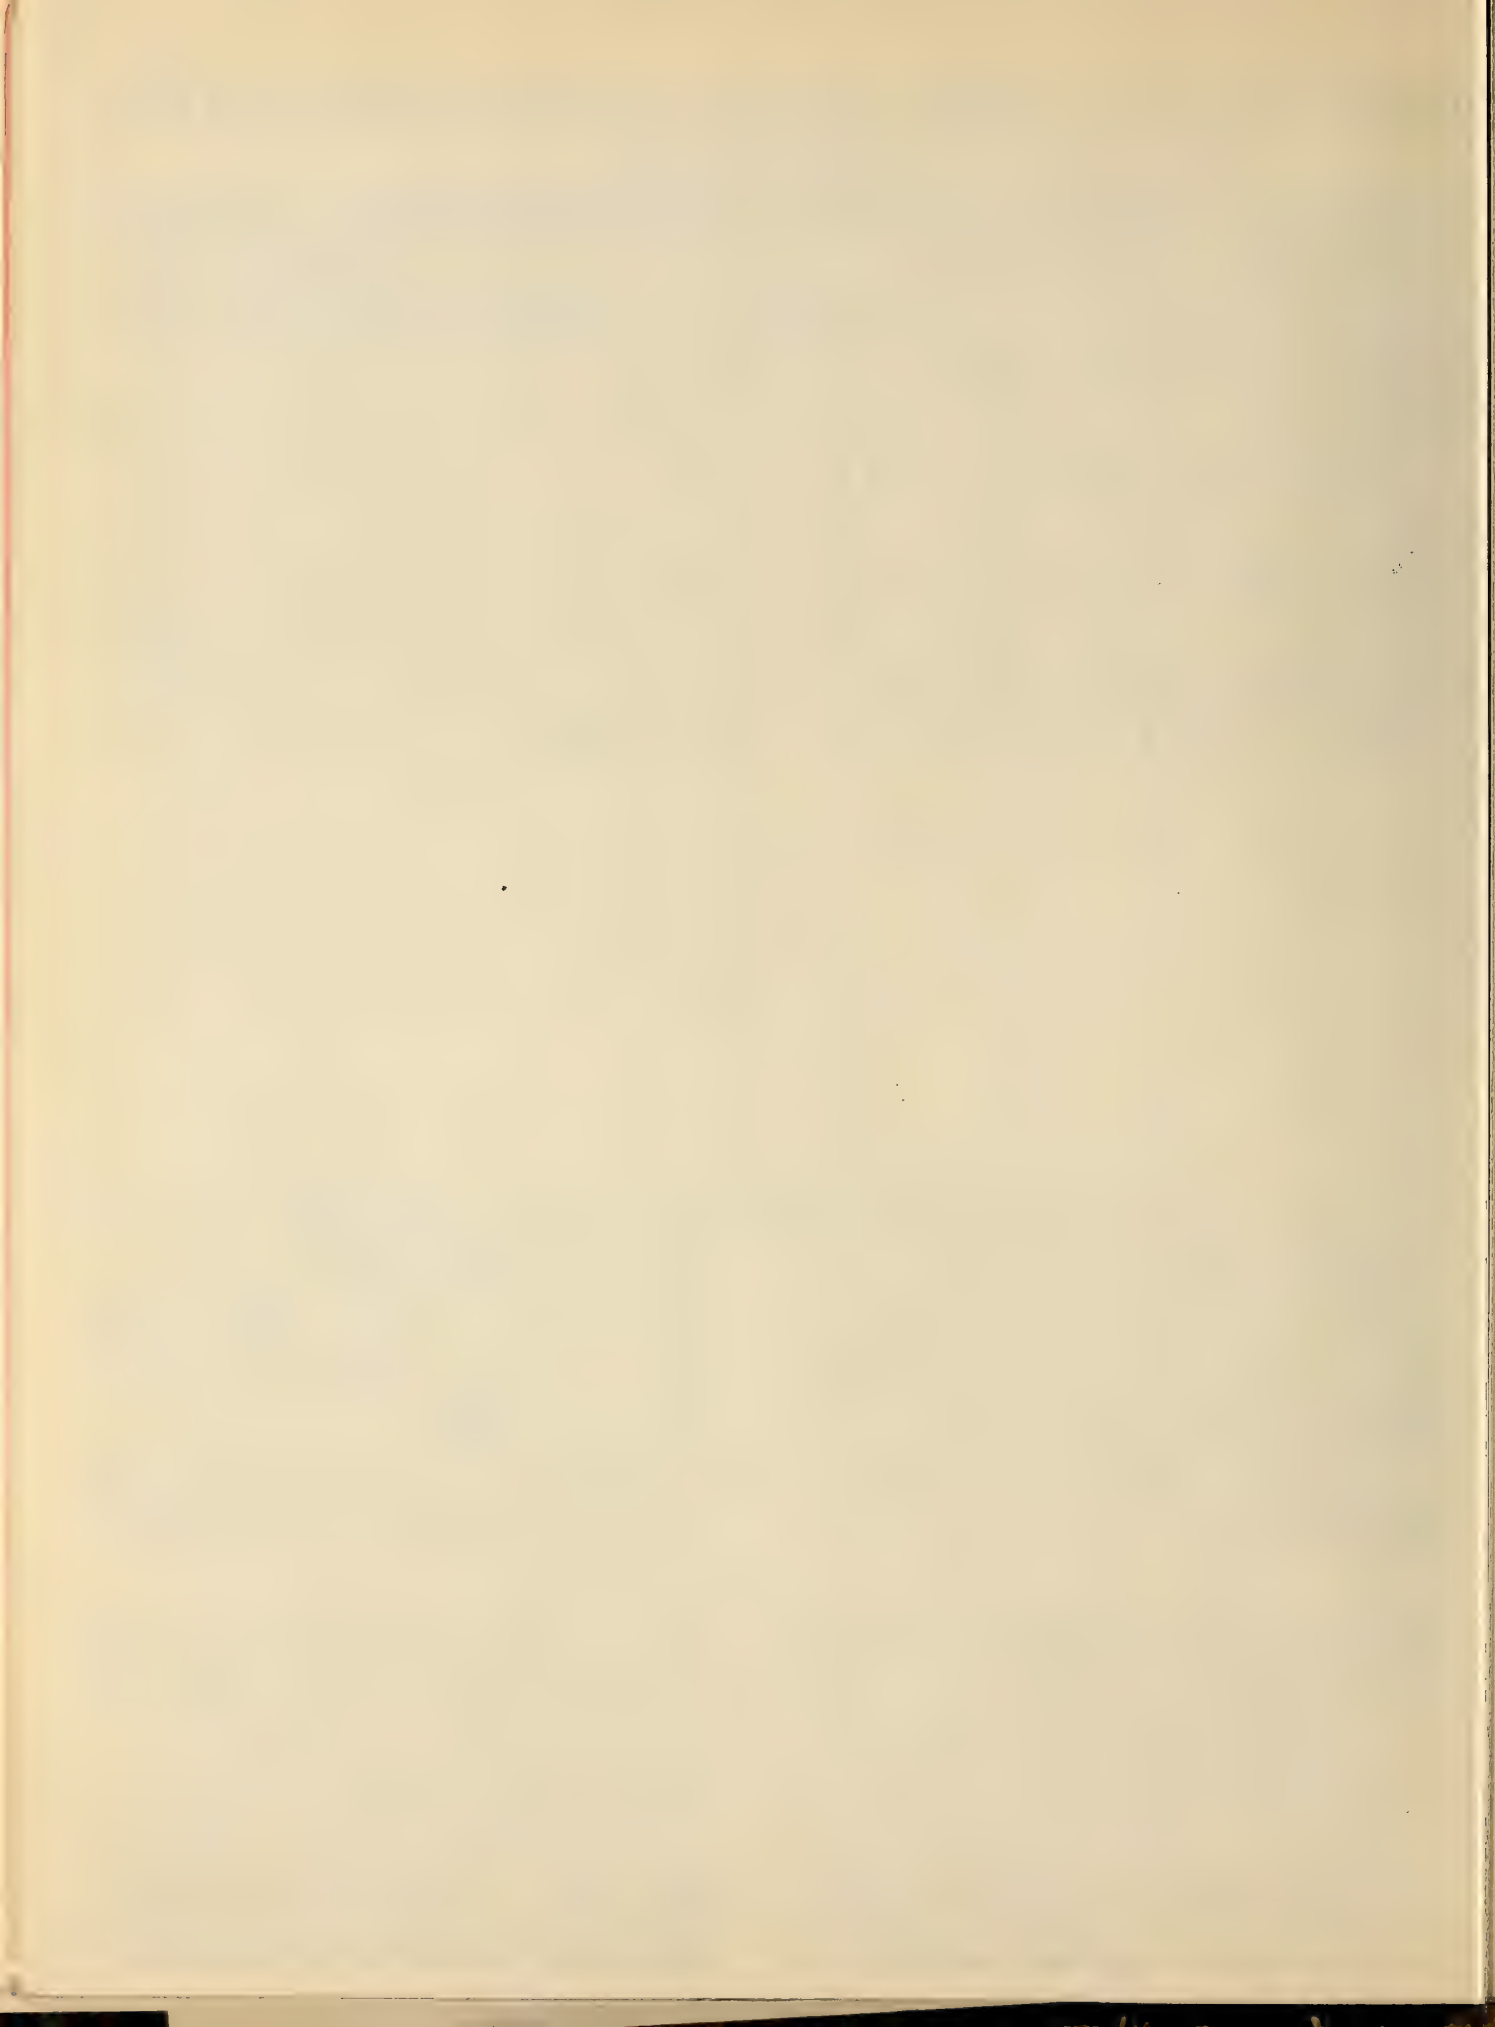

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

AMITE COUNTY, MISS.

Retail, wholesale, and service establishments located in Amite County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.7 million, an increase of 418 percent over the \$1.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.5 million in 1948. No comparable figures for 1939 are available. The service trades included in the Census of Business recorded receipts totaling \$119,000 in 1948 compared with \$28,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 242 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 122 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Amite County, Mississippi. Final figures, superseding the preliminary data for Amite County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Amite County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

ATTALA COUNTY, MISS.

Retail, wholesale, and service establishments located in Attala County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.3 million, an increase of 273 percent over the \$3.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.1 million in 1948 as compared with \$1.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$598,000 in 1948 compared with \$126,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 734 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 492 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Attala County, Mississippi, which also includes data for the city of Kosciusko. Final figures, superseding the preliminary data for Attala County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Attala County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1938, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BENTON COUNTY, MISS.

Retail and service establishments located in Benton County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$1.1 million, an increase of 267 percent over the \$0.3 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$54,000 in 1948 compared with \$9,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 30 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 25 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Benton County, Mississippi. Final figures, superseding the preliminary data for Benton County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Benton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BOLIVAR COUNTY, MISS.

Retail, wholesale, and service establishments located in Bolivar County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.0 million, an increase of 206 percent over the \$8.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$31.1 million in 1948 as compared with \$6.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$927,000 in 1948 compared with \$293,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,760 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,254 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Bolivar County, Mississippi, which also includes data for the city of Cleveland. Final figures, superseding the preliminary data for Bolivar County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Bolivar County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

CARROLL COUNTY, MISS.

Retail and service establishments located in Carroll County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.7 million, an increase of 170 percent over the \$1.0 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$53,000 in 1948 compared with \$29,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 134 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 115 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Carroll County, Mississippi. Final figures, superseding the preliminary data for Carroll County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Carroll County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-009

CHICKASAW COUNTY, MISS.

Retail and service establishments located in Chickasaw County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.0 million, an increase of 253 percent over the \$1.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$233,000 in 1948 compared with \$80,000 in 1939. Wholesale sales showed little change in dollar volume between 1939 and 1948, with approximately \$1.3 million being reported for each year.

Employment in the county rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 399 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 286 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Chickasaw County, Mississippi. Final figures, superseding the preliminary data for Chickasaw County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Chickasaw County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

Release Series BC-1P-23-010

CHOCTAW COUNTY, MISS.

Retail, wholesale, and service establishments located in Choctaw County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.6 million, an increase of 225 percent over the \$0.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$822,000 in 1948 as compared with \$310,000 in 1939. The service trades included in the Census of Business recorded receipts totaling \$78,000 in 1948 compared with \$43,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 172 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 106 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Choctaw County, Mississippi. Final figures, superseding the preliminary data for Choctaw County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Choctaw County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-011

CLAIBORNE COUNTY, MISS.

Retail, wholesale, and service establishments located in Claiborne County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.4 million, an increase of 214 percent over the \$1.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.9 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$183,000 in 1948 compared with \$56,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 334 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 198 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Claiborne County, Mississippi, which also includes data for the city of Port Gibson. Final figures, superseding the preliminary data for Claiborne County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Claiborne County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

CLAY COUNTY, MISS.

Retail, wholesale, and service establishments located in Clay County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.3 million, an increase of 232 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.5 million in 1948 as compared with \$0.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$362,000 in 1948 compared with \$50,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 551 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 362 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Clay County, Mississippi, which also includes data for the city of West Point. Final figures, superseding the preliminary data for Clay County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Clay County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$600 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE

PRELIMINARY

For Release March 30, 1950

Release Series BC-1P-23-014

COAHOMA COUNTY, MISS.

Retail, wholesale, and service establishments located in Coahoma County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.0 million, an increase of 221 percent over the \$8.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$51.6 million in 1948 as compared with \$15.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.6 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,945 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,536 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Coahoma County, Mississippi, which also includes data for the city of Clarksdale. Final figures, superseding the preliminary data for Coahoma County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Coahoma County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release March 27, 1950

Release Series BC-1P-23-015

COPIAH COUNTY, MISS.

Retail, wholesale, and service establishments located in Copiah County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.2 million, an increase of 187 percent over the \$3.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.6 million in 1948 as compared with \$1.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$389,000 in 1948 compared with \$166,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 854 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 571 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Copiah County, Mississippi, which also includes data for the cities of Crystal Springs and Hazlehurst. Final figures supporting the preliminary data for Copiah County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Copiah County as well as an order blank for other releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs, and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release March 27, 1950

Release Series BC-1P-23-016

COVINGTON COUNTY, MISS.

Retail and service establishments located in Covington County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.1 million, an increase of 264 percent over the \$1.4 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$101,000 in 1948 compared with \$61,000 in 1939. Wholesale sales in the county reached a total of \$1.4 million in 1948. No comparable figures for 1939 are available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the retail and service trades. Establishments in these trades reported a combined total of 226 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 134 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Covington County, Mississippi. Final figures, superseding the preliminary data for Covington County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Covington County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

Release Series BC-1P-23-017

DE SOTO COUNTY, MISS.

Retail, wholesale, and service establishments located in De Soto County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.7 million, an increase of 200 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$884,000 in 1948 as compared with \$294,000 in 1939. The service trades included in the Census of Business recorded receipts totaling \$210,000 in 1948 compared with \$63,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 298 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 215 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on De Soto County, Mississippi. Final figures, superseding the preliminary data for De Soto County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for De Soto County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

BUREAU OF THE CENSUS

PRELIMINARY

For Release March 27, 1950

Release Series BC-1P-23-018

FORREST COUNTY, MISS.

Retail, wholesale, and service establishments located in Forest County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$37.3 million, an increase of 314 percent over the \$9.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$28.1 million in 1948 as compared with \$7.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.6 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,504 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,814 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Forrest County, Mississippi, which also includes data for the city of Hattiesburg. Final figures, superseding the preliminary data for Forrest County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Forrest County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-019

FRANKLIN COUNTY, MISS.

Retail and service establishments located in Franklin County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.6 million, an increase of 300 percent over the \$0.9 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$47,000 in 1948 compared with \$17,000 in 1939. Wholesale sales in the county reached a total of \$703,000 in 1948. No comparable figures for 1939 are available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for retail and service trades. Establishments in these trades reported a combined total of 172 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 83 employees reported for the week of November 15, 1939. Wholesale trade establishments reported a total of 17 paid employees for the week of November 15, 1948.

These preliminary figures have been derived from a Census report on Franklin County, Mississippi. Final figures, superseding the preliminary data for Franklin County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Franklin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

GEORGE COUNTY, MISS.

Retail, wholesale, and service establishments located in George County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.9 million, an increase of 290 percent over the \$1.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.1 million in 1948 as compared with \$0.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$43,000 in 1948 compared with \$23,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 216 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 101 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on George County, Mississippi. Final figures, superseding the preliminary data for George County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for George County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-021

GREENE COUNTY, MISS.

Retail and service establishments located in Greene County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.2 million, an increase of 214 percent over the \$0.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$53,000 in 1948 compared with \$8,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 102 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 57 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Greene County, Mississippi. Final figures, superseding the preliminary data for Greene County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Greene County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release March 27, 1950

Release Series BC-1P-23-022

GRENADA COUNTY, MISS.

Retail, wholesale, and service establishments located in Grenada County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.4 million, an increase of 262 percent over the \$2.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.9 million in 1948 compared with \$1.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$614,000 in 1948 compared with \$158,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 794 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 417 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Grenada County, Mississippi, which also includes data for the city of Grenada. Final figures, superseding the preliminary data for Grenada County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Grenada County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these services as well as other changes in the standard classification may

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Censuses of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in the business by employees of the reporting establishment.

Release Series BC-1P-23-023

HANCOCK COUNTY, MISS.

Retail, wholesale, and service establishments located in Hancock County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.2 million, an increase of 300 percent over the \$1.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.7 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$129,000 in 1948 compared with \$47,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 351 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 183 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Hancock County, Mississippi, which also includes data for the city of Bay St. Louis. Final figures, superseding the preliminary data for Hancock County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hancock County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

HARRISON COUNTY, MISS.

Retail, wholesale, and service establishments located in Harrison County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$51.2 million, an increase of 353 percent over the \$11.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$28.3 million in 1948 as compared with \$6.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.7 million in 1948 compared with \$0.7 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 4,449 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,412 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Harrison County, Mississippi, which also includes data for the cities of Biloxi, Gulfport, and Pass Christian. Final figures, superseding the preliminary data for Harrison County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Harrison County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-025

HINDS COUNTY, MISS.

Retail, wholesale, and service establishments located in Hinds County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$111.3 million, an increase of 248 percent over the \$32.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$161.9 million in 1948 as compared with \$38.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$8.1 million in 1948 compared with \$2.2 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 12,284 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 7,278 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Hinds County, Mississippi, which also includes data for the city of Jackson. Final figures, superseding the preliminary data for Hinds County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Hinds County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-026

HOLMES COUNTY, MISS.

Retail, wholesale, and service establishments located in Holmes County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.4 million, an increase of 202 percent over the \$4.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$16.4 million in 1948 as compared with \$3.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$446,000 in 1948 compared with \$90,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 872 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 604 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Holmes County, Mississippi, which also includes data for the cities of Durant and Lexington. Final figures, superseding the preliminary data for Holmes County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Holmes County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

HUMPHREYS COUNTY, MISS.

Retail, wholesale, and service establishments located in Humphreys County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.1 million, an increase of 264 percent over the \$2.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$5.1 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$221,000 in 1948 compared with \$116,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 549 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 340 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Humphreys County, Mississippi, which also includes data for the city of Belzoni. Final figures, superseding the preliminary data for Humphreys County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Humphreys County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

ISSAQUENA COUNTY, MISS.

Retail establishments located in Issaquena County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$655,000, an increase of 123 percent over the \$294,000 in 1939, when the preceding Census of Business was taken.

Employment in the county decreased over the 9-year period between 1939 and 1948 for the above trade. Retail establishments reported a total of 19 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 25 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Issaquena County, Mississippi. Final figures, superseding the preliminary data for Issaquena County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Issaquena County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

ITAWAMBA COUNTY, MISS.

Retail and service establishments located in Itawamba County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.5 million, an increase of 257 percent over the \$0.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$86,000 in 1948 compared with \$42,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 148 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 89 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Itawamba County, Mississippi. Final figures, superseding the preliminary data for Itawamba County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Itawamba County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release May 15, 1950

Release Series BC-1P-23-030

JACKSON COUNTY, MISS.

Retail, wholesale, and service establishments located in Jackson County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.8 million, an increase of 427 percent over the \$3.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.5 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$855,000 in 1948 compared with \$115,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,117 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 422 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jackson County, Mississippi, which also includes data for the cities of Moss Point and Pascagoula. Final figures, superseding the preliminary data for Jackson County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jackson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

JASPER COUNTY, MISS.

Retail and service establishments located in Jasper County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.1 million, an increase of 193 percent over the \$1.4 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$152,000 in 1948 compared with \$35,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 183 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 125 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jasper County, Mississippi. Final figures, superseding the preliminary data for Jasper County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jasper County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

JEFFERSON DAVIS COUNTY, MISS.

Retail and service establishments located in Jefferson Davis County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.9 million, an increase of 277 percent over the \$1.3 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$173,000 in 1948 compared with \$58,000 in 1939.

Employment in the county also rose over 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 265 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 128 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jefferson Davis County, Mississippi. Final figures, superseding the preliminary data for Jefferson Davis County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jefferson Davis County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release March 30, 1950

Release Series BC-1P- 23-034

JONES COUNTY, MISS.

Retail, wholesale, and service establishments located in Jones County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$33.3 million, an increase of 292 percent over the \$8.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$20.2 million in 1948 as compared with \$4.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.2 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,928 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,577 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Jones County, Mississippi, which also includes data for the cities of Ellisville and Laurel. Final figures, superseding the preliminary data for Jones County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Jones County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

KEMPER COUNTY, MISS.

Retail establishments located in Kemper County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.6 million, an increase of 227 percent over the \$1.1 million in 1939, when the preceding Census of Business was taken.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trade. Retail establishments reported a total of 118 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 108 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Kemper County, Mississippi. Final figures, superseding the preliminary data for Kemper County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Kemper County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LAFAYETTE COUNTY, MISS.

Retail, wholesale, and service establishments located in Lafayette County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.1 million, an increase of 279 percent over the \$2.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.6 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$323,000 in 1948 compared with \$99,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 664 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 350 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lafayette County, Mississippi, which also includes data for the city of Oxford. Final figures, superseding the preliminary data for Lafayette County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lafayette County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-037

LAMAR COUNTY, MISS.

Retail and service establishments located in Lamar County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.5 million, an increase of 400 percent over the \$0.7 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$162,000 in 1948 compared with \$25,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 180 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 71 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lamar County, Mississippi. Final figures, superseding the preliminary data for Lamar County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lamar County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.--The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups--personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.--For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.--"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.--"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.--"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 10, 1950

Release Series BC-1P-23-038

LAUDERDALE COUNTY, MISS.

Retail and service establishments located in Lauderdale County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$42.1 million, an increase of 229 percent over the \$12.8 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$3.2 million in 1948 compared with \$0.8 million in 1939. Wholesale sales in the county reached a total of \$65.4 million in 1948. No comparable figures for 1939 are available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the retail and service trades. Establishments in these trades reported a combined total of 3,562 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,222 employees reported for the week of November 15, 1939. Wholesale establishments reported a total of 1,166 paid employees for the week of November 15, 1948.

These preliminary figures have been derived from a Census report on Lauderdale County, Mississippi, which also includes data for the city of Meridian. Final figures, superseding the preliminary data for Lauderdale County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lauderdale County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 23-039

LAWRENCE COUNTY, MISS.

Retail and service establishments located in Lawrence County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.2 million, an increase of 282 percent over the \$1.1 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$62,000 in 1948 compared with \$19,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 176 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 127 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lawrence County, Mississippi. Final figures, superseding the preliminary data for Lawrence County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lawrence County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LEAKE COUNTY, MISS.

Retail, wholesale, and service establishments located in Leake County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.5 million, an increase of 150 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.8 million in 1948 as compared with \$0.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$159,000 in 1948 compared with \$58,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 296 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 182 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Leake County, Mississippi. Final figures, superseding the preliminary data for Leake County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Leake County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LEE COUNTY, MISS.

Retail, wholesale, and service establishments located in Lee County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$23.2 million, an increase of 280 percent over the \$6.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$49.0 million in 1948 as compared with \$7.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.2 million in 1948 compared with \$0.2 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,171 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,073 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lee County, Mississippi, which also includes data for the city of Tupelo. Final figures, superseding the preliminary data for Lee County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

LEFLORE COUNTY, MISS.

Retail, wholesale, and service establishments located in Leflore County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$33.5 million, an increase of 245 percent over the \$9.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$131.8 million in 1948 as compared with \$42.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$1.3 million in 1948 compared with \$0.4 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 2,698 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,877 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Leflore County, Mississippi, which also includes data for the city of Greenwood. Final figures, superseding the preliminary data for Leflore County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Leflore County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 13, 1950

Release Series BC-1P-23-043

LINCOLN COUNTY, MISS.

Retail, wholesale, and service establishments located in Lincoln County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.5 million, an increase of 319 percent over the \$3.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.8 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$969,000 in 1948 compared with \$279,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,215 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 648 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lincoln County, Mississippi, which also includes data for the city of Brookhaven. Final figures, superseding the preliminary data for Lincoln County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lincoln County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PRELIMINARY

For Release March 30, 1950

Release Series BC-1P-23-044

LOWNDES COUNTY, MISS.

Retail, wholesale, and service establishments located in Lowndes County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$19.5 million, an increase of 236 percent over the \$5.8 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$19.1 million in 1948 as compared with \$5.6 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$955,000 in 1948 compared with \$211,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,916 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,212 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Lowndes County, Mississippi, which also includes data for the city of Columbus. Final figures, superseding the preliminary data for Lowndes County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Lowndes County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

MADISON COUNTY, MISS.

Retail, wholesale, and service establishments located in Madison County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.9 million, an increase of 261 percent over the \$3.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.7 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$480,000 in 1948 compared with \$119,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 851 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 494 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Madison County, Mississippi, which also included data for the city of Canton. Final figures, superseding the preliminary data for Madison County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Madison County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

MARION COUNTY, MISS.

Retail, wholesale, and service establishments located in Marion County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.2 million, an increase of 219 percent over the \$3.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.6 million in 1948 as compared with \$1.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$498,000 in 1948 compared with \$163,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 860 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 539 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Marion County, Mississippi, which also includes data for the city of Columbia. Final figures, superseding the preliminary data for Marion County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Marion County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-047

MARSHALL COUNTY, MISS.

Retail, wholesale, and service establishments located in Marshall County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.3 million, an increase of 232 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.1 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$182,000 in 1948 compared with \$66,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 420 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 239 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Marshall County, Mississippi, which also includes data for the city of Holly Springs. Final figures, superseding the preliminary data for Marshall County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Marshall County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

MONROE COUNTY, MISS.

Retail, wholesale, and service establishments located in Monroe County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$12.7 million, an increase of 176 percent over the \$4.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.1 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$448,000 in 1948 compared with \$123,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,027 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 650 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Monroe County, Mississippi, which also includes data for the cities of Aberdeen and Amory. Final figures, superseding the preliminary data for Monroe County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Monroe County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

MONTGOMERY COUNTY, MISS.

Retail, wholesale, and service establishments located in Montgomery County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.7 million, an increase of 235 percent over the \$1.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.8 million in 1948 as compared with \$1.1 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$250,000 in 1948 compared with \$78,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 420 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 242 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Montgomery County, Mississippi, which also includes data for the city of Winona. Final figures, superseding the preliminary data for Montgomery County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Montgomery County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

NESHOBA COUNTY, MISS.

Retail, wholesale, and service establishments located in Neshoba County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$9.1 million, an increase of 250 percent over the \$2.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.9 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$476,000 in 1948 compared with \$97,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 678 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 395 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Neshoba County, Mississippi, which also includes data for the city of Philadelphia. Final figures, superseding the preliminary data for Neshoba County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Neshoba County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-051

NEWTON COUNTY, MISS.

Retail, wholesale, and service establishments located in Newton County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.6 million, an increase of 274 percent over the \$2.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.5 million in 1948 as compared with \$1.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$441,000 in 1948 compared with \$68,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 544 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 324 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Newton County, Mississippi. Final figures, superseding the preliminary data for Newton County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Newton County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

NOXUBEE COUNTY, MISS.

Retail, wholesale, and service establishments located in Noxubee County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.8 million, an increase of 209 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$5.3 million in 1948 as compared with \$1.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$199,000 in 1948 compared with \$55,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 447 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 280 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Noxubee County, Mississippi. Final figures, superseding the preliminary data for Noxubee County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Noxubee County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D.C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-053

OKTIBBEHA COUNTY, MISS.

Retail, wholesale, and service establishments located in Oktibbeha County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.2 million, an increase of 228 percent over the \$2.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.3 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$352,000 in 1948 compared with \$94,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 618 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 394 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Oktibbeha County, Mississippi, which also includes data for the city of Starkville. Final figures, superseding the preliminary data for Oktibbeha County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Oktibbeha County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

PANOLA COUNTY, MISS.

Retail, wholesale, and service establishments located in Panola County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$13.0 million, an increase of 225 percent over the \$4.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.3 million in 1948 as compared with \$2.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$453,000 in 1948 compared with \$80,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 752 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 481 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Panola County, Mississippi. Final figures, superseding the preliminary data for Panola County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Panola County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PEARL RIVER COUNTY, MISS.

Retail, wholesale, and service establishments located in Pearl River County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$10.3 million, an increase of 255 percent over the \$2.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.2 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$281,000 in 1948 compared with \$115,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 752 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 407 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pearl River County, Mississippi, which also includes data for the city of Picayune. Final figures, superseding the preliminary data for Pearl River County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pearl River County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

PIKE COUNTY, MISS.

Retail, wholesale, and service establishments located in Pike County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$20.0 million, an increase of 233 percent over the \$6.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.1 million in 1948 as compared with \$2.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$817,000 in 1948 compared with \$323,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,476 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,109 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pike County, Mississippi, which also includes data for the city of McComb. Final figures, superseding the preliminary data for Pike County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

PONTOTOC COUNTY, MISS.

Retail, wholesale, and service establishments located in Pontotoc County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.3 million, an increase of 294 percent over the \$1.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$8.2 million in 1948 as compared with \$0.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$157,000 in 1948 compared with \$52,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 323 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 221 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Pontotoc County, Mississippi. Final figures, superseding the preliminary data for Pontotoc County will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Pontotoc County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-059

PRENTISS COUNTY, MISS.

Retail, wholesale, and service establishments located in Prentiss County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.8 million, an increase of 258 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.6 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$286,000 in 1948 compared with \$65,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 470 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 254 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Prentiss County, Mississippi. Final figures, superseding the preliminary data for Prentiss County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Prentiss County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. QUITMAN COUNTY, MISS.

Retail, wholesale, and service establishments located in Quitman County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.3 million, an increase of 277 percent over the \$2.2 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.3 million in 1948 as compared with \$1.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$223,000 in 1948 compared with \$108,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 487 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 369 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Quitman County, Mississippi. Final figures, superseding the preliminary data for Quitman County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Quitman County, as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

RANKIN COUNTY, MISS.

Retail and service establishments located in Rankin County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.8 million, an increase of 263 percent over the \$1.6 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$184,000 in 1948 compared with \$28,000 in 1939. Wholesale sales in the county reached a total of \$1.4 million in 1948. No comparable figures for 1939 are available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for retail and service trades. Establishments in these trades reported a combined total of 239 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 151 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Rankin County, Mississippi. Final figures, superseding the preliminary data for Rankin County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Rankin County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

SCOTT COUNTY, MISS.

Retail, wholesale, and service establishments located in Scott County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$11.8 million, an increase of 293 percent over the \$3.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.4 million in 1948 as compared with \$1.2 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$370,000 in 1948 compared with \$95,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 636 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 385 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Scott County, Mississippi, which also includes data for the city of Forest. Final figures, superseding the preliminary data for Scott County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Scott County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

SHARKEY COUNTY, MISS.

Retail, wholesale, and service establishments located in Sharkey County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.4 million, an increase of 184 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$2.0 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$129,000 in 1948 compared with \$24,000 in 1939.

Employment in the county decreased over the 9-year period between 1939 and 1948 for retail trade. Establishments in this trade reported a total of 224 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 264 employees reported for the week of November 15, 1939. Wholesale trade establishments reported 32 paid employees for the week of November 15, 1948, an increase over the 12 reported for the same week in 1939. For the selected service trades, November 15, 1948 paid employees numbered 29; the comparable figure for 1939, adjusted for change in scope between the two censuses, was 18.

These preliminary figures have been derived from a Census report on Sharkey County, Mississippi. Final figures, superseding the preliminary data for Sharkey County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Sharkey County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 13, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter: Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

SIMPSON COUNTY, MISS.

Retail, wholesale, and service establishments located in Simpson County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.4 million, an increase of 276 percent over the \$1.7 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$4.2 million in 1948 as compared with \$0.5 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$189,000 in 1948 compared with \$72,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 421 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 163 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Simpson County, Mississippi. Final figures, superseding the preliminary data for Simpson County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Simpson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

SMITH COUNTY, MISS.

Retail and service establishments located in Smith County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$2.9 million, an increase of 190 percent over the \$1.0 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$72,000 in 1948 compared with \$18,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 148 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 78 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Smith County, Mississippi. Final figures, superseding the preliminary data for Smith County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Smith County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

STONE COUNTY, MISS.

Retail and service establishments located in Stone County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.6 million, an increase of 350 percent over the \$0.8 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$60,000 in 1948 compared with \$28,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 167 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 79 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Stone County, Mississippi. Final figures, superseding the preliminary data for Stone County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Stone County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 23-067

SUNFLOWER COUNTY, MISS.

Retail, wholesale, and service establishments located in Sunflower County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$21.0 million, an increase of 250 percent over the \$6.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$26.5 million in 1948 as compared with \$6.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$612,000 in 1948 compared with \$161,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,361 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 847 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Sunflower County, Mississippi, which also includes data for the city of Indianola. Final figures, superseding the preliminary data for Sunflower County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Sunflower County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-068

TALLAHATCHIE COUNTY, MISS.

Retail, wholesale, and service establishments located in Tallahatchie County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.3 million, an increase of 232 percent over the \$2.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.8 million in 1948 as compared with \$0.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$297,000 in 1948 compared with \$90,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 484 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 291 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tallahatchie County, Mississippi. Final figures, superseding the preliminary data for Tallahatchie County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tallahatchie County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

TATE COUNTY, MISS.

Retail, wholesale, and service establishments located in Tate County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.5 million, an increase of 306 percent over the \$1.6 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.4 million in 1948 as compared with \$0.4 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$198,000 in 1948 compared with \$57,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 367 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 232 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tate County, Mississippi. Final figures, superseding the preliminary data for Tate County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tate County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

TIPPAAH COUNTY, MISS.

Retail, wholesale, and service establishments located in Tippah County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.9 million, an increase of 227 percent over the \$1.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.8 million in 1948 as compared with \$0.7 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$191,000 in 1948 compared with \$68,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 273 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 170 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tippah County, Mississippi. Final figures, superseding the preliminary data for Tippah County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tippah County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

TISHOMINGO COUNTY, MISS.

Retail and service establishments located in Tishomingo County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$3.2 million, an increase of 256 percent over the \$0.9 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$98,000 in 1948 compared with \$23,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 169 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 89 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tishomingo County, Mississippi. Final figures, superseding the preliminary data for Tishomingo County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tishomingo County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

PRELIMINARY

For Release April 3, 1950

Release Series BC-1P-23-072

TUNICA COUNTY, MISS.

Retail and wholesale establishments located in Tunica County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.5 million, an increase of 171 percent over the \$2.4 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of 3.3 million in 1948 as compared with \$1.1 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 407 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 334 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Tunica County, Mississippi. Final figures, superseding the preliminary data for Tunica County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Tunica County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-073

UNION COUNTY, MISS.

Retail, wholesale, and service establishments located in Union County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$7.1 million, an increase of 255 percent over the \$2.0 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$6.8 million in 1948 as compared with \$2.0 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$332,000 in 1948 compared with \$68,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 506 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 317 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Union County, Mississippi, which also includes data for the city of New Albany. Final figures, superseding the preliminary data for Union County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Union County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

WALTHALL COUNTY, MISS.

Retail and service establishments located in Walthall County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.1 million, an increase of 116 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$140,000 in 1948 compared with \$55,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 267 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 156 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Walthall County, Mississippi. Final figures, superseding the preliminary data for Walthall County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Walthall County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P- 23-075

WARREN COUNTY, MISS.

Retail and service establishments located in Warren County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$26.5 million, an increase of 219 percent over the \$8.3 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$1.6 million in 1948 compared with \$0.6 million in 1939. Wholesale sales in the county reached a total of \$19.7 million in 1948. No comparable figures for 1939 are available.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the retail and service trades. Establishments in these trades reported a combined total of 2,195 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 1,580 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Warren County, Mississippi, which also includes data for the city of Vicksburg. Final figures, superseding the preliminary data for Warren County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Warren County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

BUREAU OF THE CENSUS

PRELIMINARY

For Release April 12, 1950

Release Series BC-1P-23-076

WASHINGTON COUNTY, MISS.

Retail, wholesale, and service establishments located in Washington County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$41.9 million, an increase of 252 percent over the \$11.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$98.9 million in 1948 as compared with \$14.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$2.0 million in 1948 compared with \$0.5 million in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 3,574 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 2,059 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Washington County, Mississippi, which also includes data for the cities of Greenville and Leland. Final figures, superseding the preliminary data for Washington County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Washington County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

1948 CENSUS OF BUSINESS

RETAIL, WHOLESALE, SERVICE TRADES

BUREAU OF THE CENSUS

PRELIMINARY

For Release March 27, 1950

Release Series BC-1P-23-077

WAYNE COUNTY, MISS.

Retail, wholesale, and service establishments located in Wayne County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.9 million, an increase of 277 percent over the \$1.3 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.3 million in 1948 as compared with \$0.3 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$153,000 in 1948 compared with \$50,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 323 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 202 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wayne County, Mississippi. Final figures, superseding the preliminary data for Wayne County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wayne County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

6-2-48

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have a considerable effect in comparing

1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

WEBSTER COUNTY, MISS.

Retail and service establishments located in Webster County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$4.9 million, an increase of 206 percent over the \$1.6 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$98,000 in 1948 compared with \$60,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 221 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 187 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Webster County, Mississippi. Final figures, superseding the preliminary data for Webster County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Webster County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

WILKINSON COUNTY, MISS.

Retail and service establishments located in Wilkinson County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$5.7 million, an increase of 185 percent over the \$2.0 million in 1939, when the preceding Census of Business was taken. The service trades included in the Census of Business recorded receipts totaling \$208,000 in 1948 compared with \$51,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 376 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 261 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Wilkinson County, Mississippi. Final figures, superseding the preliminary data for Wilkinson County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Wilkinson County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

WINSTON COUNTY, MISS.

Retail, wholesale, and service establishments located in Winston County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$8.2 million, an increase of 290 percent over the \$2.1 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$3.4 million in 1948 as compared with \$0.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$326,000 in 1948 compared with \$46,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 568 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 305 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Winston County, Mississippi, which also includes data for the city of Louisville. Final figures, superseding the preliminary data for Winston County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Winston County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-081

YALOBUSHA COUNTY, MISS.

Retail, wholesale, and service establishments located in Yalobusha County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$6.1 million, an increase of 221 percent over the \$1.9 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$1.1 million in 1948 as compared with \$0.8 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$186,000 in 1948 compared with \$101,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 409 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 320 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Yalobusha County, Mississippi, which also includes data for the city of Water Valley. Final figures, superseding the preliminary data for Yalobusha County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Yalobusha County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1936, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as

other changes in the standard classification may have a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.

Release Series BC-1P-23-082

YAZOO COUNTY, MISS.

Retail, wholesale, and service establishments located in Yazoo County, Mississippi, showed a substantial expansion in dollar volume of trade from 1939 to 1948 according to preliminary figures from the 1948 Census of Business released today by the Bureau of the Census, U. S. Department of Commerce.

Retail sales in the county during 1948 aggregated \$15.1 million, an increase of 236 percent over the \$4.5 million in 1939, when the preceding Census of Business was taken. Wholesale sales in the county reached a total of \$12.9 million in 1948 as compared with \$1.9 million in 1939. The service trades included in the Census of Business recorded receipts totaling \$625,000 in 1948 compared with \$170,000 in 1939.

Employment in the county also rose over the 9-year period between 1939 and 1948 for the above trades. Establishments in these trades reported a combined total of 1,159 paid employees for the workweek ended nearest November 15, 1948. This compared with a total of 732 employees reported for the week of November 15, 1939.

These preliminary figures have been derived from a Census report on Yazoo County, Mississippi, which also includes data for the city of Yazoo. Final figures, superseding the preliminary data for Yazoo County, will be included in a Bulletin for the State of Mississippi to be issued in several months. Similar data will be made available this year in preliminary and final form for each of the counties and States. A single copy of the preliminary release for Yazoo County as well as an order blank for other area releases may be obtained by writing to the Bureau of the Census, Washington 25, D. C.

GENERAL DESCRIPTION OF PRELIMINARY RELEASES FOR THE 1948 CENSUS OF BUSINESS

This series of releases, of which one is planned for each county in the United States, presents preliminary results of the 1948 Census of Business. The information is based on reports submitted by business establishments for that Census. The figures shown are preliminary, and are subject to revision in the final Census publications, but the changes are expected to be relatively minor with respect to coverage. The final Census figures will be issued in a series of Business Census bulletins which will show additional detailed kind-of-business information for all places where there are a sufficient number of establishments.

The 1948 Census of Business was taken under the provision of the Act of June 19, 1948, which provides that the Business Census be taken for 1948 and for each fifth year thereafter. Previous Business Censuses were taken for the years 1929, 1933, 1935, and 1939.

Scope of the Census.—The 1948 Census of Business covered all establishments in the following trades, as defined by the Standard Industrial Classification Manual, May 1949 issue, of the Executive Office of the President: all retail trades; all wholesale trades; all service trades in the following four groups—personal services, business services, automobile repairs and services, and miscellaneous repair services; hotels; tourist courts and camps; and amusements, including motion picture theaters. Some important services not covered are radio broadcasting and television, medical and health, legal, educational, nonprofit, accounting, and domestic services.

This coverage is similar to that of the 1939 Business Census. However, "custom trades" and "services incidental to transportation," which are no longer included in the standard classification of the service trades, are not covered by the 1948 Census. In a number of localities, these exclusions as well as other changes in the standard classification may have

a considerable effect in comparing 1948 with 1939 data, particularly with respect to establishment count.

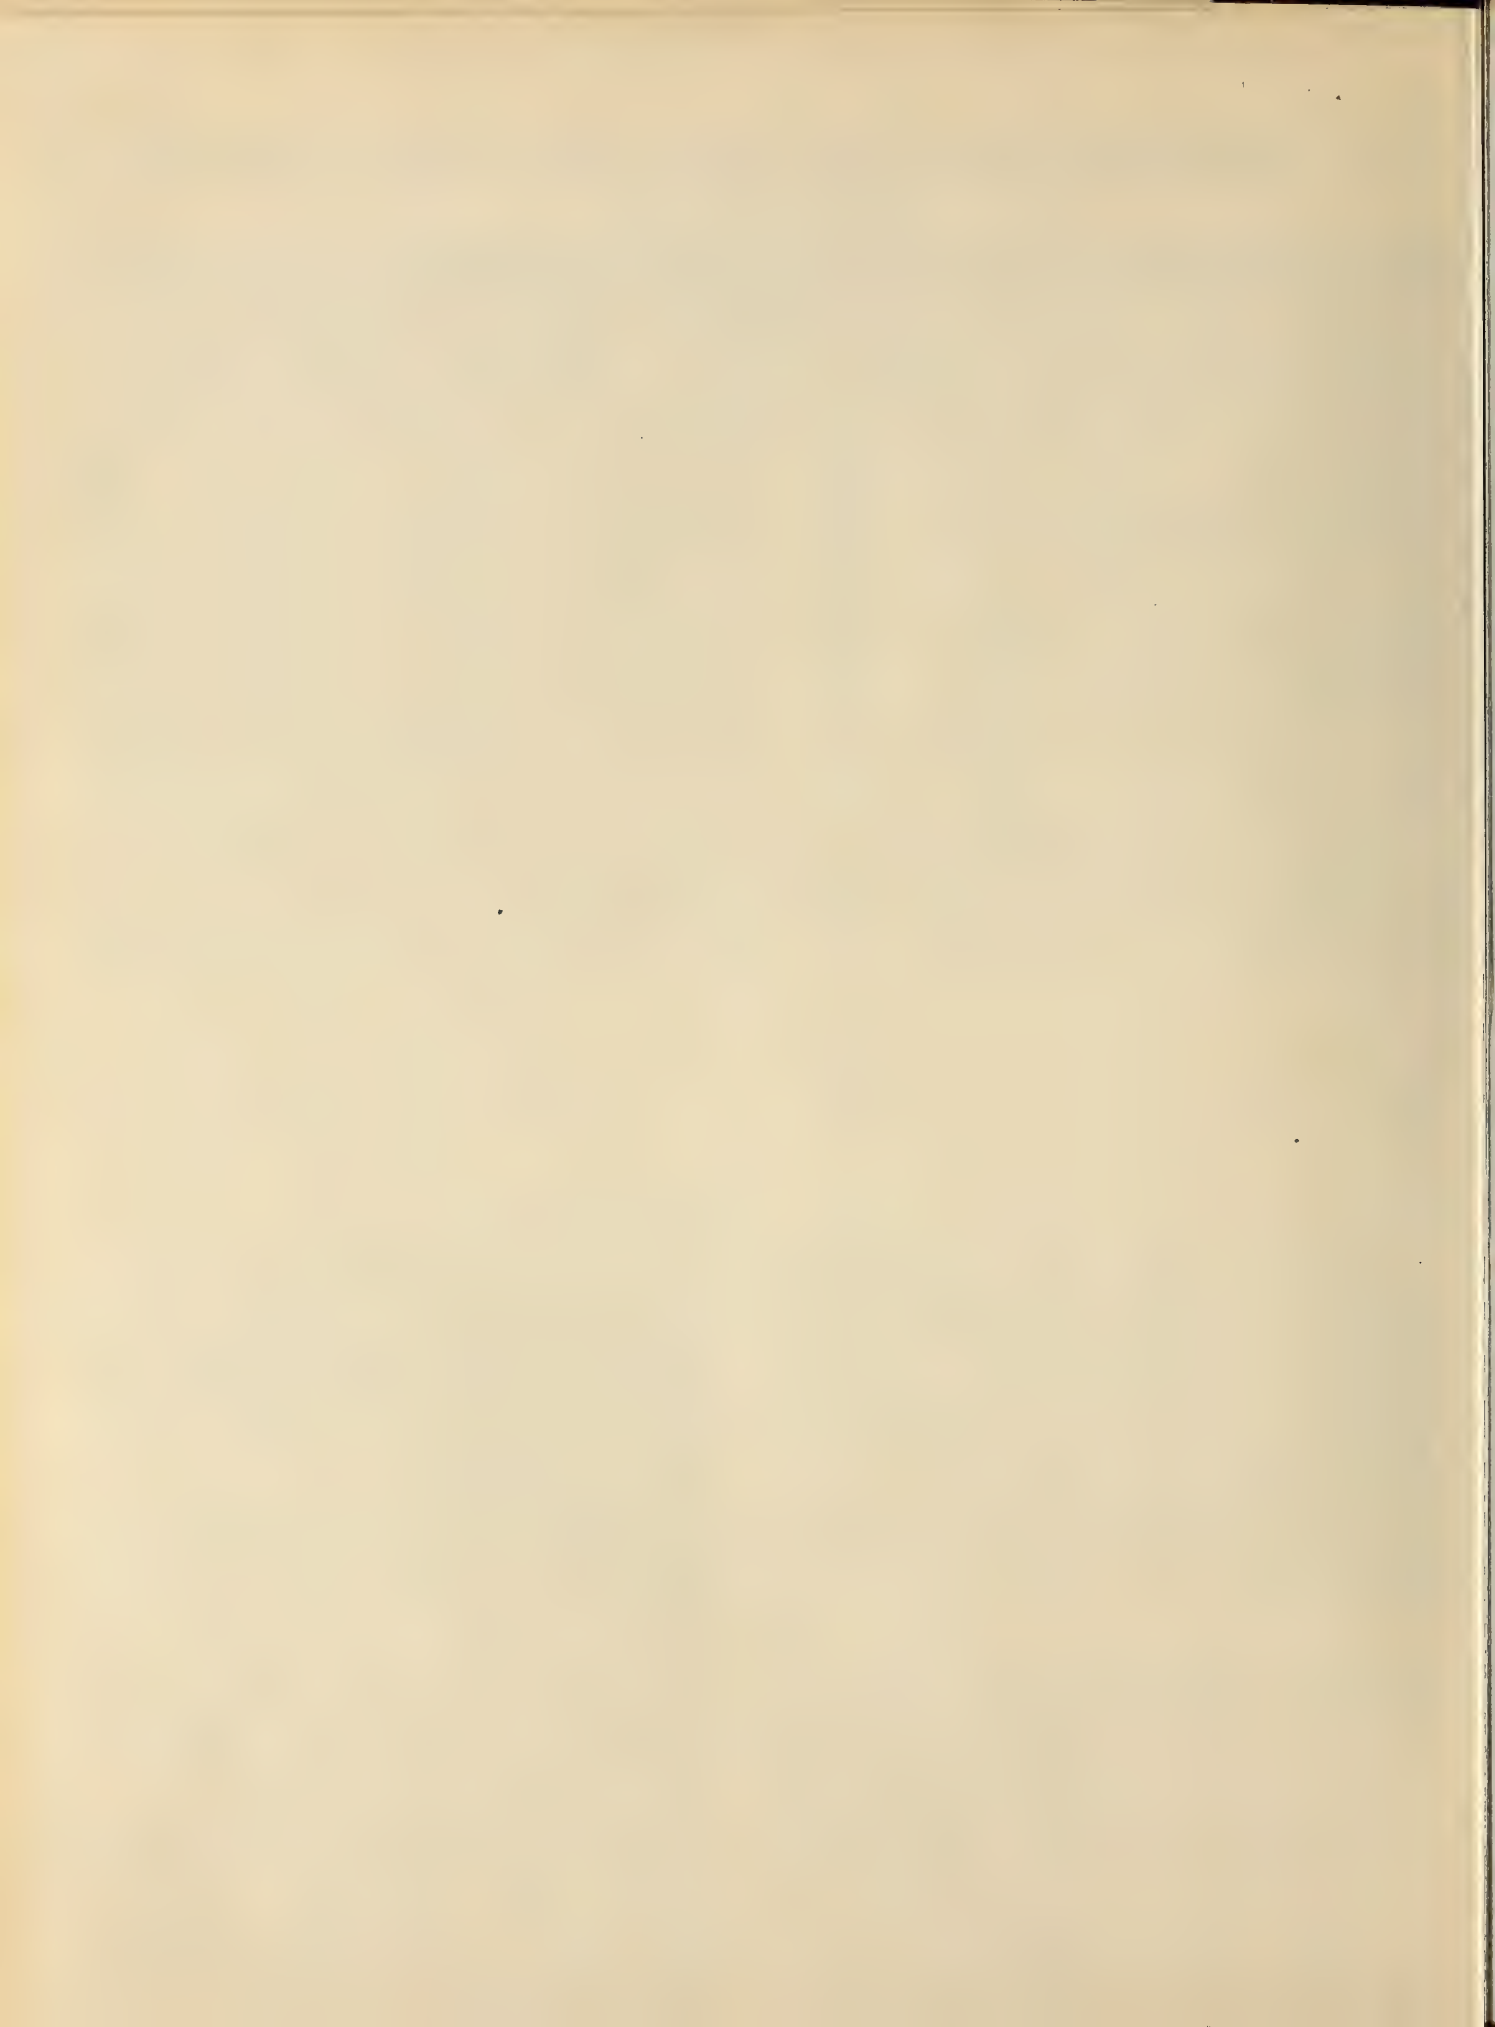

Establishment definition.—For Census purposes, a business establishment is defined to include only enterprises conducted from a recognizable place of business, provided that the annual sales were in excess of \$5,000 for a wholesale trade establishment and \$500 for establishments in other trades. A detailed analysis of coverage will be provided in future Census of Business publications.

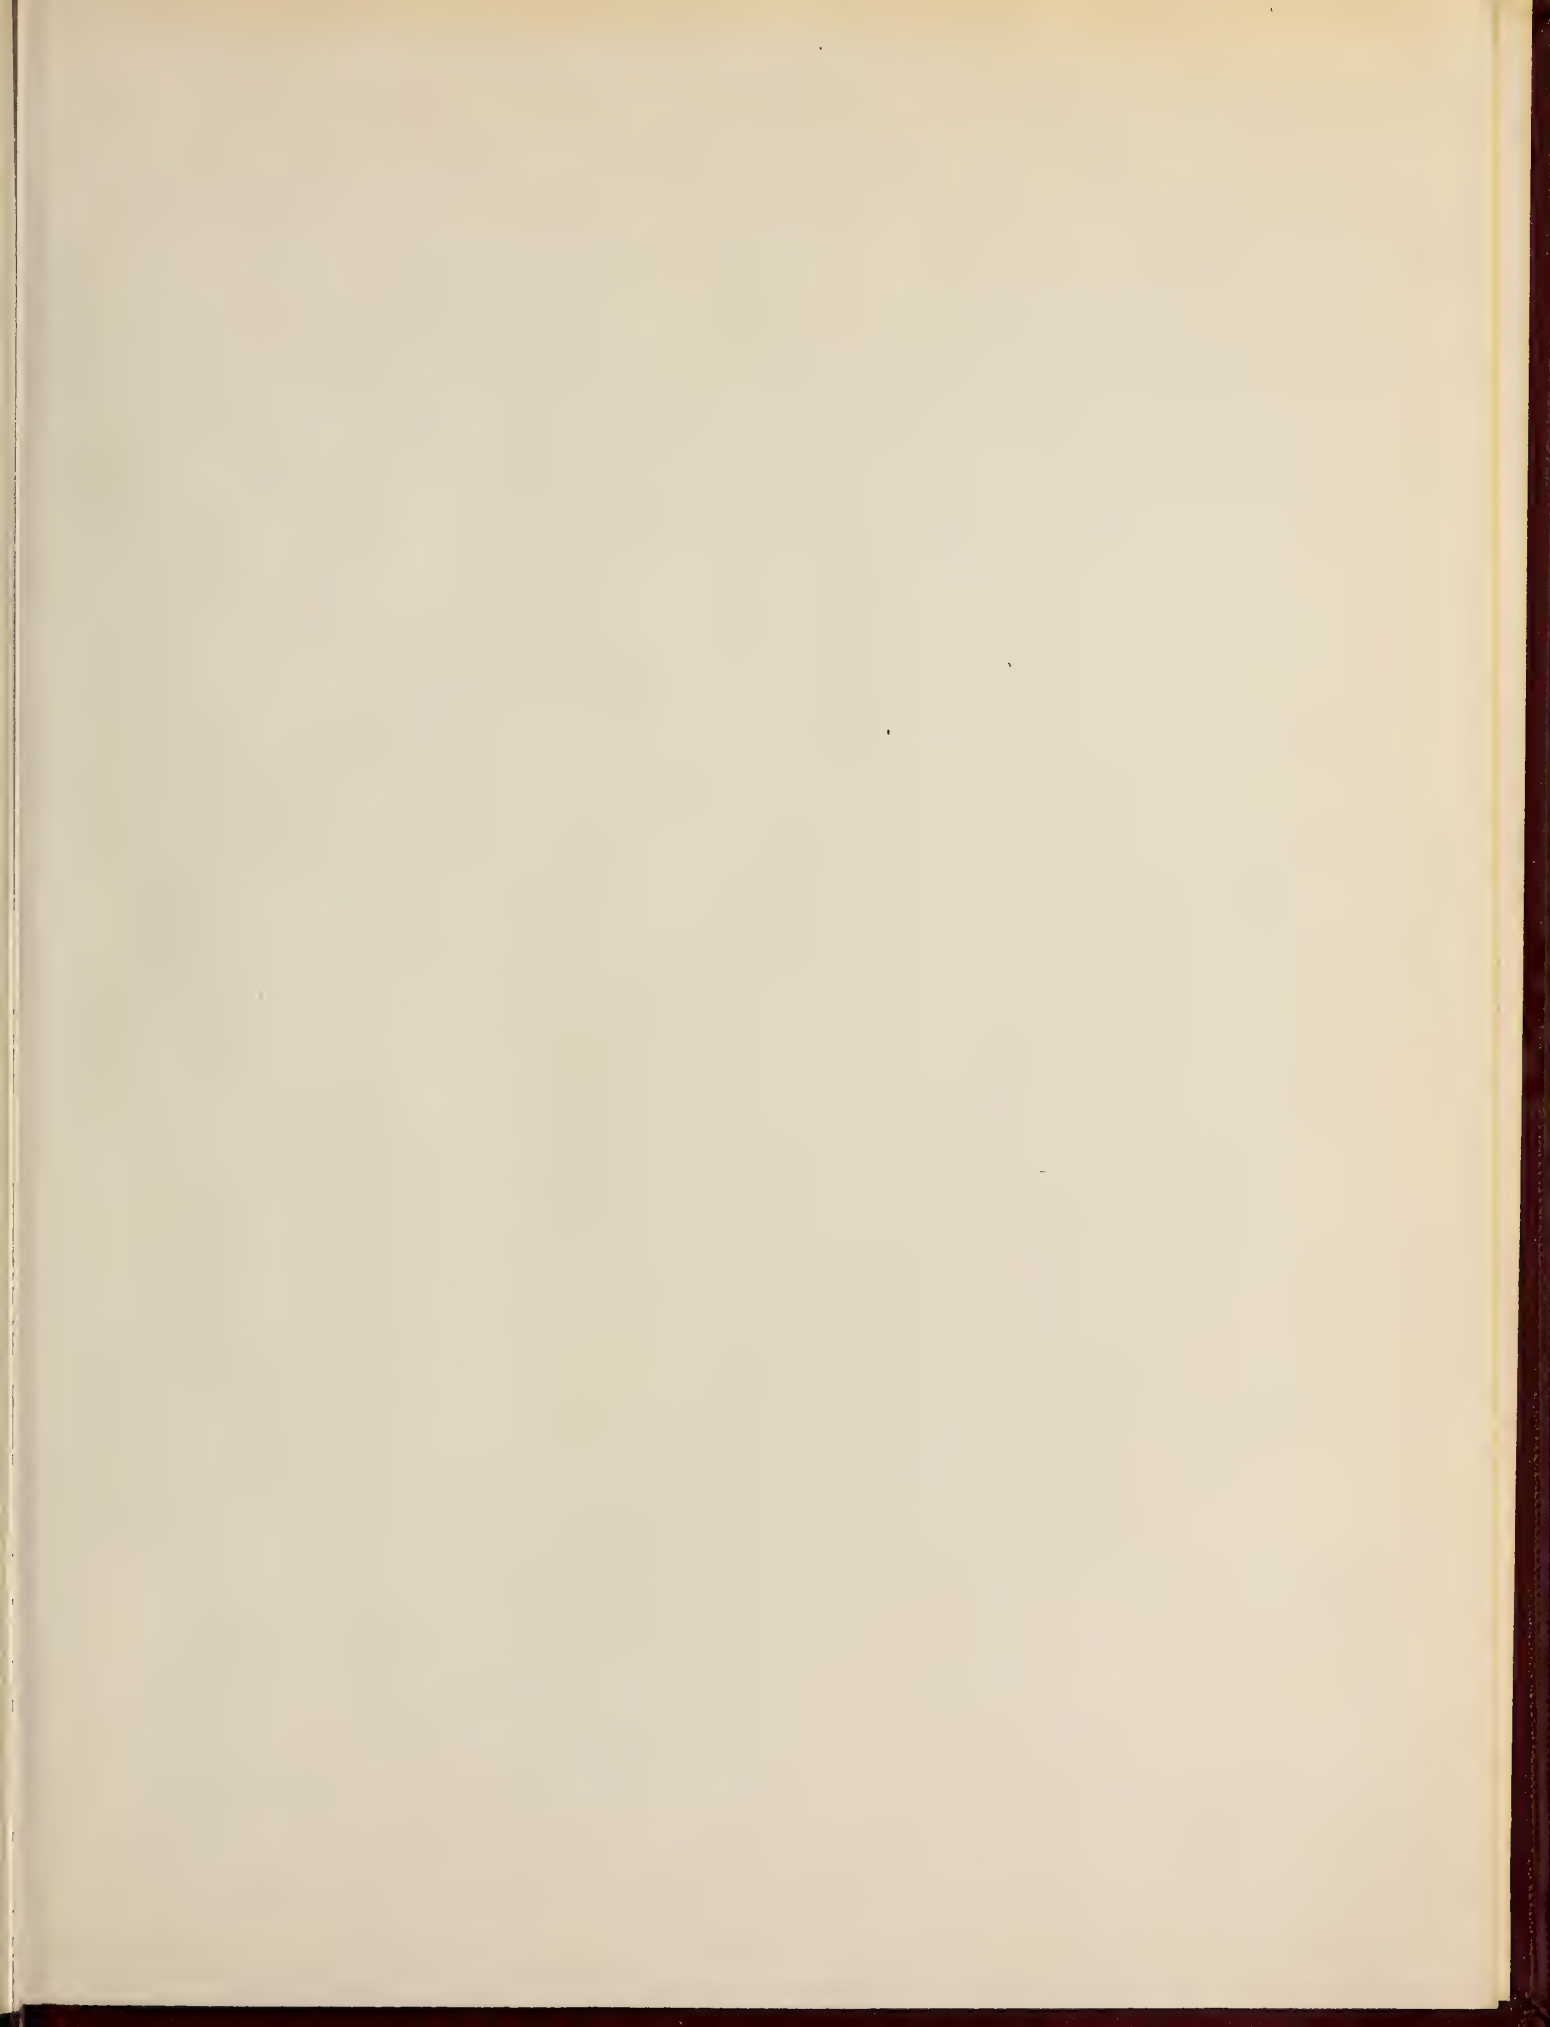

"Number of establishments" is the number of separate business locations, rather than the number of business companies or organizations, since the Census figures represent information reported separately for each business location or establishment. The establishment count reflects the number of places in business at the end of 1948 excluding administrative and executive offices of multiunit organizations, and "chain store" warehouses.

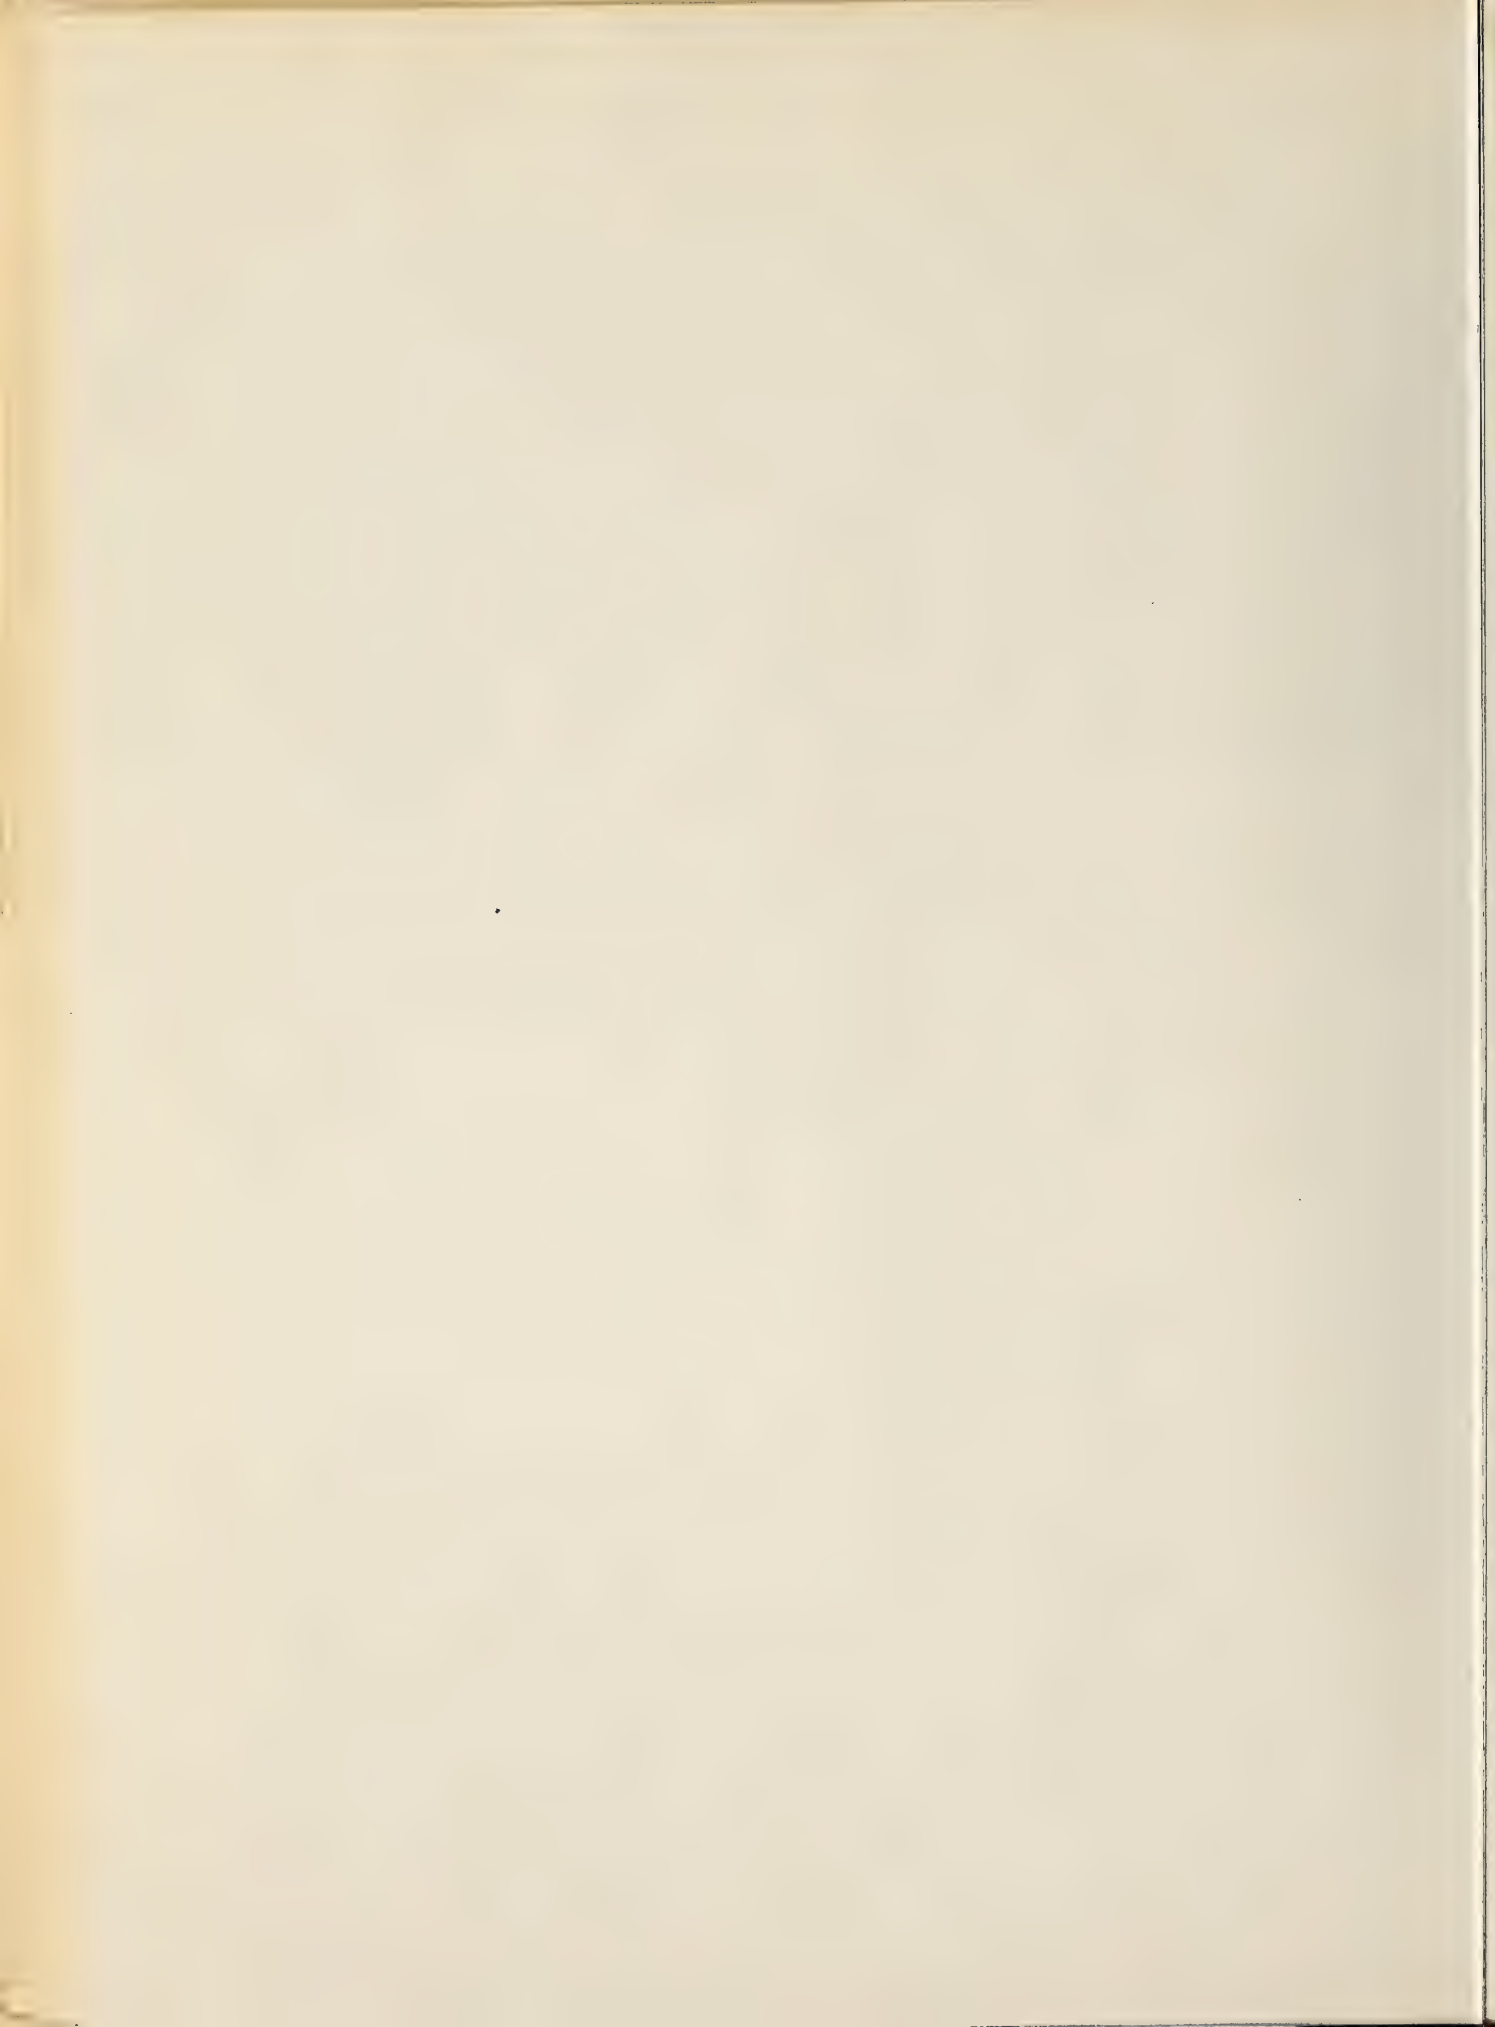

Sales and receipts.—"1948 sales and receipts" represents sales of merchandise and receipts from repairs and other services to customers. The figures reflect deductions for returned goods and allowances, but not for trade-in allowances; they exclude sales and excise taxes collected from customers and paid directly to any taxing agency.

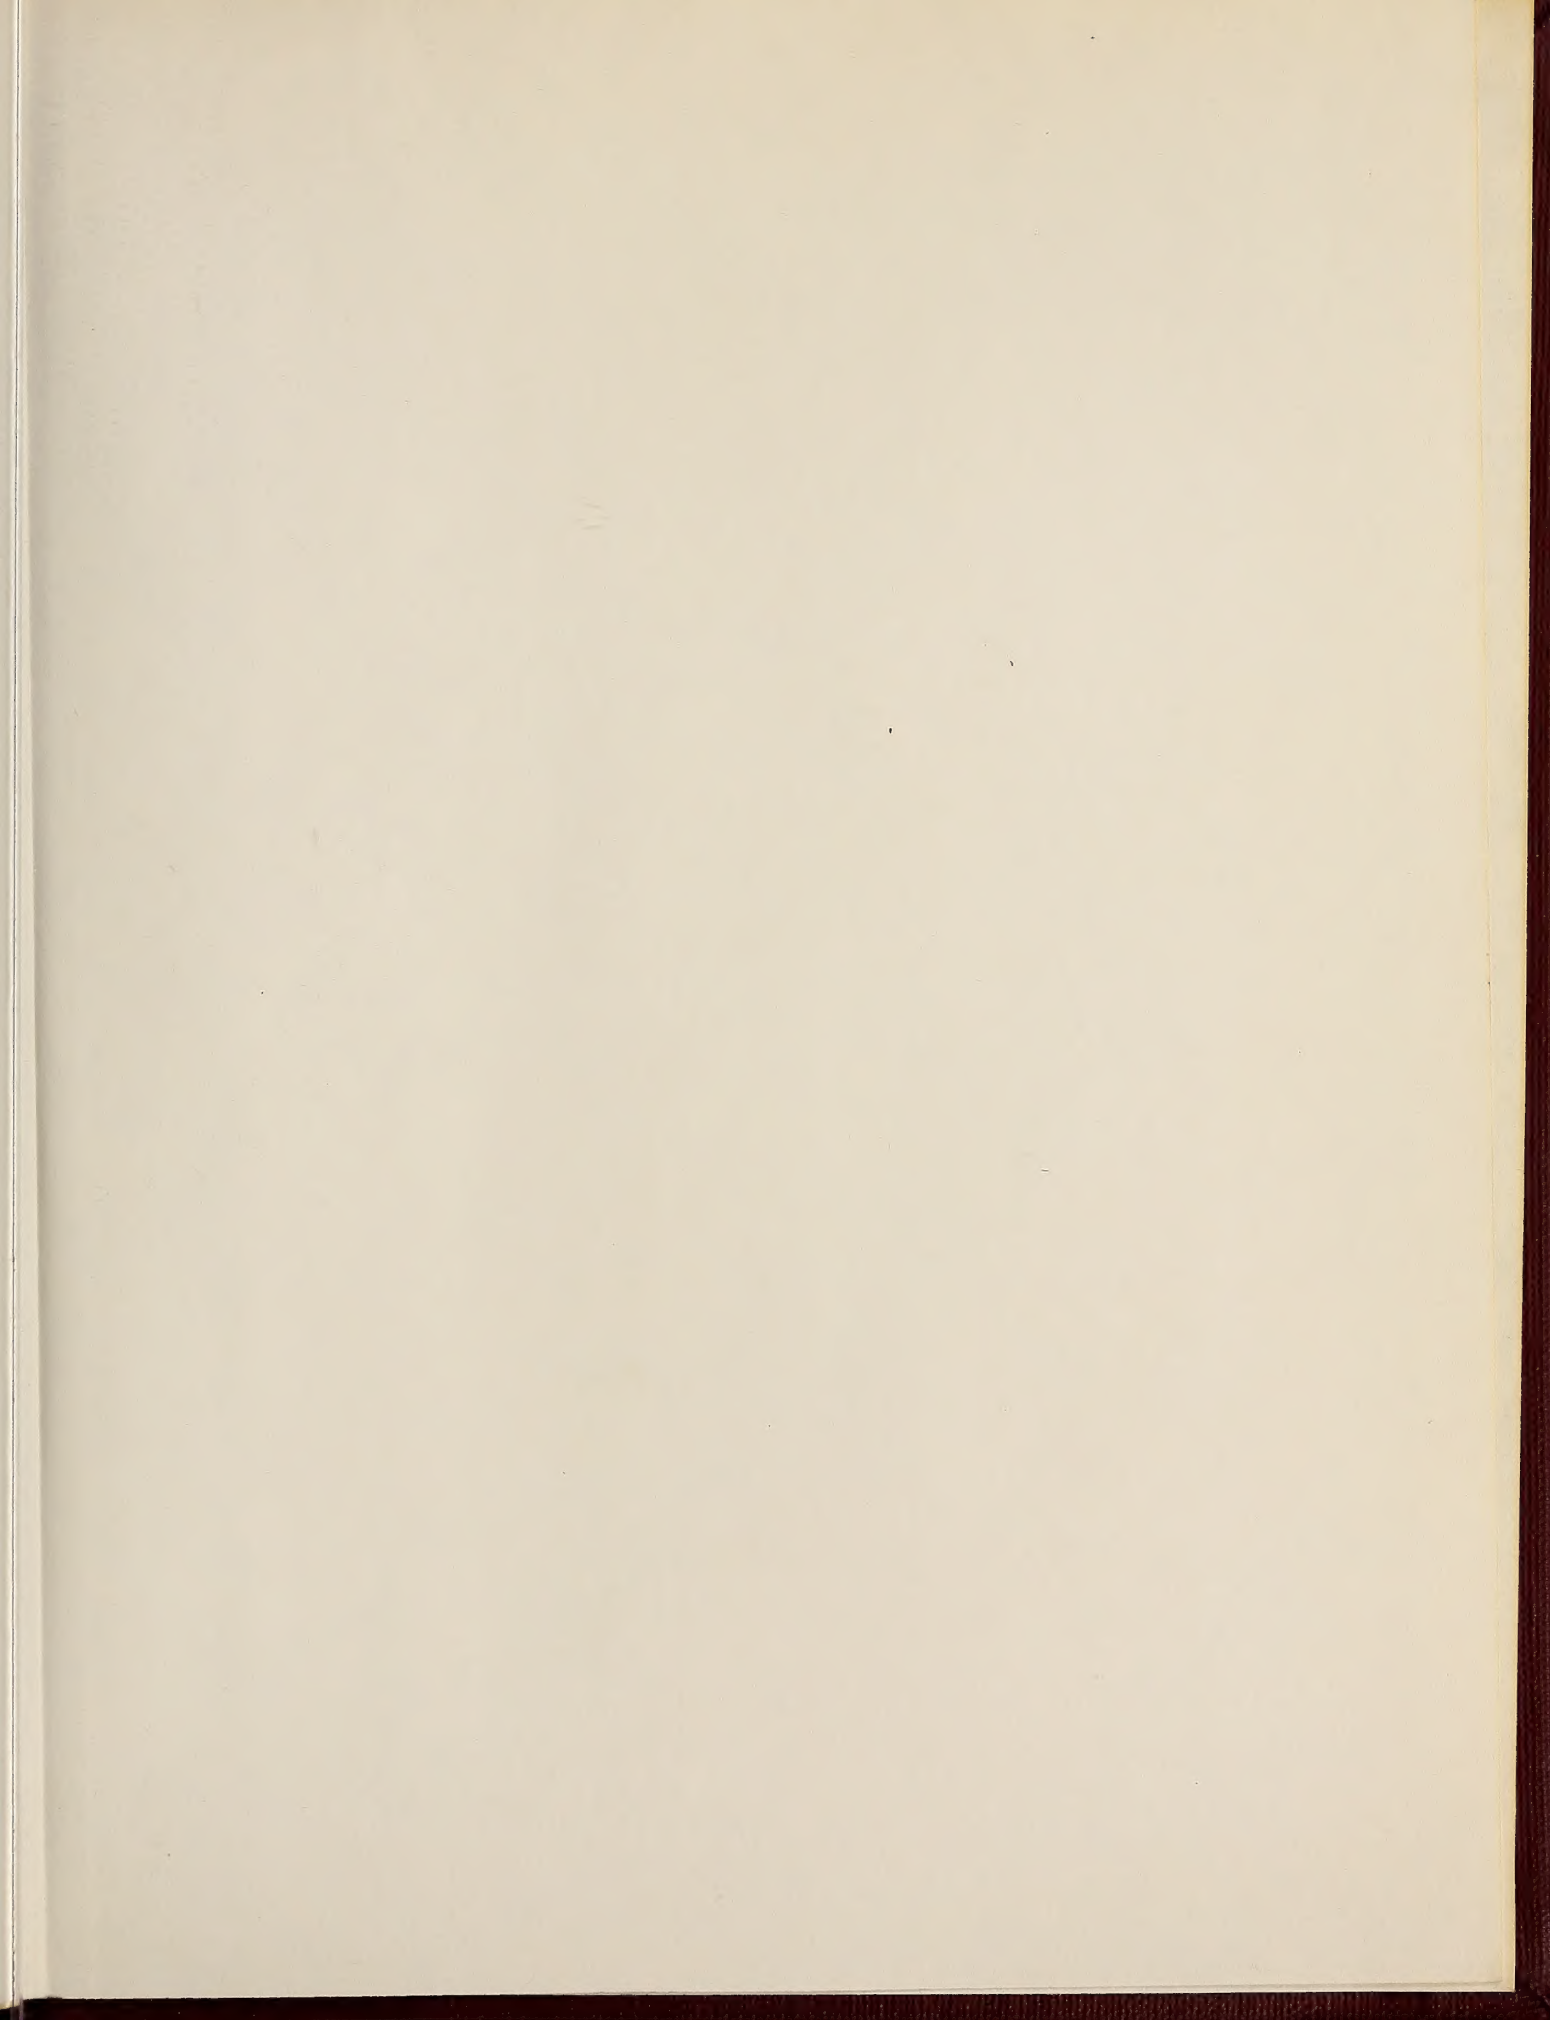

Proprietors.—"Active proprietors..." represents owners and partners of unincorporated businesses who devoted the major portion of their time to the business in November 1948.

Employment.—"Number of paid employees..." represents all employees on the pay roll for the pay period ending nearest November 15, 1948. "Full workweek" employees, whether regular or seasonal, are those who in the November 15 pay period were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment.
